Introduction

How much enjoyment can be had with mere pencil, paper, and a few oddly shaped dice? Decades worth if you possess a vivid imagination and a few good friends to spend evenings with. Welcome to the world of tabletop roleplaying games (RPGs)!

Bottled Lightning is such a game based on the d20 Open Game License and with a medieval/fantasy setting. It is designed to leverage the old-school RPG conventions everyone already knows but with streamlined modern game mechanics and a unique Talent system. Its rules are comprehensive enough to cover all the basics, yet spare enough to avoid bloat and encourage player interpretation.

But aren't there already d1000 retro-clones in existence? Why another? This game's main draw is its aforementioned **Talents system**. It allows for great flexibility in character creation while avoiding that baneful trap of most skill-based systems: all the characters becoming the same. Characters can grow and diverge in fun ways without losing the core of who they are with no need for dozens of classes with clunky proficiencies, skills, and kits.

So dive in! RPGs lay before you vast a ocean of imaginative fancies, intellectual challenges, and marvelous surprises in their unpredictable stories. They bring people together in an increasingly isolating world, and have grown from a tiny niche hobby to a great American pastime wherein life-long friendships are forged. I wish you all the best and hope you enjoy this work.

- Finister -

How to Play

This is a simplified explanation of how RPGs work. There are a great many written and online resources that can expand upon these basics.

A small group of 2-8 people gather. One is designated the Game Master (GM) while others are the players. Players use the game's rules to generate “*player characters*” (PCs). The GM creates scenarios for those characters to inhabit and populates them with “*non-player characters*” (NPCs). These can be underground dungeons to explore, fearsome beasts to battle, courtly intrigue, or anything else that can be imagined. The GM describes the world and NPCs to the players and the players respond by describing the reactions of their PCs to it all. The rest of the game rules are used to determine how those interactions play out. Does the knight slay the dragon? Does the sorceress enchant the knight? Does the thief pilfer the sorceresses' wand? Rules, dice, and the judgement of the GM are used to determine the outcomes.

Terminology & Abbreviations

This game uses a number of common role playing game terms and abbreviations which are detailed in the sections where they are described and in the Table of Contents (q.v.).

Dice Notation

Is shorthand to denote how many and what kind of dice are used for a roll. It looks like this:

[dice number]d[dice type]+/-modifier

Which translates thusly:

- ♦ 1d20 = roll one 20-sided die
- ♦ 2d8 = roll two eight-sided dice and add the results together
- ♦ 4d6+1 = roll four six-sided dice, add the results together, and then add 1 for the total

General Rules

There are a few overarching rules that apply to everything that follows:

- ♦ The GM's common sense trumps oddities of game mechanics
- ♦ Specific rules always trump more general ones
- ♦ Always round fractions down unless stated otherwise.

House Rules

House Rules are any rules the GM wishes to add, remove, or modify for his or her specific game. These should be explained to the players before the game starts and written down for future reference.

Compatibility

BLRPG can easily be used with most other versions of the **Original Role Playing Game** on which the Open Game License is based. It is geared to be most compatible with the earlier iterations but can be converted to more modern versions without much effort.

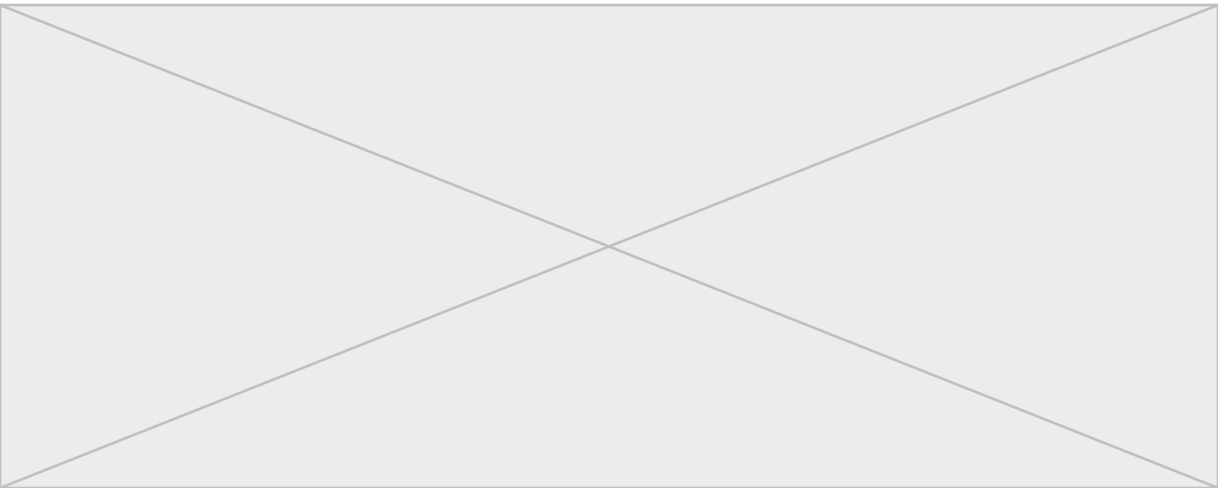

Characters

All players need a character to join the game. To make one sit down with pencil, paper, dice and a fresh character sheet and do the following:

1. **Assign your character a level** - this will be 1st level unless otherwise specified by the GM.
2. **Roll attributes** - the chief indicator of your character's strengths and weaknesses.
3. **Choose a class** - pick one from the four core classes: fighter; priest; magic-user; or knave.
4. **Choose 1st level talent** - pick a race, skill, power, or ability from the Talents section to make your character unique.
5. **Knaves choose second 1st-level Talent** - the knave class gets to pick a bonus talent from the Knave's Talent list.
6. **Choose Disadvantages** - (optionally) choose up to 2 disadvantages and gain a talent of your choice with each disadvantages selected.
7. **Roll Hit Points** - Roll hit points as determined by your character's class, attributes, and talents.
8. **Choose Alignment** - the character's overarching moral outlook
9. **Equipment** - Roll starting wealth and outfit your character
10. **Armor Class** - Write down your character's armor class as determined by their dexterity attribute and equipment selection.
11. **Spells** - If the character can cast spells, choose them in the Magic Spell Casting section (q.v.).

Levels

Levels are an overall measure of a character's power and abilities. As a character gains levels they will gain abilities, improve dice rolls, and become harder to kill. See Level Advancement & Experience (q.v.).

Attributes

Attributes are core character abilities represented by a number. Players roll 3d6 and add up the number for each attribute. Higher attributes are better and each attribute will have an **Attribute Modifier** (see chart below). Characters rolled up with excessively low attributes can be discarded at the GM's discretion. Exactly how attributes and attribute modifies effect gameplay are explained in the Actions & Dice Rolls section (q.v.).

Strength (STR) - A character's brawn and physical power. It modifies: melee combat talent rolls; melee weapon damage done; and rolls on lifting, breaking, or throwing objects.

Intelligence (INT) - A character's learning and analytical reasoning (their "IQ"). It modifies rolls for wizardry spell casting, learning, analysis, research, etc.

Dexterity (DEX) - A character's speed, agility, and balance. It modifies: to-hit rolls with ranged weapons; avoiding being hit in combat; dodging large attacks; tests of agility climbing, or balance; and modifies who goes first in combat.

Wisdom (WIS) - A character's mental fortitude, resolve, and intuition. It modifies rolls involving thaumaturgy spell casting, perception, resisting mental attacks, and willpower.

Constitution (CON) - A character's health, heartiness, and overall physical confirmation. It modifies rolls on illness, poisons, fatigue, sudden death attacks, and severe shocks. It further modifies hit dice rolls (but never reduces a HD roll below 1).

Charisma (CHA) - A character's charm, presence, and force of personality. It modifies rolls involving persuading, inspiring, leadership, or the general reactions of others towards the character.

Special Abilities / Notes: _____

Classes

A character's class is their main "mode" or approach to challenges. There are four arranged such that each has two adjacent classes (those to the left and right) and one opposing class (the one directly across). A character's talents are strongest within their class, middling in adjacent classes ($\frac{1}{2}$ their level), and poor in opposing ones ($\frac{1}{4}$ their level). Each class has one or more starting talents gains additional talents as they advance in level. See Experience & Level Advancement (q.v.).

- ♦ **Character's Class Talents = full level**
- ♦ **Adjacent Classes Talents = $\frac{1}{2}$ level (minimum 1)**
- ♦ **Opposing Class Talents = $\frac{1}{4}$ level (minimum 1)**

Thus, a 10th level fighter would be 10th level with fighter talents, 5th level with knave or priest talents, and 2nd level (round down) with magic-user talents.

Level 1 Minimum: One of the few “always round down” exceptions is a character who takes a talent will always be at least 1st level with it. A 3rd level fighter who takes Wizardry 1 will be 1st level with it, not level zero.

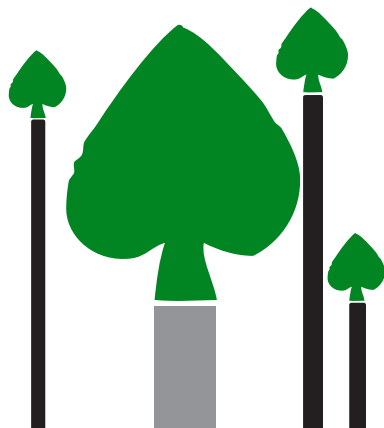

Fighters

are characters who excel in combat, war, and martial pursuits. They are masters of brute, direct force and the most durable of characters.

Fighters benefit from having high Strength, Dexterity, and Constitution attributes. They may use any weapon and wear any armor.

- ♦ **Starting Talents:** Combat; Multi-Attack;
- ♦ **Weapons:** Any
- ♦ **Armor:** Any
- ♦ **Hit Dice:** d8
- ♦ **Saving Throw Mods:** +2 vs petrification, polymorph, breath weapons, any entangling and grappling attacks.
- ♦ **Adjacent Classes:** Knaves, Priests
- ♦ **Opposing Class:** Magic-Users

Common fighters archetypes: archer, barbarian, brawler, champion, corsair, duelist, foe, gladiator, knight (caballero, cavalier, chevalier), man-at-arms, mercenary, myrmidon, paladin, pirate, pikeman, ranger, scrapper, sell-sword, soldier, swashbuckler, swordsman, warrior, etc.

Priests

are devotees to a particular religion, god, or pantheon. Through piety they have access to supernatural abilities and they stand second in combat only to fighters. They may wear any armor and use weapons that are either non-piercing and non-cutting, or a weapon favored by their deity. Priests benefit from having a high Wisdom and Charisma attributes.

- ♦ **Starting Talents:** Combat; Thaumaturgy
- ♦ **Weapons:** blunt non-slashing, non-piercing weapons, or weapons favored by deity.
- ♦ **Armor:** Any
- ♦ **Hit Dice:** d6
- ♦ **Saving Throw Mods:** +2 vs poison, paralyzation, death magic, and any mental attacks
- ♦ **Adjacent Classes:** Fighters, Magic Users
- ♦ **Opposing Class:** Knaves

Common priest archetypes: acolyte, adept, brother/sister, canon, cleric, cultist, curate, disciple, druid, elder, father/mother, friar, guru, holy man/woman, lama, liturgist, mendicant, minister, monk/nun, patriarch/matriarch, predicant, priest/priestess, pulpiter, rector, reverend, sermonizer, shaman, vicar, votary, yogi, etc.

Magic User

“Magic-user” is a catch-all term encompassing a wide range of characters who've gained supernatural abilities through the study of arcane arts. They benefit from having high Intelligence attributes. They are poor combatants who cannot wear armor, have access to a limited array of weapons, and are best advised to keep opponents at a distance. This notwithstanding, magic-users are some of the most powerful and versatile characters, particularly at higher levels.

- ♦ **Starting Talents:** Combat; Wizardry 1
- ♦ **Weapons:** Club, Dagger, Dart, Staff, Crossbow (small or hand only)
- ♦ **Armor:** none
- ♦ **Hit Dice:** d4
- ♦ **Saving Throw Mods:** +2 vs spells, illusions, rods, staves, and wands
- ♦ **Adjacent Classes:** Knaves, Priests
- ♦ **Opposing Class:** Fighters

Common magic-user archetypes: alchemist, apparitionist, augurer, cabalist, charmer, conjurer, cunning man/woman, diviner, dweomercrafter, enchanter/enchantress, evoker, illusionist, mage, magician, magnus, medium, necromancer, prestidigitator, obscurantist, sage, seer, sha'ir, soothsayer, sorcerer/sorceress, spellbinder, thaumaturgist, theurgist, trickster, visionist, warlock, witch/warlock, wise man/woman, wizard, etc.

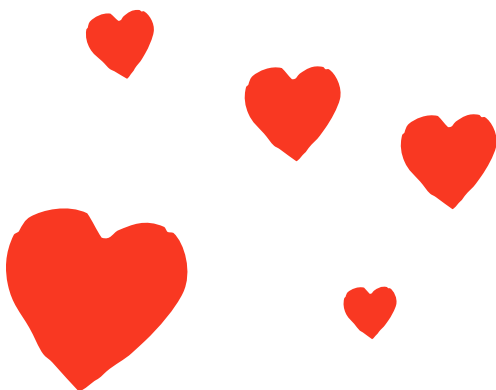

Knaves

are masters of stealth, guile, and deception. In addition to the "thief" archetype, the knave class also encompasses various "entertainer" adventures such as bards, acrobats, and mummers. Knaves benefit from having a high Dexterity attribute (and a high Charisma attribute for entertainer types). Knaves may use any weapon but favor smaller, concealable weapons that don't draw attention. They wear only the lightest of armor to avoid attention as well as the penalties imposed on talents by heavier mail (stealth, climbing, etc.).

- ♦ **Starting Talents:** Combat; Stealth, any 1 knave talent
- ♦ **Weapons:** Any
- ♦ **Armor:** Leather or padded.
- ♦ **Hit Dice:** d6
- ♦ **Saving Throw Mods:** +2 vs breath weapons and any save requiring dexterity
- ♦ **Adjacent Class:** Fighters, Magic Users
- ♦ **Opposing Class:** Priests

Common knave types archetypes: assassin, bandit, burglar, charlatan, crook, cutpurse, filcher, footpad, fraudster, highwayman, magsman, mountebank, ne'er-do-well, pickpocket, pirate, robber, rogue, rutterkin, rapsallion, scofflaw, scoundrel, sharpener, slink, swindler, thug, etc.

Also, as entertainers: acrobat, actor, bard, jester, jongleur, fili, lark, minstrel, mummer, racaraide, skald, etc.

Talents

are the skills, abilities, and powers that make each character unique. Each character's class assigns them several free talents at 1st level, and 1 talent of their choosing (*two for knaves, but the second must be from the Knave Talents list*). A character may choose any talent but will perform best in talents from their class, middling in adjacent classes' talents, and poor in opposing ones. As a character gains levels they will gain more talents of their choosing. A talent may only be taken once unless it specifically states otherwise.

Implied Talents - Characters may have for free any talents implied by their stated profession or background as long as they're not ones listed below and don't imbalance the game. So, if a character is a sailor it's implied he or she knows how to sail a boat and tie knots for free. Implied talents are rolled at a character's full level.

Race Talents - To be any race other than human costs one talent slot. This can only be chosen when a character is first created, it never changes, and only ONE race talent may ever be taken.

Common Talents - Any character can take these and all classes will be equally good with them.

Fighter Talents - Fighters will be best at these, priests and knaves middling ($\frac{1}{2}$ their level), magic-users poor ($\frac{1}{4}$ their level).

Priest Talents - Priests will be best at these, fighters and magic-users middling ($\frac{1}{2}$ level), knaves poor ($\frac{1}{4}$ level). *Special Note on Priest Talents:* Most of these talents are granted by the grace of the character's deity. If the character is impious or works contrary to their deity's designs these talents may be curtailed or revoked until the behavior is corrected.

Magic-User Talents - Magic-users will be best at these, priests and knaves middling ($\frac{1}{2}$ level), fighters poor ($\frac{1}{4}$ level).

Knave Talents - Knaves will be best at these, fighters and magic-users middling ($\frac{1}{2}$ level), priests poor ($\frac{1}{4}$ level).

List of Talents

Race Talents

1. Dwarf
2. Elf
3. Gnome
4. Half-Elf
5. Half-Orc
6. Halfling

Common Talents

1. Alertness
2. Attribute Increase
3. Medical (*INT*)
4. Riding (*DEX*)
5. Stronghold
6. Survival & Tracking

1. Acrobatics (*DEX*)
2. Assassination (*INT*)
3. Backstabbing
4. Beguilement (*CHA*)
5. Inspiration (*CHA*)
6. Burglary (*DEX*)
7. Climbing (*DEX*)
8. Disguise
9. Escapology (*DEX/INT*)
10. Fraud (*INT/CHA*)
11. Lore & Read Magic (*INT*)
12. Sleight of hand (*DEX*)
13. Stealth (*DEX*)

Race Talents

To be any race other than human cost 1 talent slot.

Humans

are the most common race in the game. They come in a wide variety of sizes, shapes, and appearance; and have a wide range of personalities. They are the baseline race for character creation. Characteristics:

- ♦ **Languages:** Common
- ♦ **Movement:** 30'

Dwarfs

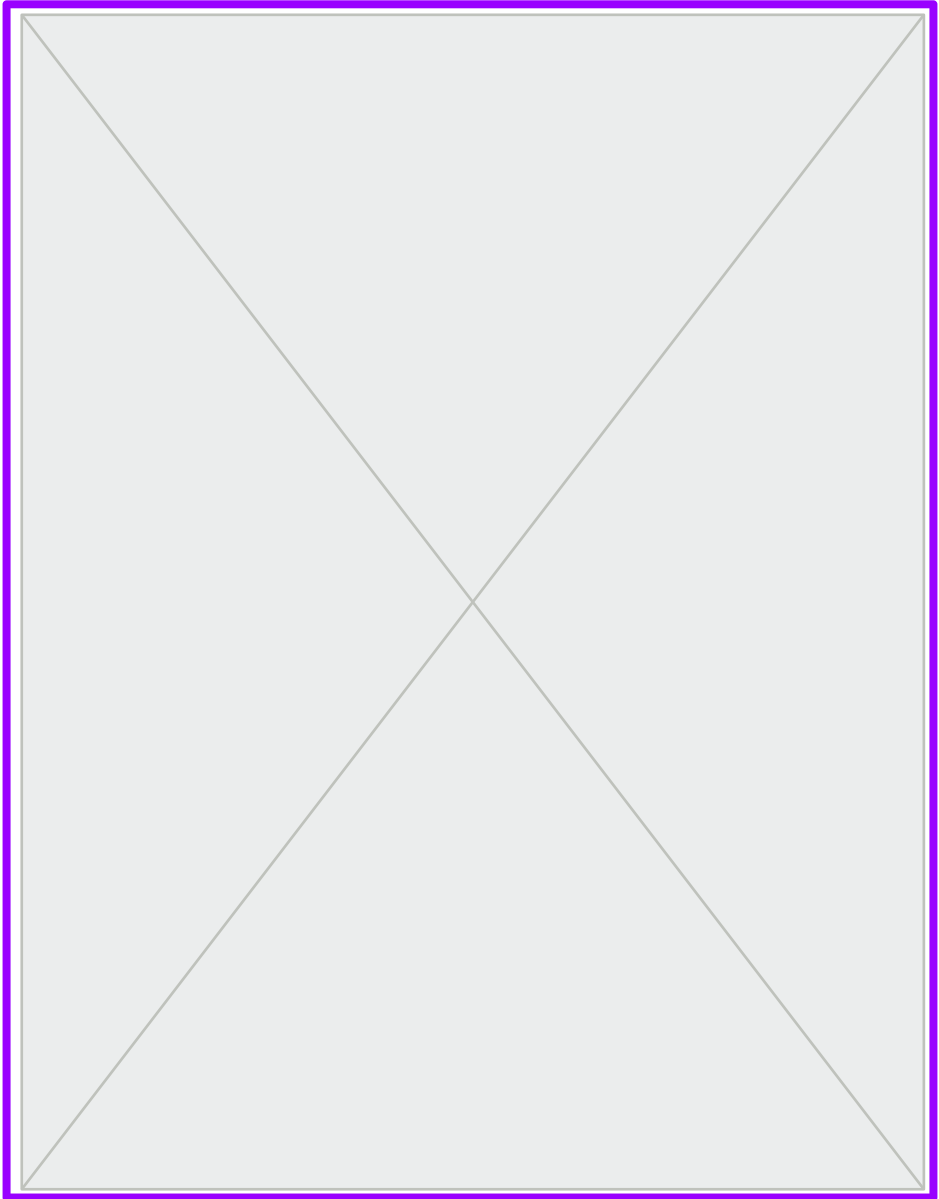

are short and burly humanoids rarely seen without full beards. They stand about 4ft tall, weigh around 150 lbs. have ruddy skin, earthen-toned hair, and tend towards dour and gruff personalities. They're great miners who're eminently comfortable in subterranean settings, and they're particularly resistant to poisons and magic. This talent may not be taken by the magic-user class and dwarves may not choose any magic-user talents. Characteristics:

- ♦ **Attributes:** +1 Constitution (max 18), -1 Charisma (min 3)
- ♦ **Languages:** Common, Dwarvish, Goblinese
- ♦ **Movement:** 25'
- ♦ **Saving Throws:** +4 vs. magical effects and poisons
- ♦ **Darksight** (as the spell)
- ♦ **Size:** Too small to use standard human armor or clothing, longer weapons, or longbows
- ♦ **Perception Bonus:** + 3 to all perception rolls & checks in underground settings for: non-magical traps; hidden pathways & doors; new construction; or sloping passages.
- ♦ **Class Limit:** May not be magic-users or take magic-user talents.

Elves

stand about 5ft tall, and weigh around 120 lbs. They have delicate, beautiful features, slender builds, and long pointed ears. Elves live very long lives and retain their youthful vigor right up till death. The race has an affinity for magic and nature. Their personalities are often described as friendly, but ethereal and detached. Characteristics:

- ♦ **Attributes:** +1 Dexterity (max 18), -1 Constitution (min 3)
- ♦ **Languages:** Common, elvish [Common, Elvish, Goblinese, Orcish]
- ♦ **Movement:** 30'
- ♦ **Darksight** (as the spell)

- ♦ **Immunity:** Immune to paralyzation by ghouls.
- ♦ **Perception Bonus:** +2 on all perception rolls & checks

Gnomes

are distant cousins to dwarves being similar in height but more slender in build. They stand 4ft height, weigh about 100 lbs, and often have large bulbous noses. Gnomes have a greater affinity for magic than dwarves and gravitate towards illusion magic. They tend to be much more jovial and mischievous than their dwarven cousins. They speak a dialect of Dwarven. Characteristics:

- ♦ **Languages:** Common, Dwarvish, Kobold, the secret language of burrowing mammals
- ♦ **Movement:** 25'
- ♦ **Saving throws:** +2 vs. magical effects, +4 vs. poisons
- ♦ **Darksight** (as the spell)
- ♦ **Size:** Too small to use standard human armor or clothing, longer weapons, or longbows
- ♦ **Perception Bonus:** +3 to all perception rolls & checks In underground settings for: non-magical traps; hidden pathways & doors; new construction; or sloping passages.

Half-Elves

are characters with both human and elven lineage. Such unions tend to produce individuals that strongly favor their elven side but are taller (around 5 ½ ft tall) and more sturdily built (around 150 lbs.). Characteristics:

- ♦ **Languages:** Common, Elven
- ♦ **Movement:** 30'
- ♦ **Saving throws:** +4 on saving throws vs. ghoul's paralyzation
- ♦ **Darksight** (as the spell)
- ♦ **Perception Bonus:** +2 on all perception rolls & checks

Half-Orcs

are the product of unions between orcs and humans. Most such offspring are monstrous and more orc than man, but player characters are assumed to be of the 10% who can pass for human. Their orcish lineage grants them greater strength and fortitude but tends them towards homely countenances and brutish demeanors. This talent may not be taken by the magic-user class or priest classes. Additionally, half-orcs may not take any magic-user talents. Characteristics:

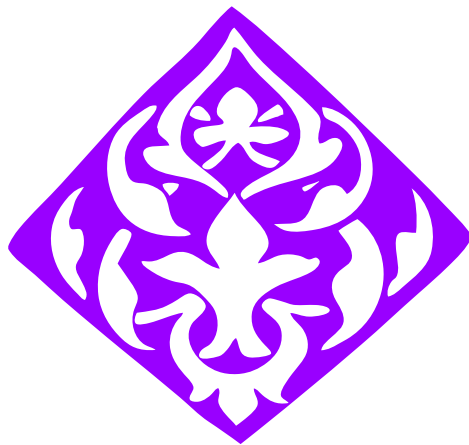

- ♦ **Attributes:** +1 Strength (max 19), +1 Constitution (max 19), -2 Charisma (min 3)

- ♦ **Languages:** Common, Orcish
- ♦ **Movement:** 30'
- ♦ **Darksight** (as the spell)
- ♦ **Class Limit:** May not be magic-users or take magic-user talents.

Halflings

are diminutive humanoids that stand a mere three feet tall and weigh 60 lbs. They commonly go barefoot and have large, furry feet. Their small size and natural agility makes them innately stealthy. They are known to be a hearty, resilient race who are highly resistant to magic, mental influence, and poisons. Halflings tend towards friendly, earthy personalities and enjoy camaraderie, home life, and creature comforts. This talent may not be taken by the magic-user class or priest classes. Additionally, halflings may not take any magic-user talents. Characteristics:

- ♦ **Attributes:** -1 Strength (min 3), +1 Dexterity (max 19)
- ♦ **Languages:** Common, Halfling
- ♦ **Movement:** 25'
- ♦ **Saving Throws:** +3 vs magic, mind influencing effects (but not illusions), and poisons.
- ♦ **Stealth Bonus** - +3 to all Stealth rolls (talent & no-talent)
- ♦ **Size:** Too small to use standard human armor or clothing, and they may not use any weapon larger than a short sword.
- ♦ **Class Limit:** May not be magic-users or priests. May not take magic-user talents.

Common Talents

Alertness

Modifier: none

The character is incredibly aware and gains +3 to all perception rolls, is only surprised on a roll of 1 on d12, and makes such rolls without penalty even while distracted or asleep.

Attribute Increase

Modifier: none

Adds +3 points to attributes distributed anyway the player likes. Cannot increase attributes beyond racial max (18 for humans). This talent may be taken multiple times.

Medical

Modifier: Intelligence

Character is able to perform basic medical tasks (setting broken bones, stabilizing bleeding, etc.). A successful roll:

- ◆ Stabilizes character at 0 or fewer hit points from losing more hp. See “death’s door” in the Attrition Attacks section (q.v.).
- ◆ Return 1d2 hit points that were suffered within 10 minutes of applying the talent
- ◆ Cure normal, non-magical diseases (recover in 1d6 days).
- ◆ Allows a poisoned individual a second saving throw. For fast-acting poisons this must be done within 3 rounds. For slower poisons it can be performed anytime before death. In both cases the subject will recover (with a successful save) in 10-60 minutes.

The talent is not cumulative, ie. multiple characters with it cannot apply it at once to return multiple hit points or give more than one saving throw.

Action	DC
Stabilize dying character	10
Treat common disease	10
Treat rare disease	15
Treat poison	15

Riding

Modifier: Dexterity

The character is particularly skilled at riding and may mount their steed as an instant action and perform actions like archery or spell casting whilst riding without penalty. The riding talent may also be used to avoid being thrown or dislodged from a mount. Finally, it may be used to exhort a steed to faster than normal speeds for short periods. Riding usually refers to horses but any number of other creatures could be substituted. It is assumed that a rider trained in one sort of steed can quickly adjust to any other given reasonable time.

Stronghold

Modifier: none

Prerequisite: 9th level or higher

This talent may only be taken by characters of 9th level or higher. The character may establish a stronghold or organization and will attract followers appropriate to their class. The type of stronghold/organization and followers will vary greatly at the GM's discretion. A knave might start a thieves guild and attract thieves. A priest might build a temple and attract acolytes and a congregation. A fighter might build a fort and attract men at arms. Below are examples with the character's charisma attribute modifying the number of followers.

Followers	Number	Charisma Mod
Men-at-arms	6d6 1st level fighters and 1d3 leaders fighters level 2-5	+/- 1d6
Thieves	4d6 + 3 (levels 1-2)	+/- 1d4
Congregation	6d10 congregants; 2d6 priests (levels 1-2)	+/- 1d10 & 1d6
Magic-User Apprentices	1d6 (levels 1-3)	+/- 1

Survival & Tracking

Modifier: none

Th character is able to live off the land and survive in harsh environments. They can find water and food, build shelters, and avoid being lost in the wild. With a successful roll they can track others and identify creatures by their tracks.

Action	DC
♦ Track an individual across soft ground (mud, sand, snow, etc.)	5
♦ Identify Common animals or plants	10
♦ Provide food & water for up to 6 persons in hospitable lands (i.e. lush forest)	
♦ Avoid natural hazards such as quicksand	15
♦ Identify creature by tracks	
♦ Identify exotic animals or plants	
♦ Predict weather for next 24 hours	
♦ Provide food & water for up to 6 persons in inhospitable lands (.i.e. barren mountain)	
♦ Track an individual across normal outdoor ground	20
♦ Identify details by tracks (i.e. person was carrying a heavy load or walking with a limp).	
♦ Provide food & water for up to 6 persons in desolate lands (i.e dune desert)	
♦ Track an individual across hard ground (stone, wood, etc.)	25

Tracking Modifiers	
Each full day since creature passed +3	+3
Each hour of heavy rain or snow since creature passed +5	+5
Track giant creature -5	-5
Track small group -5	-5
Track large group -10	-10

♠ Fighter Talents

Berserk

Modifier: none

Once per encounter, and with a successful talent roll (DC 10), a character can enter a single-minded, enraged state which affords them:

- ♦ +2 to hit and damage with melee weapons
- ♦ +2 to all saving throws
- ♦ +3 (+2 for *adjacent*, +1 for *opposing*) to any Strength-modified Challenge rolls

While in this state they're unable to take any actions except movement and melee attacks. They will unceasingly attack targets until the berserk state ends - first opponents and then comrades!

A character may end their berserk by making a DC 10 Wisdom challenge roll or having complete solitude for 2d6 minutes. Comrades may assist in this by making a successful DC 10 Charisma challenge roll to implore the berserker to stop. If successful, the berserk character may make an additional DC 5 Wisdom challenge roll to end the berserk.

Blind fighting

Modifier: Wisdom

With a successful talent roll (DC 10) a character can fight normally in complete darkness, while blinded, or against invisible opponents. Blind fighting must be rolled each round.

Bravery

Modifier: none

The character is battle hardened and receives +4 (+3 for *adjacent*, +2 for *opposing*) on all fear or morale checks in battle. Additionally, a successful roll (DC 10) grants nearby comrades the same bonus for the duration of a combat session. The character makes all saving throws against fear-based attacks with *advantage*.

Combat

Modifier: Strength for melee, Dexterity for ranged attacks

With a successful talent roll character hits a target in combat. For melee attacks, the character's Strength modifier is added to to-hit and to damage rolls. For ranged attacks, the character Dexterity modifier is added to to-hit roll. In both cases the target's armor class (AC) is the difficulty class (DC) to succeed.

Combat Specialization

Modifier: none

The character gains a +3 (+2 for *adjacent classes*, +1 for *opposing*) on combat rolls with either a single type of weapon, against a narrow class of opponents, or in a specific terrain. Does not change after being chosen.

Durability

Modifier: none

The character is unusually tough.

- ♦ All hit dice rolls are made with *advantage*
- ♦ The durability talent level is added to their hit points.

The advantage on hit dice rolls only counts going forward after the talent is chosen. It is not retroactive.

Multi-Attack

Modifier: none

The character may make multiple attacks per round. The number of attacks depends on the character's level with the talent:

- ♦ 1st level = Deathstrike - the character gains an extra melee attack whenever they strike a killing blow with a melee weapon.
- ♦ 6th level = 3 attacks every 2 rounds (3/2). The character makes an extra attack every other round (1 on odd rounds, 2 on even)
- ♦ 12th level = 2 attacks per round (2/1)

Missile Deflection

Modifier: Dexterity

With a successful talent roll (DC 15) character can dodge or deflect low-velocity missiles directed at them. This includes arrows, spears, etc., but not firearms, spells, energy rays, or the like. Multiple missiles may be deflected in a round (each with a separate roll) but for each one beyond the first there is a -2 cumulative modifier to the roll.

◆ Priest Talents

Bestow Blessing

Modifier: Wisdom

The character may bestow a blessing that will allow a single subject a bonus on any one roll of the subject's choice.

- ◆ The subject must be clearly visible to the character.
- ◆ The bonus must be used within 1 hour of the blessing
- ◆ The bonus is equal to the character's wisdom bonus plus 1d6 (*1d4 for adjacent, 1d2 for opposing*).

If the bonus is applied to an action directly contrary to the character's religion it has no effect and is wasted. This ability may be used once per day per level with the talent.

Thaumaturgy

Modifier: Wisdom

Characters can cast divinely-granted spells. Characters with a 13 or greater Wisdom begin with one additional 1st-level spell slot. See the Magic section for details (q.v.).

Divine Attunement

Modifier: none

The character is particularly attuned with their deity's elemental or sphere of influence. The exact element/sphere must be narrowly specified when this talent is taken and does not change. The character gains:

- ◆ +3 to reaction rolls on creatures directly associated with the element/sphere (+2 for adjacent, +1 for opposing)
- ◆ With a successful talent roll (**DC 10**) non-magical or low-level instances of the element/sphere will not affect or hinder the character.
- ◆ Against a magical or extreme instance of the element/sphere the character gains a +4 (*+2 for adjacent, +1 for opposing*) bonus to all saving throws and any damage is reduced by 1 point per die rolled (minimum 1 point per die).

Examples of Common Elements/Spheres:

- ◆ **Fire:** +3 reaction from fire elementals; immunity to low-level fires (can walk across a bed of coals); +2 on saves and reduced damage vs fireballs or very intense fires.

- ♦ **Water:** +3 reaction from mermaids, tritons, etc.; able to swim easily in very rough storms; +2 saves and reduced damage vs water-based attacks.
- ♦ **Air:** +3 reaction from air elementals; may walk through strong winds without being buffeted; +2 on saves and reduced damage vs wind or lightning-based attacks or very intense winds such as tornadoes.
- ♦ **Earth:** +3 reaction from earth elementals; able to move through very craggy mountains at normal speed; +2 on saves and reduced damage vs earth-based attacks, cave-ins, landslides, etc
- ♦ **Spiders:** +3 reaction from all arachnids; able to walk through non-magical webbing without being entangled; +2 on saves and reduced damage vs spider-based poisons or web effects.
- ♦ **Ice:** +3 reaction from cold-inhabiting creatures (polar bears, yetis, etc.); able to stay in sub-zero temperatures without harm; +2 save and damage reduction vs cold-based attacks.
- ♦ **Darkness:** +3 reaction from darkness-based creatures (shadows, shades, etc.); *Darksight* for 30'; +2 save and damage reduction vs darkness-based attacks or effects.
- ♦ **Death:** +3 reaction from all undead; +2 save and damage reduction vs death-magic attacks or special attacks from undead.
- ♦ **Woodlands:** +3 reactions from magical woodland creatures (dryads, satyrs, etc.); able to walk through thick briars without being slowed or pricked; +2 on saves and reduced damage vs the charms or other special attacks of magical woodland creatures.

Divine Shapeshift

The character may assume the form of a creature or creatures closely associated with their religion. This ability functions exactly as a *Fauna Form* spell but requires no casting to effect. The type of creature(s) the character can transform into must be carefully defined when the talent is chosen, must align with their religion, and never changes. Many religions have no close association with a specific creature making this talent unsuitable for their adherents. This ability can be used once per day for every three levels with the talent.

Holy Aura

Modifier: None

The character radiates a continuous magical effect identical to the *Aura of Protection* spell.

Incorruptibility

Modifier: None

The character's religious devotion has sanctified their body rendering it less susceptible to disease and poison. Against such attacks they receive a +5 bonus (+3

for adjacent aspects, +2 for opposing). Furthermore, the bodies of dead incorruptibles decompose at 1/10th the normal rate and will be avoided and not eaten by all non-magical, non-intelligent animals.

Psychic Sensitivity

Modifier: Wisdom

With a minute of uninterrupted, calm concentration and successful roll a character can determine the presence of aggrieved spirits or particularly strong psyching vibrations left in an area. They are also able to determine if an individual is under the influence of spirits, demons, or a mind-affection spell. All results will be vague and cryptic but a very good roll might be more substantive. More specifics can be known with an additional 1d6 days of study of the subject. The typical roll is DC 15 but can be adjusted for stronger or weaker impressions.

Scholarly Knowledge

Modifier: Intelligence

The character is well educated in mathematics, natural sciences, law, art, and other such matters. They are able to speak and write with eloquence and may choose three additional languages to know. They will be competent as lawyers or jurists and well-versed in the protocols of courts. With proper time, equipment, and a successful talent roll (usually DC 15, but varies greatly) they may perform such feats as:

- ◆ Translating an unknown language
- ◆ Determining if a substance is poisonous
- ◆ Determining if coinage or jewelry are fakes
- ◆ Identifying the composition of a non-magical substance
- ◆ Identifying non-magical plants and creatures
- ◆ Making general meteorological predictions
- ◆ Performing detailed research at libraries, court houses, etc.

Sermonize

Modifier: Charisma

Once per day the character is able to deliver a powerful religious sermon able to stir subjects towards action. The sermonizer is able to affect up to 3 hit dice worth of creatures for every level they have with the talent and may target specific subjects or groups. For this talent to work:

- ◆ Subjects must be within 120' of the sermonizer, and able to clearly see, hear, and understand him or her.
- ◆ The sermon must be delivered for at least 10 minutes without interruption of combat or great commotion.
- ◆ The action suggested in the sermon must not be contrary to the goals

of the sermonizer's religion.

The sermon affects subjects exactly the same as the spell *Suggestion*. Subjects may make saving throw modified by their affinity with the sermonizer's religion:

- ♦ Follower of religion or magical creatures aligned to the religion's sphere (i.e. an earth elemental listening to a sermon by a earth-god priest) = Save with *disadvantage*.
- ♦ Follower of opposing religion or magical creatures diametrically opposed to the religion's sphere (i.e. a water elemental listening to a sermon by a fire-god priest) = Save with *advantage*.

Turn Undeath

Modifier: Wisdom

Character may presenting their holy symbol in a fervent expression of faith and repel (and possibly destroy or dominate) undead and infernal creatures (demons, devils, etc.). Turn Undeath:

- ◆ Takes 1 action to perform in combat (see Combat, q.v.)
- ◆ Requires the target creature(s) to be within eyesight and 120' of character
- ◆ Can be applied to groups of dissimilar monsters *en masse* by having the character make a single roll and then applying it to each.

To use this talent, have the character roll a d20 and consult the chart below. Round undead hit dice UP so a 8+1HD monster is turned as a 9HD one.

User Talent Level	Undeath Monster Hit Dice (round up)											
	1	2	3	4	5	6	7	8	9	10	11	12+
1	13	16	19	20	-	-	-	-	-	-	-	-
2	10	13	16	19	20	-	-	-	-	-	-	-
3	7	10	13	16	19	20	-	-	-	-	-	-
4	4	7	10	13	16	19	20	-	-	-	-	-
5	T	4	7	10	13	16	19	20	-	-	-	-
6	T	T	4	7	10	13	16	19	20	-	-	-
7	D	T	T	4	7	10	13	16	19	20	-	-
8	D	D	T	T	4	7	10	13	16	19	20	-
9	D	D	D	T	T	4	7	10	13	16	19	20
10	D	D	D	D	T	T	4	7	10	13	16	19
11	D	D	D	D	D	T	T	4	7	10	13	16
12+	D	D	D	D	D	D	T	T	4	7	10	13

- ◆ T = Turn or Trusted - creature is automatically turned if talent user is good or trusted if user is evil.
- ◆ D = Destroyed or Dominated - creature is automatically destroyed if talent user is good or dominated if user is evil.

Turned undead will flee in terror from the character at maximum speed for at least 1 minute or until out of sight and not approach again for at least 1 hour. It may still fight back if cornered. Intelligent undead may, of course, still find ways to hector the character from afar.

Trusted undead will follow the talent user's mental commands for 1 hour per the users' level with *Turn Undead*. Intelligent undead will act as if they're under a *Charm Person* spell (q.v.) and mindless undead following all orders without question.

Destroyed undead will instantly turn to dust.

Dominated undead will be under the complete mental control of the talent user for 1 hour per the users' level with *Turn Undead*.

♣ Magic-User Talents

Arcane Knowledge

Modifier: Intelligence

With a successful roll character can: decipher mystical writings; glean insights into magical creatures and effects; or recall ancient, arcane lore. This talent is also a prerequisite for any mage attempting to do magical research, or create magical potions, constructs, items, and scrolls. Mildly esoteric knowledge had a DC15 with more obscure information increasing the DC accordingly.

Arcane Sensitivity

Modifier: Wisdom

With a minute of uninterrupted, calm concentration and successful roll a character can determine if an object, person, or place has been enchanted. All results will be vague and cryptic but a very good roll might be more substantive. More specifics can be known with an additional 1d6 days of study of the subject and a second successful roll. The typical roll is DC 15 but can be adjusted higher or lower for stronger or weaker impressions.

Battle Casting

Modifier: None

Prerequisite: Wizardry 1

A character must have the Wizardry 1 to choose this talent. The character may wear heavy armor and may cast Wizardry Spells whilst wearing it or heavily encumbered. He or she still may not cast spells with somatic components when bound or restrained. The character may also use all weapons (swords, lances, etc.).

Spell Refashionment

Modifier: Intelligence

A character must have Wizardry to take this talent. With a successful roll character can change parameters of a spell on-the-fly. For example, a spell's range could be halved but it's area of effect doubled. All changes must be approved by the GM and should generally involve trading off one benefit for another. Radical shifting of a dweomer effect such as turning a cold spell into a fire spell will greatly increase the DC roll. If the refashioning roll fails, the spell fizzles without result. On a significant failure the GM may have the spell function with contrary or calamitous results for the caster.

Action	DC
Cosmetic Change - (i.e. the color of a fireball)	5
Change - (double range and half area of effect; increase casting time and double duration, etc.)	15
Major Change - (i.e. fire spell to cold spell; Wall of Ice to Wall of Mud, etc.)	20

Stealth Casting

Modifier: Dexterity

Prerequisite: Thaumaturgy or Wizardry

A character must have Wizardry or Thaumaturgy to choose this talent. With this talent a character may secretly cast a spell without onlookers realizing they are doing so. This is handled as a contested challenge roll of the character's Stealth Casting vs the onlooker's perception (see Actions & Dice Rolls, q.v.)

Wizardry 1

Modifier: Intelligence

Characters can cast wizardry spells of any one school type (Blue, Black, Green, Red, or White). This type must be chosen when the talent is taken and does not change. Characters with a 13 or greater Intelligence begin with one additional 1st-level spell slot. See the magic section for details (q.v.).

Wizardry 2

Modifier: Intelligence

Prerequisite: Wizardry 1

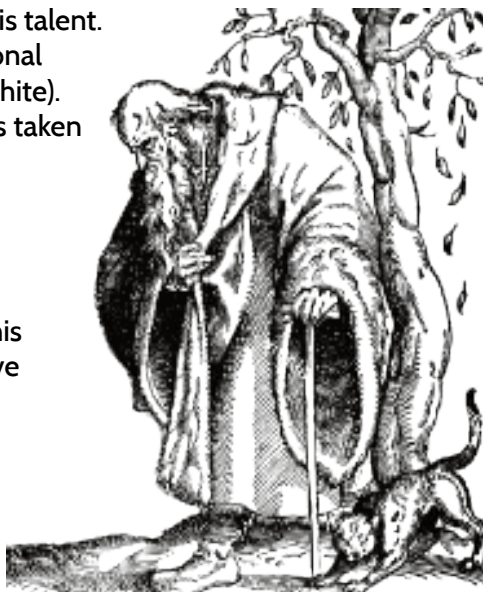

A character must have Wizardry 1 to take this talent. The character may cast spells of one additional school type (Blue, Black, Green, Red, and White). This type must be chosen when the talent is taken and does not change.

Wizardry 3

Modifier: Intelligence

Prerequisite: Wizardry 2

A character must have Wizardry 2 to take this talent. The character can cast spells of all five

♥ Knave Talents

Acrobatics

Modifier: Dexterity

The character can perform long jumps, flips, tumbling, tight rope walking, pole vaulting, and other similar feats. A talent roll must be made to perform these feats in combat or adverse conditions. A character may avert being knocked prone or rise from a prone position instantly (zero movement) with a successful roll (DC 5). The talent may also be used to lessen falling damage with a successful roll at -1 for every 10 feet they fall. If successful, they reduce their falling damage by 4d6 (2d6 for adjacent, 1d6 for opposing).

Action	DC
Simple tumbling	5
Basic flips or complex rolls	15
Walk across balance beam	15
Pole vault over 10' wall	20
Tightrope walking, flip over top of creature of the same height	25
Tightrope walking in high winds	30

Assassination

Modifier: Intelligence

The character may kill nonsignificant NPCs with a successful roll. Assassination performed again significant NPCs or player characters **MUST** always be played out thru a normal scenario (though a successful assassination roll may give the assailant some advantage at the GM's discretion). Assassination requires proximity to the victim (as close as the same town), knowledge of the victim's location, and 1d6 days (each day cut short increases the DC by 2). A failed attempt may indicate that some significant clue as to the attacker's identity has been left behind. A natural 1 roll indicates the assassin has been trapped and must fight their way out of the attempt.

Action	DC
Kill easy target (bum asleep in gutter at night)	10
Kill average target (shopkeeper, peasant)	15
Kill hard target (minor noble)	25
Kill very hard target (important, well guarded noble)	30
Kill exceptionally hard target (king, emperor ,etc.)	35

Backstabbing

Modifier: none

Character gains +4 to attack (+2 for *adjacent*, +1 for *opposing*) and a damage multiplier when making a successful hand-to-hand attack on an unaware opponent. Despite its name the attack need not come from the rear, nor is it limited to piercing weapons. Any successful non-ranged attack made on an opponent who doesn't see it coming will suffice. The size of the multiplier is determined by the character's level with the talent.

- ◆ 1-4 level = x2 Damage
- ◆ 5-8 level = x3 Damage
- ◆ 9-12 level = x4 Damage

Beguilement

Modifier: Charisma

By giving a performance a character can fascinate, charm, and make suggestions to nearby subjects. Musical performance is the most common application of this talent, but it could be dance, oration, storytelling, puppetry, or more. The form needs to be specified when the talent is chosen and does not change. This ability does not function in combat or while a great commotion is occurring nearby. Subjects must be able to clearly see and hear the performance for it to have any effect. Beguilement:

- ◆ Affects subjects in a 120' radius of the user.
- ◆ Affects up to 2 hit dice of creatures per users' level with the talent.
- ◆ May be targeted at specific subjects or groups (only children, only rats, only Tioc the Terrible, etc.)

A character's level with the talent determines the effects they may have on subjects:

- ◆ 1st level = Hypnotic Performance
- ◆ 2nd level = Charm Person
- ◆ 4th level = Charm Animals
- ◆ 5th level = Suggestion
- ◆ 7th level = Charm Monsters

Hypnotic Performance

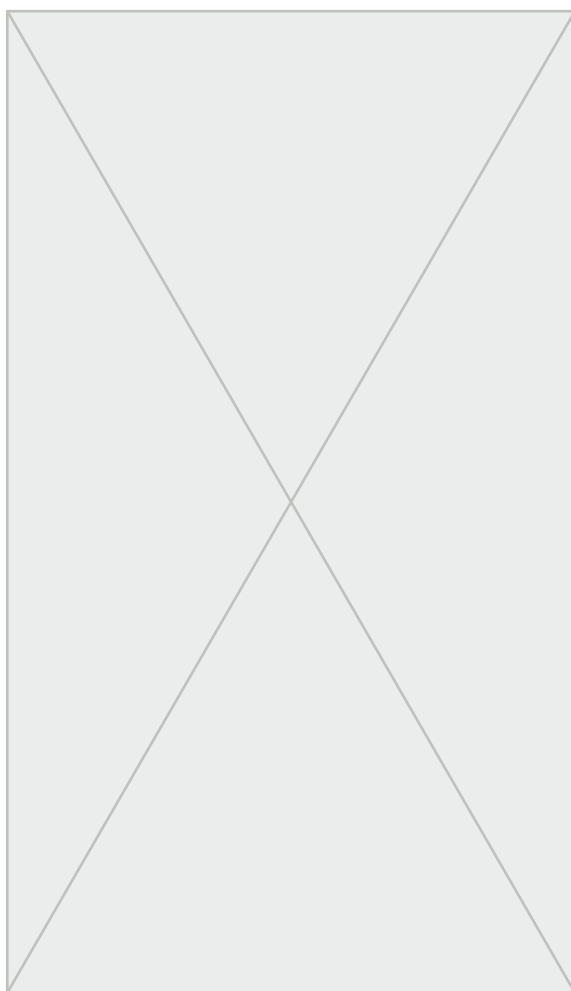

With a successful talent role (DC 10) a user may fascinate subjects such that they pay full attention to the user's performance. Fascinated viewers will follow the performer wherever they go and ignore all else as long as the performance continues. Subjects are allowed a saving throw to avoid this effect. The fascination effect is broken by the performance ending, violence, or loud distractions.

Charm

Subjects under the fascination effect for 10 minutes or more can then be subjected to a charm effect from the performer that functions exactly like the spell Charm Person (or Animal/ Monster as is applicable) and persists after the user's performance ends for 1 turn per the user's level with the talent. Subjects are allowed another saving throw to avoid this effect.

Suggestion

Subjects who are under the fascination effect for 5 minutes or more can then be subjected to a *Suggestion* spell (q.v) from the performer. Subjects are allowed a second saving throw to avoid the suggestion effect.

Inspiration

Modifier: Charisma

The character may perform music or oration that has inspirational effects on subjects nearby (within 120'). For this talent to work the subjects must be able to clearly hear and see the user. Characters gain additional effects as their talent level increases:

- ◆ 1st level = Counter Charm
- ◆ 2nd level = Inspiration
- ◆ 5th level = Exhortation
- ◆ 12th level = Remove Charm

Counter Charm

The character's music negates the effect of any music-based charm or fear effects (such as the Beguilement talent, song of sirens, drums of fear, etc.) within the radius of effect. Any characters already under the influence of such effects when the counter charm starts are allowed another saving throw with Advantage to resist. This ability has no limit on usage.

Inspiration

The character may inspire greatness that will allow a single subject a bonus on any one roll of the subject's choice. The bonus to a roll must be made within 5 minutes of the performance and is equal to 1d4 + the performer's Charisma bonus. This ability may be used once per day per talent level.

Exhortation

With a successful talent roll (DC 10) the character may inspire all allies within range to make rolls for morale or against fear-based effects or spells with *advantage*. Allies already under the influence of fear-based effects are immediately allowed another saving throw with *advantage* to resist. This ability has no limit on usage.

Remove Charm

The character may give a performance to remove charms and mind effects on a subject. The subject is allowed new saving throws at +4 to negate each effect afflicting them. Powerful mind effects which do not allow a saving throw cannot be removed by this ability. This ability may only be used once per day, cannot be used in combat or during a large commotion.

Burglary

Modifier: Dexterity

With a successful roll a character can open locks and detect/defeat alarms and traps. For detecting alarms & traps the character must specifically state they are taking time to search for them.

Action	DC
Find/disarm simple trap (crude pit covered with brush), pick simple lock	15
Find/disarm average dungeon trap, Pick average lock	20
find/disarm exceptional trap, Pick exceptional lock	25
Open complicated safe	35

Climbing

Modifier: Dexterity

The character is adept at scaling walls, cliffs, trees, etc. at a slow pace. A roll must be made to perform climbing in combat or adverse conditions (with the DC determined by the GM). A failure of 5 or more indicates the character has fallen from the halfway point.

Action	DC
Climb knotted rope, tree with low branches	5
Climb regular rope	10
Climb craggy wall	15
Climb typical dungeon wall or tree with no branches	20
Climb sheer wall or dungeon wall overhang	25
Climb greased pole	30

Disguise

Modifier: Charisma

With a successful roll a character can disguise themselves. The more radically they change the way they look the more difficult the disguise roll should be. Attempts to successfully impersonate a person well known to those viewing the character will prove to be exceedingly difficult, if not impossible! A natural 1 roll indicates the character thinks they are disguised but are, in fact, obviously misrepresenting their appearance to all who view them. Characters in disguise will often present themselves in dark, misty, or distracting environments when viewers will have natural penalties to their perception rolls.

Action	Mod
Disguise minor details	+5
Disguise age +/- 10 years	+3
Disguise gender	+3
Disguise race	+3

Viewer Familiarity	Mod
Recognizes	+4
Casual friend or associate	+6
Close friend	+10
Intimate	+15

Escapology

Modifier: Dexterity or Intelligence as fitting the situation

With a successful roll character can escape shackles, ropes, and bindings as well as devise methods of escaping prisons, cages, dungeons, etc. Escapology may be used for specific events like escaping a pair of manacles or, with the GM's approval, whole scenarios such as escaping a prison with a single successful roll.

Action	DC
Escape ropes or chains	18
Escape manacles, net, entangle spell	25
Escape simple jail	20
Escape well-guarded dungeon	30

Frauð

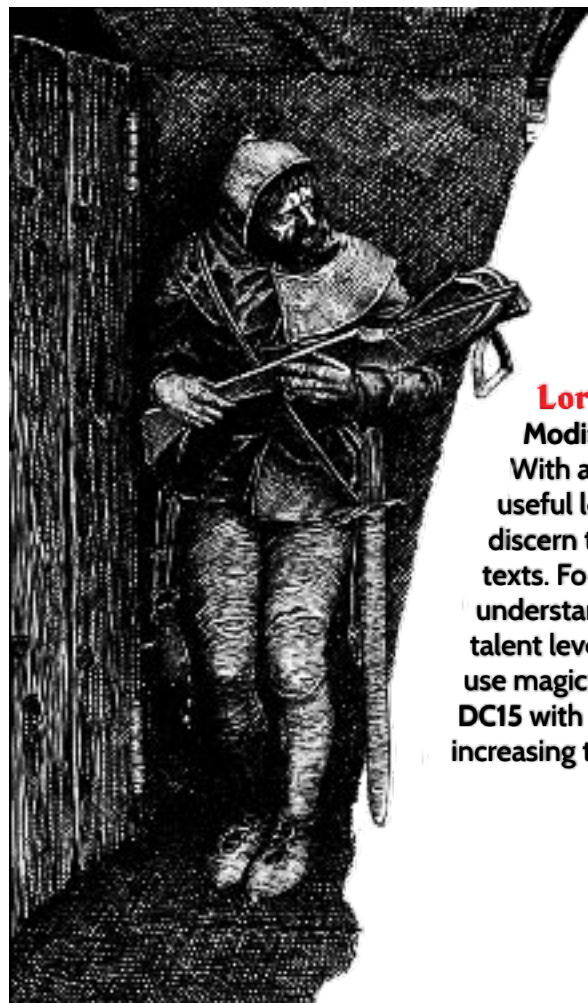

Modifier: Intelligence or Charisma as is fitting

The character is adept at corruption and graft. With a successful roll they can accomplish such feats as:

- ◆ Forging official documents, works of art, etc.
- ◆ Fencing items, find items that are being fenced, locating where to buy black-market items
- ◆ Bribing/ blackmailing officials for information, favors, etc.
- ◆ Making underworld contacts.

Action	DC
◆ Bribe/blackmail lowly guard/official	15
◆ Contact/get info on lowly criminals	
◆ Find fence for common loot	
◆ Forge handwritten note	
◆ Bribe/blackmail well-placed guard/official	20
◆ Contact/get info on important criminals	
◆ Find fence for rare/expensive loot	
◆ Forge long document (manuscript)	
◆ Forge Simple work of art (pottery)	
◆ Bribe/blackmail high official	25
◆ Contact/get info on guild masters / master criminals	
◆ Find fence for unique/famous loot	
◆ Forge Complex work of art (paintings, sculptures)	
◆ Forge Official document (king's seal)	
◆ Forge a masterpiece work of art	30

Lore & Read Languages

Modifier: Intelligence

With a successful roll character can recall useful lore and legends on topics, or discern the approximate meaning of written texts. For magical texts they will be able to understand the basic nature of text. At a talent level of 7 or higher they may read and use magical scrolls. Mildly esoteric lore had a DC15 with more obscure information increasing the DC accordingly.

Sleight of Hand

Modifier: Dexterity

With a successful roll character can: surreptitiously purloin (or place) small objects from (or onto) others; secretly palm items; draw weapons unnoticed; or perform minor prestidigitation feats. Sleight of hand is always handled as a contested Challenge rolls versus the Perception attribute of observers. If both rolls (Sleight of hand and Perception) are unsuccessful then the character succeeds with Sleight of hand.

Action	DC
Surreptitiously draw small weapon	10
Palm small object	10
Pick someone's pocket	20
Surreptitiously place small object on someone	20

Stealth

Modifier: Dexterity

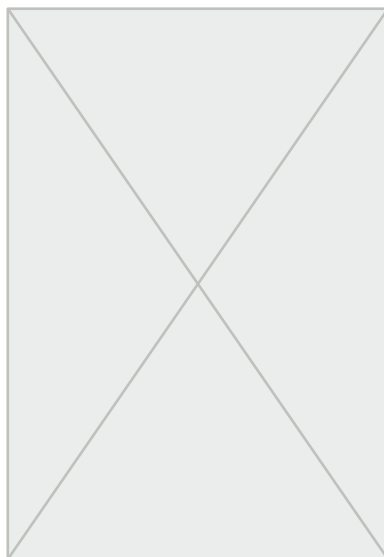

The character can move quietly, conceal themselves, or shadow others. Stealth is always handled as a contest challenge roll versus the Perception attribute of observers. If both rolls (Stealth and Perception) are unsuccessful then the character succeeds with Stealth.

Disadvantages (Optional)

Disadvantages are limitations that restrict a character during the game. They are optional and must be chosen when the character is created. Characters may take up to two disadvantages and for each one taken they gain one additional Talent. Each disadvantage may only be taken once.

List of Disadvantages

1. Disfigured
2. Lame
3. Lowered Attribute(s)
4. Missing an Arm or Hand
5. Uneducated
6. Vow of Chivalry
7. Vow of Modesty
8. Vow of Nature
9. Weak Ears
10. Weak Eyes
11. Other (GM's prerogative)

Disfigured

The character is noticeably disfigured and will suffer a -3 to all reaction rolls. Furthermore, they will be easily known, recognized, and remembered by their disfigurement.

Lame

The character is disabled and suffers -5' on their movement rate, and *disadvantage* on rolls where one's legs are important (jumping, climbing, etc.). Certain acts, like tightrope walking, will be impossible for them.

Lowered Attribute(s)

The character can reduce three points from their attributes. This can be all from one attribute or spread across several. No attribute may be reduced below 3 or a racial minimum.

Missing Arm or Hand

The character is unable to use two handed weapons and suffers disadvantage on rolls for actions that would require two hands (like climbing).

Uneducated

The character is uneducated and uncultured. He or she can not read or write, and has only the most rudimentary grasp of science, culture, history, art, etc. He or she suffers -3 to all reaction or Charisma attribute rolls in settings where education and refinement are important (in a king's court, at formal ball, addressing a powerful wizard, etc.).

The character will be impressed by commonplace objects (like clocks) and the GM may require he or she make a wisdom roll to understand them. Finally, the character will be easily deceived by more educated characters making false claims on learned topics.

Vow of Chivalry

The character must adhere to a strict code of honor and chivalry. Specifically, they:

- ◆ Never lie, cheat, or go back on their word.
- ◆ Must always engage in fair play, especially in personal combat. This means avoiding ranged or surprise attacks, or leveraging any situation that would unfairly advantage them against their foes.
- ◆ Must always and everywhere be true to the ideals of the overarching cause they serve (the cause of good, evil, a crusade, etc.)

Vow of Modesty

The character must live simply and without excessive attachment to worldly possessions. They may only retain items they can personally use and carry, and only keep enough wealth for basic living. All else must be donated to worthy causes (not other player characters or their henchmen).

Vow of Nature

The character is pledged to live in accordance with and defend the natural order. Specifically, they:

- ◆ May never live for long periods in non-natural settings
- ◆ May never wear metal armor or carry large amounts of metal
- ◆ May never cause destruction of natural elements or creatures beyond their modest needs (such as killing for sustenance).
- ◆ Have an imperfect obligation to balance, protect, and preserve nature and animals (including humans).

Weak Ears

The character has poor hearing and will suffer *disadvantage* to all perception rolls involving sound. They will also be unable to hear faint sounds or clearly make out conversations in noisy environments without an auditory aid like an ear trumpet.

Weak Eyes

The character has poor vision and will suffer *disadvantage* to all perception rolls involving sight. They will also be unable to read or discern fine details without a visual aid (glasses, monocle, magnifying glass, etc.).

Other

The GM is free to invent or allow other disadvantages but they should adhere to the following principle: They should significantly limit the character but not make them unplayable in the game. For example, color blindness would not limit a character enough to deserve an extra Talent; whereas complete cowardice would render them entirely unsuitable for adventuring.

Excessive Vow of Nature

Alignment

A Each character has an alignment which serves as shorthand for the character's general moral disposition. There are nine:

	Lawful Good	Neutral Good	Chaotic Good	
	Lawful Neutral	True Neutral	Chaotic Neutral	
	Lawful Evil	Neutral Evil	Chaotic Evil	

- ◆ **Good vs Evil** reflect a character's standing on altruism, kindness, and benevolence vs greed, cruelty, and malevolence. Good characters will show strong regard for others and the importance of life while evil ones will be indifferent to either.
- ◆ **Law vs Chaos** reflect a character's value of order, collectivism, and "the right way of doing things" vs freedom, individuality, and "making it up as we go".
- ◆ **True Neutral** characters value the balance of good, evil, law, and chaos such that none overwhelms the others.

Hit Points & Hit Dice

Hit points (HP) are an abstract measure of how hard a character is to kill, reflecting not only their physical resilience but also their luck and skill at avoiding damage. Characters lose HP from taking damage in the game and when reduced to zero they're rendered unconscious and may die. A character's hit points are determined by:

1. Rolling their hit dice
2. Adding any modifiers to each roll (CON bonus, Durability talent, etc.)
3. Adding the results together to get the characters' **total hit points**.

Hit points are tracked as **Total Hit Points** (when a character is undamaged) and **Current Hit Points** (their current state in the game). Current HP fluctuate but total hp never does, and a character's current HP can never be raised above their total HP by healing, rest, etc.

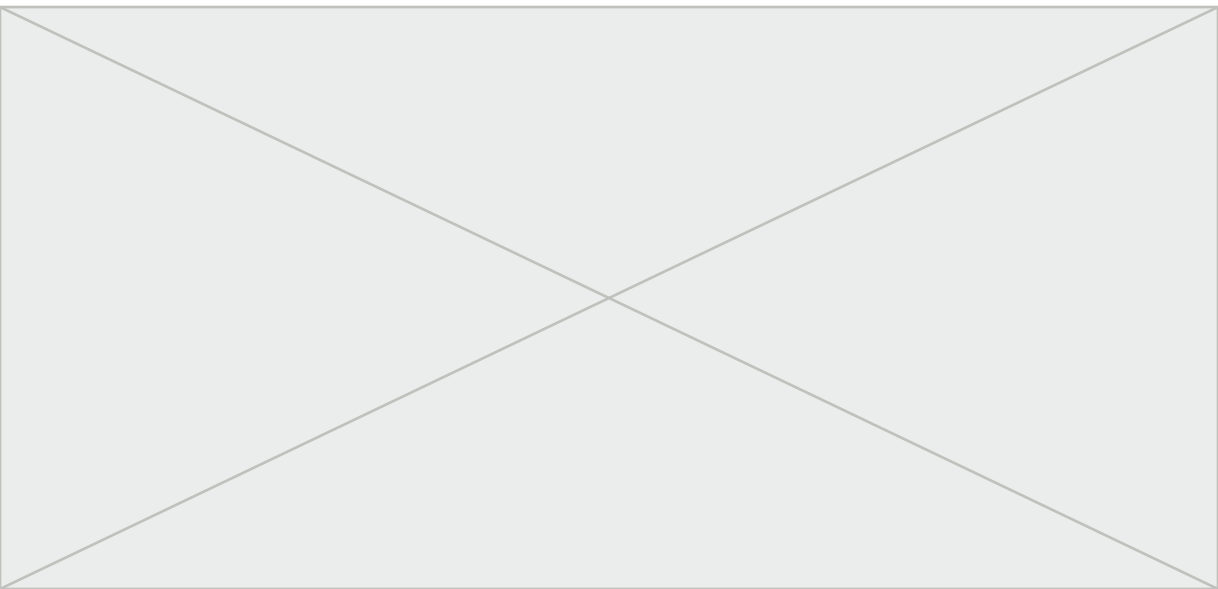

1st level characters get one hit die (of their classes type). As they increase in levels they will roll more hit dice and add the new numbers rolled (and any modifiers) to their total HP.

Tougher Starting Characters (optional)

GMs may allow 1st level characters to re-roll any 1s or 2s rolled for hit points to make the characters more durable.

Hit Dice

Hit dice (HD) are both the **number of**, and **type of** dice rolled to determine a character's hit points. A character's level determines the number (see Levels & Advancement, q.v.) and their class determines the die type (see each class for details, q.v.).

Armor Class

A character's armor class (AC) is an abstract representation of their ability to avoid damage and the number an opponent needs to roll to hit them in combat (see Actions & Dice Rolls, q.v.). It is equal to 10 plus any modifiers such as:

- ♦ Dexterity modifier
- ♦ Armor (see Equipment, q.v.)
- ♦ Magical items

GMs should adjust modifiers to suit situations in the game (i.e. character taken by surprise will not get any bonus from Dexterity).

Experience & Level Advancement

All classes advance in levels at the same rate and gain extra hit dice, improved rolls, and extra talents as detailed below.

Experience & Level Table

Level	Adjacent Level	Opposing Level	Save Bonus	Extra Talent Slots	Hit Dice	XP	AP
0	0	0	0	-	1d4HP	0	0
1	0	0	0	+1	1	0	0
2	1	0	0	-	2	2,000	1
3	1	0	+1	+1	3	4,000	2
4	2	1	+1	-	4	8,000	3
5	2	1	+1	+1	5	16,000	5
6	3	1	+2	-	6	32,000	7
7	3	1	+2	+1	7	64,000	10
8	4	2	+3	-	8	120,000	13
9	4	2	+3	+1	9	240,000	16
10	5	2	+3	-	9+1	360,000	19
11	5	3	+4	-	9+2	480,000	21
12	6	3	+4	-	9+3	600,000	24
13	6	3	+4	-	9+4	720,000	27

- ♦ **Adjacent Level** - The character's level when using adjacent talents
- ♦ **Opposing Level** - the character's level when using opposing talents
- ♦ **Save Bonus** - the number a character adds to rolls when making saving throws in addition to any other modifiers (racial bonus, magic items, etc.)
- ♦ **Extra Talent Slots** - Levels where a character gains an additional talent slot
- ♦ **Hit Dice** - the total number of hit dice a character will have at each level. See Hit Points & Hit Dice (q.v.).
- ♦ **Experience Points (XP)** - the total number of XP needed to obtain the specific level
- ♦ **Adventure Points (AP)** - the total number of AP needed to obtain

the specific level

Level Advancement

There are two methods for advancing a character's level in the game: Experience and Adventure points. The GM should tell players which they're using at the start of a campaign.

Experience Point (XP) - The traditional system where each character tracks the experience points awarded by the GM at the end of each adventure. The number of experience points gained is calculated by adding up the number of gold pieces a character obtained during the adventure (1gp = 1 XP) and any bonuses awarded by the GM for killing monsters or gaining other treasure. The character advances to the next level when they have gained sufficient points.

Adventure Points (AP) - A simpler system that requires a bit more GM adjudication. Characters who meaningfully participated in an adventure are awarded an adventure point. They advance to the next level when they have gained sufficient points. As adventures can vary wildly in length and risk, GMs must decide when doling out Adventure points makes sense within the context of their campaign. Awarding them too readily will rush the game and rob it of any sense of accomplishment. Awarding them too slowly will make the game drag and feel like it's going nowhere.

Money & Equipment

Starting Wealth & Currency

Characters start with 30-180 (3d6 x 10) of gold pieces. The currency of the land is:

- ♦ 1 platinum piece (pp) = 10 gold pieces (gp)
- ♦ 1 gold piece = 10 silver pieces (sp)
- ♦ 1 silver piece = 10 copper pieces (cp)

Adventuring Gear

Item	Cost
Backpack	3 gp
Bedroll	6 sp
Blanket	3 sp
Block and tackle	3 gp
Candle	1 cp
Case, scroll or map	1 gp
Clothes, common	5 sp
Clothes, courtly	15 gp
Chain (10 ft.)	2 gp
Chalk (1 piece)	1 cp
Chest	5 gp
Chiurgon kit	5 gp
Crowbar	1 gp
Flint and steel	1gp
Grappling hook	2 gp
Hammer	1 gp
Hammer, sledge	2 gp
Holy water (vial)	25 gp
Hunting trap	8 gp
Ladder (10 ft.)	3 gp
Lantern	10 gp
Lock	5 gp
Manacles	7 gp
Mirror, steel	5 gp

Item	Cost
Oil (flask)	1 sp
Parchment (1 sheet)	2cp
Pick, miner's	2 gp
Pole (10-foot)	5 sp
Pouch	5 sp
Quill pen	2 gp
Quiver	1 gp
Rations (1 day)	5 sp
Rope (50 ft.)	1 gp
Rope, silk (50ft)	10gp
Sack (15 lb. capacity)	1 gp
Saddle	17 gp
Saddle bag	2 gp
Shovel	1 gp
Signal whistle	5 sp
Signet ring	5 gp
Spell book	30 gp
Spikes, iron (10)	1 gp
Spyglass	1000 gp
Tent, two-person	2 gp
Thieves' tools	20 gp
Tinderbox	5 sp
Torch	1 sp
Water skin	2 sp

Armor

protects characters by **adding to their armor class** and thus reducing the chance they'll be hit by an attack. The defense armor provides must always make sense (iron plating is useless against an electrical attack) and the GM is free to increase, reduce, or entirely ignore armor as the situation dictates.

Armor is also bulky, encumbering, and can be noisy. The GM may impose the Armor Penalty listed below whenever a character is attempting to do something that would be difficult in armor (climbing, moving silently, performing acrobatics, swimming etc.).

Armor Table

Armor Type	AC Modifier	Armor Penalty	Cost
NONE: plain clothing	-	-	-
VERY LIGHT: Leather, padded	+2	-	5 gp
LIGHT: Ring mail, studded leather, <i>Cuir-bouilli</i>	+3	-2	18 gp
MEDIUM: Scale or chain mail, Brigandine	+5	-3	40 gp
HEAVY: Splint, banded, or plate mail, Horse barding	+6	-5	100 gp
VERY HEAVY: full plate mail	+8	-7	400 gp
Shield, small	+1	-	10 gp
Shield, large	+2	-	20 gp

Shields

Shields do not have an armor penalty but preclude the use of two-handed weapons and any activity requiring the use of both hands (climbing, spell casting, et. al.).

Weapons

Weapon	Damage	Range	Reload	Cost	Notes
Axe, battle	1d8	-	-	5 gp	two-handed
Axe, hand	1d4	10'	-	1 gp	
Blowgun	1pt	15'	1	12 gp	
Bow, long	1d8	90'	-	40 gp	two-handed
Bow, short	1d6	75'	-	27 gp	two-handed
Sling	1d4	90'	-	1 gp	
Club	1d4	-	-	-	
Crossbow, hand	1d4	30'	1	20 gp	
Crossbow, heavy	1d8	75'	1	27 gp	two-handed
Crossbow, light	1d6	60'	1	16 gp	
Dagger	1d4	10'	-	3 gp	
Dart	1d2	10'	-	5 sp	
Flail, footman's	1d8	-	-	8 gp	
Flail, horseman's	1d6	-	-	5 gp	
Hammer, light	1d4	-	-	1 gp	
Hammer, war	1d6	10'	-	8 gp	
Knife	1d3	10'	-	1 gp	
Lance	1d12	-	-	8 gp	Mounted charge does double damage
Mace, footman's	1d8	-	-	5 gp	
Mace, horseman's	1d6	-	-	3 gp	
Maul, great	1d10	-	-	5 gp	two-handed
Morning Star	1d6	-	-	5 gp	
Pick, heavy	1d8	-	-	3 gp	two-handed
Pick, light	1d6	-	-	1 gp	
Pole Arm	1d10	-	-	7 gp	two-handed
Quarterstaff	1d6	-	-	1 gp	two-handed
Scimitar	1d8	-	-	11 gp	
Sword, bastard	1d8	-	-	20 gp	If used 1-handed. Otherwise use Sword, two-handed stats
Sword, long	1d8	-	-	10 gp	
Sword, short	1d6	-	-	7 gp	
Sword, two-handed	1d10	-	-	12 gp	two-handed
Trident	1d6	15'	-	7 gp	
Whip	1d2	10'	-	3 gp	May make grab, no medium or long range

Damage - The number of hit points of damage the weapon will cause to a target with a successful hit. See Combat section (q.v.).

Range - The short, no penalty range of the weapon. Weapon may be used at medium range (twice listed range) at -2, and long range (thrice listed range) at -5.

Reload - The number of actions (see Combat, q.v.) required to reload a weapon after it has been discharged.

Actions & Dice Rolls

Characters attempting something automatic (walking down a street) or impossible (reading a language they don't know) require no dice rolls. The GM merely declares those actions as successes or failures. For all uncertainties in between outcomes are determined by rolling dice.

General Dice Rolling Rules

Modifiers

Modifiers are anything that adjusts the number rolled on a die. If a character rolls a d20 to attack with a sword and then adds +2 for their high Strength attribute the +2 is the modifier. Modifiers stem from character's level, attributes, talents, and more. Only one attribute modifier may be applied to any roll. For most talents the attribute is listed in the talent description but often GMs will have to use their best judgement.

Advantage & Disadvantage

Rolling a die with advantage or disadvantage means rolling it twice and taking the best result for advantage and the worst for disadvantage. It's an easy way to simulate a situation where a character clearly has the upper or lower hand such as attacks on fleeing opponents, special luck abilities, etc.

- ♦ Advantage and disadvantage don't stack. A roll can't be made with "double advantage"
- ♦ A roll with both advantage and disadvantage is just, normal...
- ♦ An initial roll with advantage / disadvantage does not affect subsequent rolls (if you roll to hit with advantage you don't then roll for damage also with advantage).

Group vs Individual rolls

A GM may use a single roll to be used for an entire group instead of rolling for each individual. A group's die roll is based on its most favorable member. This is most often used for perception, initiative, morale, and reaction rolls. Another option is a hybrid method with players rolling individually and NPCs rolling *en masse*.

Re-rolls

For most situations re-rolls are only allowed once the situation has significantly changed. For example, once a character fails to pick a particular lock they can't try again till they gain a level, gain new insight into the lock's mechanism, etc. In select situations, like battering down a door, the GM may allow re-rolls until the character succeeds.

Challenge Rolls

are the game's main mechanic and are used to determine if a character succeeds or fails at a particular action. This includes: using a talent; making a saving throw; attacking in combat; and more. Here's how they work:

1. The GM assigns the action a **Difficulty Class(DC)** based on how hard it should be to accomplish. If one character is attacking another then the defender's **Armor Class (AC)** IS the DC (AC is the same as DC, just with a different name).
2. The player taking the action rolls a d20
3. The Player adds in any **modifiers** to the roll
4. If the total is equal to higher than the DC they succeed. If it's lower, they fail.

Difficulty Class (DC)

Difficulty classes are the number a character needs to score, with modifiers, on a d20 to succeed at a challenge. One key tip for using Difficulty Classes is this:

- ◆ The DC of a challenge does not change from character to character.

Keep the DC the same for all characters attempting the same challenge and do not adjust it up or down based upon their expertise in the area. Such adjustments should be baked into their Attribute mods and Talent levels.

Difficulty Class(DC) Table

Difficulty	DC	Challenge Requires:
Automatic	None needed	Nothing (e.g. sit in a chair)
Very Easy	5	Untrained, minimum competence and/or luck.
Easy	10	Untrained, average competence and/or luck.
Typical	15	Specialized training and aptitude to accomplish more often than not.
Hard	20	Intense specialized training and aptitude to accomplish more often than not. This challenge is beyond the average person.
Very Hard	25	Intense, specialized training and exceptional aptitude to accomplish more often than not. Only the best in field should attempt.
Daunting	30	Mastery and exceptional aptitude (and even dicey then).
Herculean	35	Epic skill, talent, and luck combined.
Nigh Impossible	40	Divine lineage or intervention
Impossible	None allowed	Nothing (e.g. read a language they don't know.)

Types of Rolls

Combat Rolls

Combat rolls are just Challenge rolls using a character's Combat Talent. The DC is the target's armor class (AC). For melee attacks Strength is the modifier. For ranged attacks Dexterity is the modifier.

Saving Rolls (Throw)

Saving Rolls (often called saving throws) are Challenge rolls that allow a character to lessen or avoid special dangers such as poison, magical transformations, cave ins, etc. **For simplicity, the base DC for saving throws is 17.** The GM may adjust this to reflect more or less perilous situations (e.g. a very weak poison may have a DC save of 10 whereas a particularly deadly one may have a 25).

As with normal Challenge rolls the character rolls a d20, adds in all modifiers, and if they meet or exceed the DC they succeed. Otherwise, they fail. Modifiers include: the character's save bonus; any applicable class or racial bonuses; any single attribute modifier that fits the situation.

- ◆ **Base saving throw is DC 17**
- ◆ **Modifiers:** Level save bonus; + class/face modifier; + single attribute modifier that fits best (if any)

Saving Throw Example Table

Effect Saved Against	Attribute Modifier
Disbelieving an illusion	Wisdom
Dodging an effect (cave in, dragon's breath, etc.)	Dexterity
Resisting a magical spell	Intelligence
Resisting a mental power, insanity, or fear effect	Wisdom
Resisting an entanglement effect	Strength
Resisting disease, poison, or a death ray	Constitution

Example: A vile grimtoad vomits forth a noxious cone of poison at two characters: Handsome Sven the Surly (a 3rd level fighter with a +2 DEX mod and a +1 CON mod), and Brother Benadwin the Rotund (a 3rd level Priest with a +1 DEX mod and a +2 CON mod). The GM rules that this attack may be avoided either by dodging out of the way (Dexterity) or resisting the effects of the poison (Constitution). So both characters would make a saving throw with a +3 modifier (+1 for their level save bonus and +2 for their best applicable attribute).

Talent Rolls

Rolls made for a character's talents (Berserk, Stealth, et. al.) are just Challenge rolls modified by the character's talent level, applicable attribute, etc. Guidance on DC levels are listed in the Talents descriptions.

No-Talent Rolls

No-Talent rolls are made when a character attempts to use a talent they don't possess. For most talents this isn't allowed but for the ones where it makes sense (Climbing, Stealth, etc.) the character may attempt them as a standard Challenge roll with no level bonus, but possibly with an attribute modifier if the GM deems it appropriate.

Attribute Rolls

Attribute rolls are Challenge rolls using double a character's attribute modifier and nothing else (i.e. an 18 attribute modifies the roll at +6). They're the "roll of last resort" to be used when none of the other rolls fit and should never take the place of specific talent rolls (like Climbing, Stealth, or finding traps with the Burglary talent).

Perception Rolls & Checks

Perception rolls (characters attempting to notice things in their environment) are handled as **WIS-modified attribute rolls**. There are two types:

Active Perception Roll: A character is actively searching for something and makes a perception roll to see if they find it.

Passive Perception Check: A character is **NOT** actively searching, but may still notice the target.

- ◆ No roll is made.
- ◆ Instead, the GM compares the character's perception roll to the DC of noticing the target.
- ◆ If the character's perception is equal to or higher they notice the target. If not, they don't.

Groups of characters generally make a single perception roll/check based on their most favorable member.

Complementary Challenge Rolls (Optional)

Complementary rolls are when a character (or characters) attempt to combine two rolls to improve results. If allowed, the GM assigns one as the "main" roll and the other as the "complementary" roll. The complementary roll is made first and if successful affords the main roll *advantage*. More than one complementary per main roll is not allowed.

Morale Rolls (optional)

Morale rolls are an optional mechanic to determine how likely an NPC is to flee or surrender when combat is going heavily against them. Morale checks can be made whenever the NPC(s) suffer:

- ◆ An overwhelming surprise attack
- ◆ ½ casualties or hit points
- ◆ Loss of leaders
- ◆ Other highly demoralizing event (GM's discretion)

To make a morale roll NPCs must make a Challenge Roll with a DC determined by the GM. Success indicates they fight on while failure means they have lost morale and will flee, surrender, etc. Exact morale numbers are up to the GM and need to be adjusted to fit the situation. A wild animal may generally have poor morale but one defending its young may be ruled immune to morale rolls!

Morale Type	Example	DC
Immune	Zombies, automatons, berserker troops	n/a
Fearless	Elite troops	3
Steady	Trained soldiers, constabulary	7
Average	Average person, peasants, town mob	10
Unsteady	Wild animals, cowardly troops	15
Craven	House cats, mice, pigeons, politicians	20

Contested Rolls

are used when characters are actively attempting to make rolls against each other (e.g. a merchant actively attempting to spot a thief stealing or runners racing across a finish line). Each character makes their applicable roll, and adds in modifiers and the one with the highest score wins. Ties are re-rolled.

Combining Challenge & Contest Rolls

In some instances a single set of rolls can be both a Challenge and Contest rolls. For example, if two characters were racing to climb the same cliff both would make a Climbing talent roll. If both were successful, then the results of their two rolls would be compared as a Contest roll to see who arrived first.

Reaction Rolls (optional)

For NPCs without a clear or predetermined reaction to the PCs the GM may allow the character with the highest Charisma in a party to make a reaction roll to determine the NPC's demeanor. To do so the character rolls 2d6, adds their Charisma modifier, and consults the chart below. Reaction rolls need to be modulated heavily depending on the game situation.

Roll	Reaction
2 or less	Unhelpful and very hostile
3-5	Unhelpful and slightly hostile
6-8	Neutral
9-11	Slightly friendly
12 or more	Helpful and friendly

Combat

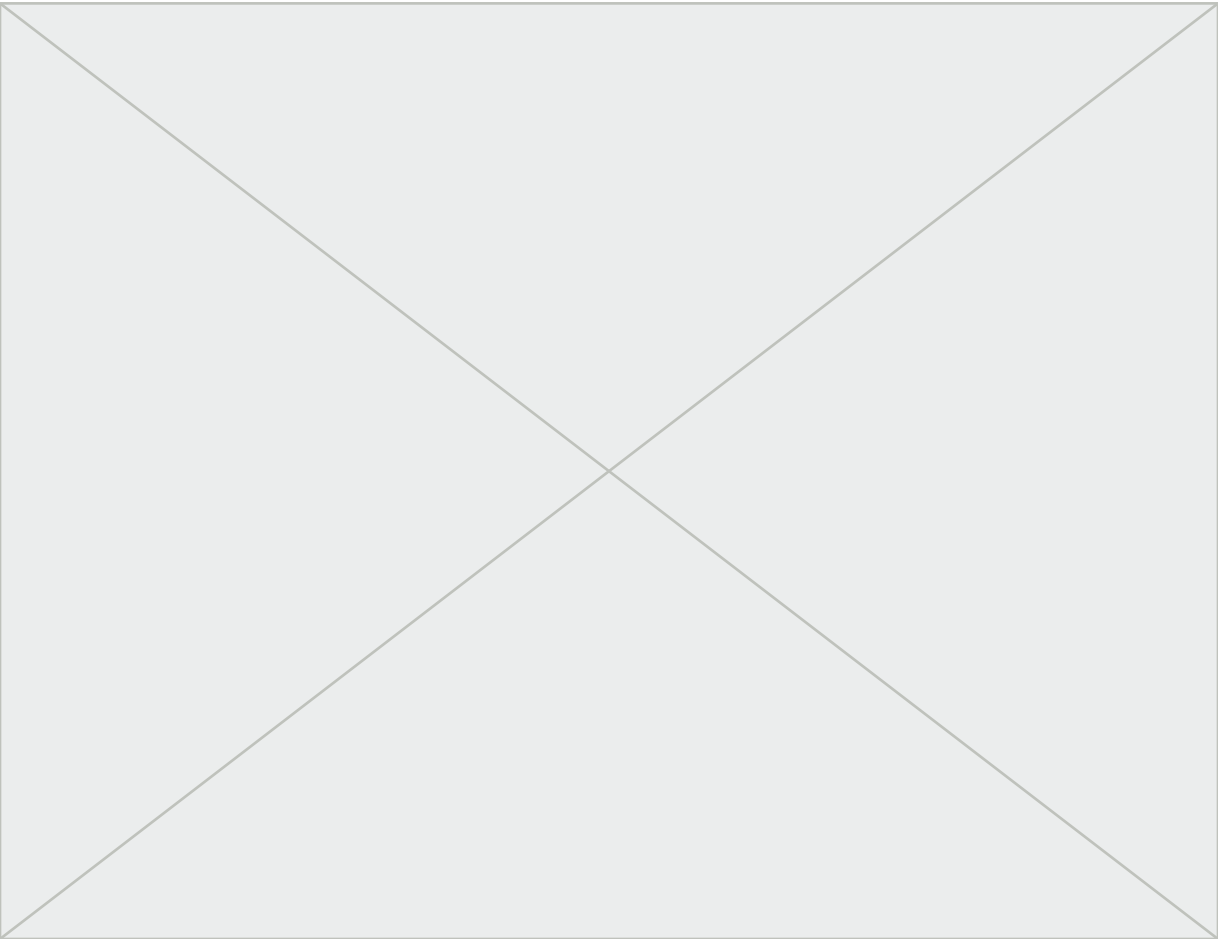

Combat is the meat and potatoes of most adventures and to keep it manageable it works in a very specific sequence:

1. Roll for surprise (if warranted)
2. Roll for initiative
3. Side winning initiative takes a round's worth of actions
4. Side losing initiative takes a round's worth of actions
5. Repeat steps 2-4 until combat ceases

Surprise

When warranted, opposing parties make perception challenge rolls upon meeting. If either side fails, they roll a 1d6 and are surprised on a 1 or 2. Surprised characters suffer the following on their 1st round of combat:

- ◆ May not move or take actions
- ◆ Attackers attack them with *advantage*
- ◆ At GM's discretion, they save vs spell attacks with *disadvantage*

If one party is actively attempting to gain surprise by stealth then contested challenge rolls of the sneaking party's least stealthy member vs. the target party's most perceptive member are made. If the sneaking party wins, they gain surprise.

Initiative

Initiative determines who goes first in combat. At the start of every round in combat each group rolls 1d6. The one who scores highest goes first. Ties are re-rolled or declared simultaneous actions. Within a group characters can go in descending order of their DEX score or the GM can just go clockwise around the gaming table.

Complex Initiative (Optional)

Here is a more granular, if slower and more complex, initiative option.

- ◆ At the beginning of combat each combatant rolls d12 and adds their DEX modifier to get an **initiative total**.
- ◆ Combatants take turns in order of their initiative total with highest going first and lowest last.
- ◆ Initiative is rolled only once at beginning of combat and the order maintained throughout the encounter.

Rounds, Movement, & Actions

Combat is divided into rounds. A round is an inexact period of time (about 6 seconds) but it essentially allows for one set of actions from each side in the melee. During a round a combatant may move and take one action.

Moving in Combat

During their phase in combat a character may:

- ◆ Move up to their full movement rate
- ◆ Break up their movement up with actions in any way they please.
- ◆ Move their full movement rate again as their action (see below)

Example: Zoeser the Obscurantist could use half his movement to run towards opponents, cast a spell, then use the last half of his movement to cower backwards. Brynhild of the Icy-Most Fjord (a fighter with multiple attacks) could break up her movement to run between multiple opponents and attack each.

Actions

Each character may take 1 action on their turn in combat. Some talents, spells, and situations allow extra actions. Example actions include:

- ♦ Attacking (melee or missile)
- ♦ Take another full movement
- ♦ Casting a 1-action spell
- ♦ Breaking open a door
- ♦ Drinking a potion
- ♦ Lighting a torch
- ♦ Retrieving a disarmed weapon

Free Actions

Characters are allowed a number of reasonable, minor actions such as shouting, opening an unlocked door, drawing a weapon, etc. without using their action for their turn.

Combat Reactions

Certain circumstances afford characters free actions. These free actions must be taken in direct response to the circumstance and need not occur on the character's turn in combat.

- ♦ **Attacking a fleeing opponent** - Characters are allowed 1 free attack on any opponent fleeing from them at full speed in combat. This is commonly called an "attack of opportunity" Characters may disengage and back away at 1/2 speed and not incur this penalty (see combat maneuvers).
- ♦ **Grabs, Grapples, and Tackles** - An armed character is allowed 1 free attack when any opponent tries to grab or tackle them. This free attack occurs at the same time as the grab/grapple/tackle.
- ♦ **Receiving a charge** - Characters braced for an opponent's charge (see Combat Maneuvers) are allowed a free attack when the charging opponent reaches them. This free attack occurs before the opponent's attack if the character's weapon is significantly longer than the attackers (i.e. A spear vs a sword).
- ♦ **Casting instant casting time spells** (*Featherfall, Counterspell, Spell Fork*, etc.) These spells can be cast instantly in response to a specific circumstance. A caster may only use one instant spell in any round.

Hitting & Damage

Hitting and meting out damage is handled by characters using their Combat Talent to hit an opponent and then rolling the damage listed for their weapon. See weapons section (q.v.).

- ♦ For melee attacks the Strength Attribute Modifier adds to the to-hit roll and damage.
- ♦ For ranged attacks the Dexterity attribute modifier adds to the to-hit roll (but not damage).

The damage points done by the weapon are subtracted from the target's total hit points. See Injury, Rest, & Recovery (q.v.) for details.

Combat Situations

There are a great many combat situations that will modify attack and saving throw rolls. Here are a few for guidance:

- ♦ **Invisible/unseen creatures** - Make combat attacks with advantage and are attacked with disadvantage.
- ♦ **Prone creatures** - Attack with disadvantage. Attacks against prone creatures are made with advantage by creatures within 5ft of them and disadvantage by creatures more than 10ft away.
- ♦ **Partially covered (50%)** - Target has +3 to AC and DEX saving throws
- ♦ **Mostly Covered (75%)** - Target has +6 to AC and DEX saving throws

Combat Maneuvers

Characters are likely to engage in endless colorful maneuvers in combat. Here are some guidelines.

Maneuver	Attack Mod.	Description
Brace	-	Ready for an opponent's charge. A successful attack while braced on a charging opponent inflicts +1d6 extra damage.
Charge	-	Melee attack at the end of at least ½ of the attacker's full movement. Inflict extra +1d6 damage.
Disarm	-2	Knock the weapon from an opponent's grasp. Weapon lands 2d6 feet away. Must score a hit, then win a contest roll of attacker's Combat vs defender's Combat.
Dodge	-	Do nothing but evade attacks. +3 to AC and any DEX saving throws.
Entangle	-	Snare opponent with rope, net, large tapestry, etc. Opponent may make a STR or DEX saving throw to escape at the beginning of his or her turn each round.
Flee	-	Move at full speed away from an opponent. Opponent may make a combat reaction to attack with <i>advantage</i> .
Grab	-2	Seize an opponent's possession (i.e. a broach, a wand they are holding, etc.). Armed opponents may make a combat reaction attack as grab occurs. STR vs STR contest rolls to wrest an item from the opponent's grasp.
Grapple	-2	Seize and hold opponent. Armed opponents may make a combat reaction attack as grapple occurs. Opponent may also immediately make a contest roll using their STR or Escapology vs the attacker's STR to escape and may repeat this attempt on their turn every round.
Retreat	-	Measured backing away from an opponent at ½ movement rate.
Tackle	-2	Grab an opponent and throw them and yourself to the ground. Armed opponents may make a combat reaction attack as tackle occurs.
Take Aim	+3	Take a full round to aim a missile attack then gain +3 to attack when it is fired. Character must remain still and loses any DEX modifier to AC.
Throw	-3	Throw, trip, or knock opponent to the ground.
Unhorse	-	Knock opponent from their mount. Must score a hit, then win a contest roll of attacker's Combat vs defender's Combat or Riding talent (whichever is better).

Adventuring

Time

It is often important to track game time (which is completely separate from real time). Time in the game has two unique measures: Rounds and Game Turns. Everything else is done in normal minutes, hours, days, etc.

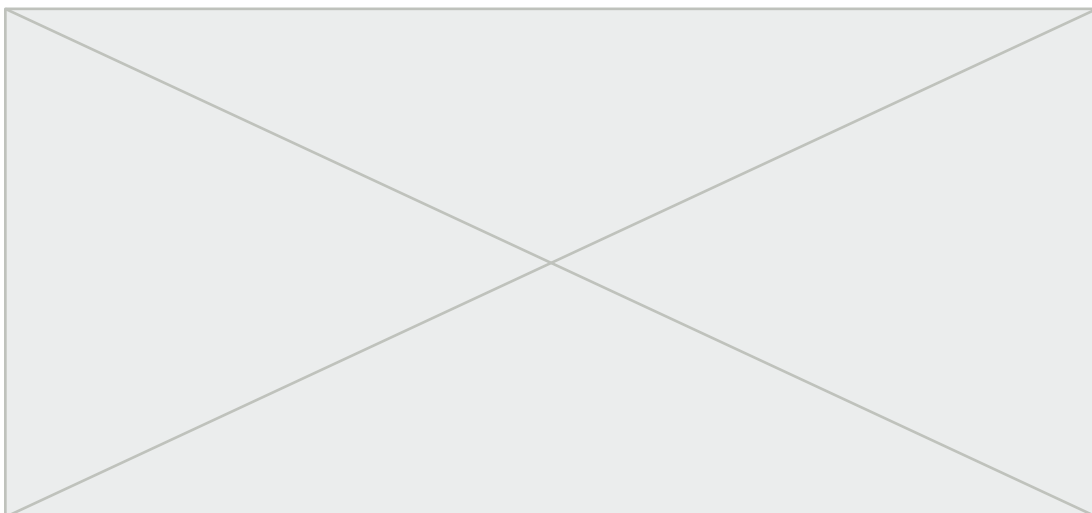

- ♦ **Round** - an exchange of attacks in combat by all sides. Approximately 6 seconds long in game time. Within rounds characters will take actions on their *turn in combat*.
- ♦ **Game Turn** - a scalable time period designed to ease the tracking of distances, resources, and random encounters. It's usually **10 minutes in exploration/dungeon settings and 1 hour outdoors**.

Game Turns

Game Turns make the GM's job easier and add realism. At the end of each a GM should:

- ♦ Record the distance the party has traveled
- ♦ Record the party's expenditure of resources (torches, spells, etc.)
- ♦ Track any Attrition Attacks (see below)
- ♦ Roll for random encounters of wandering monsters

The exact duration of a Game Turn depends on the situation in the game. **GMs need to make sure they communicate to the players any deviation from the standards mentioned above (10 minutes indoors / 4 hours outdoors).**

Example: In one session the party is racing through the *Merciless Maze of Munkar*. The GM tells them a Game Turn for this section will be a single minute to account for the numerous deadly traps and wandering monsters. Later, when the same party is wandering through the *Dreary Desert of Ennui*, the GM declares a Game Turn is now 1 day to reflect the lack of happenings in the interminable expanse.

Lighting

Characters without *Darkvision* (see Magic Section q.v.) will need portable illumination in dark situations.

- ♦ **Candle** - Sheds light in 5' radius and burns for 1 hour
- ♦ **Torch** - sheds light in a 30' radius and burns for 1 hour
- ♦ **Lantern** - sheds light in a 30' radius and burns for 4 hours on a single flask of oil.
- ♦ **Bullseye Lantern** - sheds light for 60' in a 10' wide cone in one direction. Burns for 4 hours on a single flask of oil.

Movement

A creature's movement rate (Move) is the number of feet they can move in a combat round. The standard human has a movement rate of 30' per round.

Slowed Movement

Characters engaged in any of these types of movement must spend 2' of their movement rate to cover 1' of space. **Note:** slowed movement effects can stack.

- ♦ **Climbing**
- ♦ **Crawling**
- ♦ **Swimming**
- ♦ **Jumping**
- ♦ **Stealthy movement**
- ♦ **Maintaining concentration on a spell**
- ♦ **Fighting withdrawal** - slowly backing away from opponents whilst maintaining full defense.
- ♦ **Across difficult terrain** - moving through webbing, miresome swamps, thick brambles, steep inclines/declines, etc.
- ♦ Under the effect of a **Slow spell**

Example: If Jack Gruss, the redheaded ranger of the pale glen, is crawling stealthily through thick brambles (difficult terrain) he will have to spend six feet of movement to move one foot!

Exploration Movement

Characters move through dungeons or other unfamiliar areas while mapping, and being cautions move at a rate of 300 feet per standard Game Turn (10 minutes) or roughly thrice a character’s movement rate.

Overland Movement

Long distance or “overland” travel is measured as 1/10th of the character’s movement rate in miles per hour. Different modes and their multipliers are listed in the table below.

Mode	30' Move speeds	Movement Multiplier
Swimming	1.5 mph	Halved
Walking	3 mph	Normal
Forced Marching	6 mph	Doubled
Running	9 mph	Tripled

Example: Tomar the fleet-footed has a movement rate of 40'. Thus, for overland movement he walks at 4 mph, swims at 2 mph, and runs at 12 mph.

Jumping

Running jumps assume at least 10’ of movement before them. Characters jumping over or landing on tricky terrain may have to make Acrobatics or DEX attribute rolls to avoid landing prone.

Jump Type	Distance
Long, Running	STR score
Long, standing	½ STR score
High, running	3’ + STR modifier
High, standing	½ of High, running jump

Injury, Rest, & Recovery

Damage, Death, & Incapacitation

When a character suffers damage the amount is subtracted from their hit point total. When a character reaches 0 or fewer hit points they are unconscious and incapacitated. When they reach -5 hit points they die.

Optionally, a GM may have characters with 0 or less HP suffer a "Death's Door" attrition attack until they are given medical attention. See Environmental Hazards section (q.v.).

Recovery & Healing

Characters recover 1d2 hit points plus Constitution modifier (minimum of 1 point) with an evening's rest; 1d4 hit points plus Constitution modifier (minimum of 1 point) with a full day's rest; and all hit points with a week's rest. Additionally, there are numerous talents, spells, powers, and devices that can restore hit points.

- ♦ **1 Night's Rest** = 1d2+CON mod HP (min of 1)
- ♦ **1 Full Day's Rest** = 1d4+CON mod HP (min of 1)
- ♦ **1 Week's Rest** = all HP recovered

Encumbrance

As opposed to an elaborate system of tracking weight the game's encumbrance rule is simple: Characters judged by the GM to be carrying too much will suffer penalties to dexterity based rolls, movement, and will fatigue more quickly. Exactly how much is up to the GM and the penalties for heavy armor are a good place to start. See Armor Chart (q.v.).

Environmental Hazards

Environmental hazards are the numerous non-combat elements of a game that can spell suffering and doom for a character.

Falling

A character falling will take 1d6 of damage for every 10 feet they fall with a maximum of 20d6.

Poison, Instant

Most poisons in the game will be of the fast-acting variety. Character's exposed to them must make a saving throw or be instantly affected (death for lethal poison, slumber for paralytic ones, etc.). **The default DC saving throw is 17** but the GM may adjust this number up or down to represent weaker or stronger poisons. Most poison doses assume a roughly man-sized target. For very large creatures (giants, dragons, etc.) the DC should be adjusted downward considerably.

Attrition Effects

Attrition effects are cumulative, detrimental effects like starvation, suffocation, or slow poison. After a grace period characters must make increasingly difficult saving throws to avoid the effect. **The first saving throw has a DC of 10. Each additional additional one increases the DC by 2 (12 on the second, 14 on the third, etc.).** Attrition effects have four components: grace period; save frequency; effect; and recovery.

- ♦ **Grace period** - how long before the first saving throw must be made. A character submerged underwater can hold their breath for a while before having to save vs drowning.
- ♦ **Save Frequency** - how often characters must make saving throws after the grace period. For drowning it is every minute but for slower effects, like starvation, it may be every day.
- ♦ **Effect** - the penalty for failing a saving throw
- ♦ **Recovery** - how long it takes to recover from the effect once the character has escaped it.

Game masters are free to adjust attrition effects as they see fit. A particularly virulent disease or exposure to particularly weak radiation might adjust grace periods, saving throw DC, and more.

Death's Door

At zero or fewer hit points characters must make a saving throw every 3 rounds or lose an additional hit point. Once they reach -5 hit points they die.

- ♦ **Effect**: lose 1 hit point
- ♦ **Recovery**: if a character is stabilized with medical talent or a healing

power then all hit points lost to death's door are immediately recovered.

Dehydration

After two days without water characters must make a saving throw to avoid the effect. They must make another roll every 1 day with an increasing penalty until they find water.

- ♦ **Effect:** -1d2 Dexterity; -15% of current hit points
- ♦ **Recovery:** Dexterity recovers at 1d4 minus Constitution modifier per day (minimum of 1 point). Hit points recover at $\frac{1}{3}$ per day.

Disease

One day after exposure to a disease characters must make a saving throw to avoid the effect. If successful, they need not make any more throws as long as they avoid further exposure. If they fail then they have become infected. The GM should determine how long the disease will infect the character and require regular saving throws during that period to resist its effects.

- ♦ **Effect:** varies, at GM's discretion.
- ♦ **Recovery:** varies, at GM's discretion

Drowning/Suffocating/Vacuum

A character can hold their breath for a number of minutes equal to 2 plus their Constitution bonus (min 20 seconds or 3 rounds) . After that they must make a saving throw every minute to avoid the effect.

- ♦ **Effect:** lose 25% of total hit points
- ♦ **Recovery:** Hit points lost to this effect recover fully in 1d4 rounds.

Exposure (Extreme Heat/Cold)

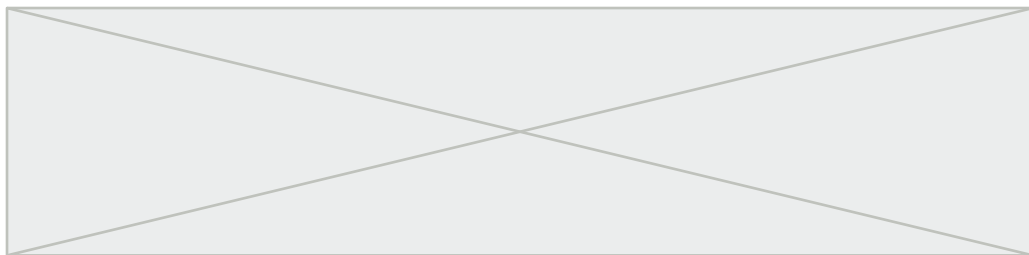

After 1 hour in extreme weather conditions without appropriate clothing or shelter characters must make a saving throw to avoid the effect.

- ♦ **Effect:** -1d2 Strength; -1d2 Dexterity; lose 10% of total hit points
- ♦ **Recovery:** Strength and Dexterity will recover 1 hour after the effect is removed but hit points must heal normally.

Insanity

Characters can resist extreme mental stress for a number of days equal to 1 + their Wisdom bonus (min 6 hours). After that they must make a saving throw (modified by Wisdom) to avoid effect. Characters laboring under an insanity attrition effect who suffer additional severe mental shocks (witnessing the death of a loved one, sight of an elder evil god, passage to a dimension of non-euclidean geometry, etc.) may be forced to make additional saving throws to avoid the effect.

- ♦ **Effect:** varies, at GM's discretion.
- ♦ **Recovery:** variable but generally 1d6 months minus character's Wisdom modifier.

Poison, Paralytic, Slow

Characters exposed to slow paralytic poison must make a saving throw to avoid the effect. Invisible, odorless gas is a good example of this kind of effect.

- ♦ **Effect:** Character becomes unconscious and will not recover till removed from the area.
- ♦ **Recovery:** Once removed from exposure, characters will revive in 1d6 minutes minus their Constitution bonus (1 minute minimum).

Poison, Deadly, Slow

One day after exposure to slow deadly poison characters must make a saving throw (modified by Constitution) to avoid the effect. If the character is still being

exposed to the poison then regular saving throws against it are made. If the character escapes exposure then the poison will remain in their system for 1d6 days requiring saving throws each day to avoid further effects. However, each subsequent saving throw is made with a +2 bonus instead of -2 penalty as the poison weakens.

- ◆ **Effect:** -1d2 Strength, 1d2 Wisdom, 1d2 Dexterity, 15% of current hit points.
- ◆ **Recovery:** 1d6 days minus Constitution modifier to recover fully.

Radiation

After 1 day of exposure to radiation characters must make a saving throw to avoid the effect. In certain campaign settings a fumble failure on the saving throw (a natural 1) will indicate a wild mutations occur in character.

- ◆ **Effect:** -1d2 Constitution; -1d2 Strength; -1d2 Charisma; 10% of total hit points. Possible mutation on bad failure in some campaign settings.
- ◆ **Recovery:** 2d6 days minus Constitution modifier to recover fully.

Sleep Deprivation

A character can go without sleep for 20 hours plus double their Constitution bonus. After that they must make a saving throw to avoid the effect. They must make another roll every 8 hours with an increasing penalty until they rest.

- ◆ **Effect:** -2 Intelligence, -1 Wisdom, -1 Charisma
- ◆ **Recovery:** Full recovery after a number of hours of sleep equal to 11 - Con bonus.

Starvation

After not eating for one week characters must make a saving throw to avoid the effect. They must make another roll every day with increasing penalties until they find sustenance.

- ◆ **Effect:** lose 10% of hit points and 1d2 points of strength.
- ◆ **Recovery:** Strength recovers in 1 day but hit points must heal normally.

Torture

After being tortured for 1 day characters must make a saving throw (modified by Wisdom) to avoid revealing information to their interrogator. They must also make a separate saving throw (modified by Constitution) to avoid the physical effects of torture.

- ◆ **Effect:** reveal information (on failing Wisdom saving throw); -1d2 Strength; -1d2 Dexterity; -10-40% of remaining hit points (on failing Constitution saving throw).
- ◆ **Recovery:** Dexterity and Strength will both recover in 1d4 days plus Constitution modifier but hit points must heal normally.

Attrition Effects Table

Type	Grace Period	Save Frequency	Save Modifier
Death's Door	1 round	1 round	Constitution
Dehydration	2 days	1 day	Constitution
Disease	1 day	1 day	Constitution
Drowning, Suffocating, Vacuum	2 minutes + 1 minute per Constitution bonus	1 minute	Constitution
Exposure	1 hour	1 hour	Constitution
Insanity	1 day + 1 day per Wisdom bonus	1 day	Wisdom
Poison, Paralytic, Slow	1 round	1 round	Constitution
Poison, slow	1 hour	1 hour	Constitution
Radiation	1 day	1 day	Constitution
Sleep Deprivation	16 hours	8 hours	Constitution
Starvation	1 week	1 day	Constitution
Torture	1 day	1 day	Wisdom & Constitution

Magic Spell Casting

Characters with the Wizardry or Thaumaturgy talents have the ability to cast magical spells. The number and level of spells they can cast is determined by their level in these talents and represented by "spell slots".

Spell Slots

Spell slots are the number of spells a character can cast of each level per day. Once they run out they can't cast anymore spells. They work like this:

- ◆ At the start of a game a caster fills each slot with a spell they can cast
- ◆ When the caster uses the spell that slot is emptied
- ◆ The slot remains empty until the caster has time to rest and regain spells (see below)

Characters with both Wizardry and Thaumaturgy have two completely separate sets of spell slots (one for each), and cannot use either one for the other.

Spell Slots Per Level Table

Level with Talent	Spell Slots Per Day						
	1	2	3	4	5	6	7
1	1	-	-	-	-	-	-
2	2	-	-	-	-	-	-
3	2	1	-	-	-	-	-
4	3	2	-	-	-	-	-
5	3	2	1	-	-	-	-
6	4	3	1	-	-	-	-
7	4	3	2	1	-	-	-
8	4	3	3	2	-	-	-
9	4	3	3	2	1	-	-
10	4	4	3	3	2		-
11	4	4	3	3	2	1	-
12	4	4	4	3	2	2	
13	4	4	4	3	2	2	1

Casting & Maintaining Spells

The casting of both Wizardry and Thaumaturgy spells follows these rules:

- ♦ **Casting Time** - Spells take a single action to cast unless otherwise noted in their description.
- ♦ **Gestures & Incantations** - Spells are cast via a precise ritual of gestures and incantations. Casters must be able to speak clearly and move freely to trigger them. Some spells do not require either gestures or incantations and this is detailed in their descriptions.
- ♦ **Material Components (optional)** - Many spells list specific material components required to cast them. This adds flavor to the game and further limits spellcasters but does complicate play. The GM is free to include or ignore them.

Casting Level

The effectiveness of many spells are tied to the caster's level. It is important to note that casting level is based on the caster's level with the Wizardry or Thaumaturgy talent NOT their overall level. Thus a 10th level knave casting Wizardry spells will do so at fifth level because Wizardry is an adjacent talent for knaves.

Interruption of Spell Casting

If anything interrupts the casting of a spell (e.g. the caster is hit in combat) or they cannot fulfill the component requirements of the spell (a silence spell prevents them from speaking) then the spell fails and the spell slot is lost till recovered.

Concentration on Spells

Many spells require concentration by the spellcaster to maintain. This is a specific game mechanic that requires the caster not:

- ♦ Move faster than with *slowed movement*. See Movement section (q.v.)
- ♦ Cast another spell
- ♦ Be damaged by an attack

If any of the aforementioned occur, the caster's concentration is broken and the spell ends.

Recovery of Spells

A character recovers all their spell slots after a period of about 8 hours of rest and/or meditation. For Wizardry this can only be accomplished if the caster has access to their spell books. Thaumaturgy has no such limitation.

Illusion Spells

Illusions can be challenging to run. To make this easier this game has four types of illusions: apparitions, phantasms, delusions, and shadows. All of these can be disbelieved under the right circumstances.

Disbelieving illusions

Characters are allowed a Wisdom-modified saving throw to disbelieve an illusion if:

- ♦ The spell specifically dictates it, or
- ♦ The situation in the game warrants it

Much of this is up to the GM. An apparition of an extra fork on a lavishly-set dining table might blend it so well as to be undetectable (no save allowed) whereas a camel suddenly appearing on the same table might be so farcical as to be obviously false (automatic save). What happens when a character disbelieves depends on the type of illusion.

Apparition Illusion

Apparitions are intangible illusions. They can have visual, auditory, olfactory, or even gentle (non-damaging) thermal elements. They can completely change an object's appearance but cannot cause direct harm.

- ♦ **Disbelieved Apparitions:** No change to illusion but character knows it is false.

Phantasm Illusion

Phantasms are apparitions that psychically link with any intelligent creature subjected to them. This linkage allows the illusion to actually harm the subject and

the subject to possibly shut down the illusion by disbelieving it. Characters believing phantasms will act as if they are 100% real. However, phantasms cannot have real-world effects outside of the victim's mind. A character who walks across a phantasmal bridge believing it to be real will still plummet to the ground below.

Note: Against mindless creatures or creatures immune to mental influence phantasms function exactly like apparitions.

- ◆ **Disbelieved Phantasm:** Becomes a weak and translucent apparition illusion.

Delusion Illusion

Delusions are similar to phantasm illusions except they exist entirely inside the mind of the victim.

- ◆ **Disbelieved Delusion:** Disappears entirely.

Shadow Illusions

Shadows have all the elements of phantasms but are partially real. A shadow illusion monster can actually open a door or carry a sack.

- ◆ **Disbelieved Shadow:** Does not vanish or become transparent but is recognized as false and becomes less dangerous.

Thaumaturgy

Thaumaturgy is the casting of spells granted by divine powers. Thaumaturgical spells:

- ◆ May be cast while wearing armor without limitation
- ◆ Requires only rest and meditation to recover (no spell books required)
- ◆ May be thwarted or perverted if a character uses them in direct opposition to their deity's ideals (GM's judgement).
- ◆ For spells requiring material components Thaumaturgy usually requires the priest's holy symbol instead. The GM may adjust this for certain spells as they see fit.

Thaumaturgy Spells Lists

Level 1

1. Aura of Protection
2. Comprehend Languages (Incomprehensible Languages)
3. Cure Light Wounds (Cause Light Wounds)
4. Detect Magic
5. Light (Darkness)
6. Purify Food & Water (Putrefy Food & Water)
7. Remove Fear (Cause Fear)
8. Resist Cold

Level 2

1. Augury
2. Bless (Curse)
3. Create food & Water
4. Detect Traps
5. Hold Person
6. Resist Fire
7. Silence 15' Radius
8. Speak With Animals

Level 3

1. Animate Dead
2. Bless Weapon
3. Cure Disease (Cause Disease)
4. Counterspell
5. Dispel Magic
6. Feign Death
7. Locate Object
8. Remove Curse (Curse)

Level 4

1. Aura of Protection, 10' radius
2. Cure Serious Wounds (Cause Serious Wounds)
3. Detect Lie
4. Neutralize Poison (Poison)

5. Speak with Plants
6. Sticks to Snakes
7. Tongues (Gibberish)

Level 5

1. Banishment
2. Commune
3. Cure Critical Wounds (Cause Critical Wounds)
4. Insect Plague
5. Plane Shift
6. Quest (Remove Quest)
7. Raise Dead (Finger of Death)
8. Suspend Life
9. True Seeing

Level 6

1. Find the Path (Lose the Path)
2. Heal (Harm)
3. Hurricane
4. Part Water
5. Word of Recall

Level 7

1. Earthquake
2. Gate
3. Holy Word (Unholy Word)
4. Regenerate
5. Resurrection
6. Symbol

Wizardry

Wizardry is the casting of spells through arcane knowledge. Wizardry spells:

- ♦ May not be cast by any character in armor who does not have the *Battle Casting* talent.
- ♦ Require the use of spell books for a caster to regain spell slots.

Spell Books

Practitioner of Wizardry regain their spell slots by studying their personal **spell books**. They start with two copies: a master copy (which is normally secreted away) and a smaller, portable traveling copy. The actual form of these books varies as they can be scrolls, tablets, wall mosaics, or even woven into garments. The loss of a spell book can provoke great troubles for a magician and, perhaps, great adventures in the game.

Wizardry Schools

Additionally, Wizardry is divided into five schools or spheres of influence represented by colors. A character with Wizardry 1 or 2 will only have access to spells from one or two schools and may not cast other school's spells. In general terms, the schools represent:

- ♦ **BLACK** - Death, darkness, slumber, insanity, disease, demonology
- ♦ **BLUE** - Illusion, transformation, charms, trickery
- ♦ **GREEN** - Nature, weather, fecundity, water, air, ice
- ♦ **RED** - Fire, earth, destruction, raw power
- ♦ **WHITE** - Life, light, healing, revelation, protection

Spell Descriptions

- ♦ **Casting** - How long it takes to cast a spell
- ♦ **School** - School(s) the spell belongs to. Thaumaturgy-only spells will not belong to any.
- ♦ **Components** - What is required to cast the spell.
V = verbal (caster must be able to speak).
S = somatic (caster must be able to move freely).
M = material (usually a holy symbol for Thaumaturgy).
- ♦ **Duration** - How long the spell lasts.
- ♦ **Range** - casting range of spell.
- ♦ **Save** - What effect a successful saving throw will have on resisting the spell.
Neg. = negate the effect entirely
Half = half damage from spell
None = no saving throw allowed.
- ♦ **Target** - What the spell may target.

Alter Self

Casting: 1 action
Duration: 10 min.
Save: none

School: Blue Components: V,S
Range: 0'
Target: Caster

This spell allows the caster to transform themselves into any humanoid creature no more than 25% larger or smaller than their original form. The change is mostly cosmetic but can impart limited abilities as would be appropriate for the new form such as:

- ◆ Darksight (as the spell) but limited to 30'
- ◆ Natural weapons (claws, tusks, etc.) that inflict 1d6 damage
- ◆ Gills that allow breathing underwater
- ◆ Webbed limbs that increase swimming speed
- ◆ Wings that afford slow, clumsy gliding

Alter Self abilities should be significantly less effective than their real-world counterparts as the changes wrought by the spell are only semi-real. If the caster is rendered unconscious or reduced to 0 hit points they instantly revert to their true form. *Alter Self* can disguise creatures as specific other creatures (a specific king, a specific maiden, etc.) functioning as the Disguise Talent at a level equal to the caster's spell-casting level.

Amnesia

Casting: 1 action
Duration: permanent
Save: neg.

School: Black Components: V,S
Range: 120'
Target: 1 creature

This spell afflicts the target with complete loss of memory as to their identity, relationships, and past. They retain all of their talents and skills but cannot recall who they are, who their friends are, any place they've visited, etc. The target is allowed an INT-modified saving throw to avoid the effect. Memories can only be restored by *Remove Curse*, *Heal*, *Restoration*, or *Limited Wish* spells.

Animal Summoning

Casting: 1 action
Duration: 1 hour / level
Save: none

School: Green Components: V,S
Range: 30'
Target: special

This spell calls up to 8 normal, non-magical animals to aid the caster. They will happily fight or perform other tasks as the caster directs. The animals are not magically transported to the caster and arrive via their own locomotion. Thus any animals summoned must be native and nearby. If the type of animal the caster requests is not available (GM's discretion) then the caster may twice more attempt

to summon different animals. If all three attempts are unsuccessful the spell fails.

The animals:

- ◆ Must be normal, non-magical
- ◆ Must be 4HD or less
- ◆ Arrive in 1-4 rounds
- ◆ Must be local to the area where the spell is cast

Animate Dead

Casting: 10 minutes

School: Black

Components: V,S

Duration: Permanent

Range: 30'

Save: none

Target: special

This dark necromancy reanimates dead humanoids as zombies or skeletons under the caster's control. The caster can animate their level in hit dice of these creatures (i.e. a 5th level caster can create 5HD of either skeletons or zombies). The creatures persist until destroyed or dispelled.

Anti-Magic Shell

Casting: 1 action

School: All

Components: V,S

Duration: 10 min. / level

Range: 0'

Save: none

Target: Caster

This spell surrounds the caster with an invisible barrier that nullifies all magic within - including the caster's. Charmed or summoned creatures may not breach its perimeter. Gaze, breath, or other mystic attacks will not affect anyone within, and magical items within lose all potency (save powerful artifacts & relics).

Augury

Casting: 10 minutes

School: Black, White

Components: V,S,M

Duration: special

Range: 0'

Save: none

Target: special

This spell divines whether a single, well-defined action taken within the next 30 minutes will be to the weal or woe of the caster. The spell has an accuracy rate of 70% plus 1% per the caster's level. This roll is made secretly by the GM and on a failure a false answer is returned. *Augury* only informs on immediate, not long term consequences. The material component is a brew infused with a crushed pearl.

Aura of Protection

Casting: 1 action

School: Black, White

Components: V,S,M

Duration: 1 hour

Range: 0'

Save: none

Target: 1 creature

This spell encircles a subject with a mystical barrier that protects them from

magical creatures (demons, elementals, undead, etc.). Such creatures:

- ◆ May not touch or make melee attacks against the subject
- ◆ May make ranged attacks at the subject but with disadvantage
- ◆ May not use any abilities involving possession or mental attacks on the subject

The material components for this spell are a handful of salt or iron filings

Aura of Protection, 10' radius

Casting: 1 minute

School: Black, White

Components: V,S,M

Duration: 1 hour

Range: 0'

Save: none

Target: 10' radius

This spell functions exactly as the 1st level spell *Circle of Protection* but extends its defense to a larger area.

Banishment

Casting: 1 action

School: Black, White

Components: V,S

Duration: instant

Range: 120'

Save: neg.

Target: 1 creature / 4 levels

Banishment instantly sends creatures back to the plane of existence from whence they came. Creatures native to the plane where the spell is cast are merely shunted into a pocket dimension for 10-60 minutes and then reappear unharmed. The spell affects up to 1 creature for every 4 levels of the caster. Target creatures may make a WIS-modified saving throw to negate the spell.

Barkskin

Casting: 1 action

School: Green

Components: V,S,M

Duration: 1 hour

Range: 0'

Save: none

Target: 1 creature

This spell caused the subject's skin to harden, take on a bark-like appearance, and add +3 to their armor class. This armor class bonus is increased by +1 for every 5 levels of the caster (i.e. +4 at 5th level, +5 at 10th level, +6 at 15th level, etc.). The material component is a bit of bark.

Bless (Curse)

Casting: 1 action

School: Black, White

Components: V,S,M

Duration: 1 hour

Range: 60'

Save: neg.

Target: 20' cube

Bless (or Curse) may only be cast on creatures not already engaged in combat. It grants all allies within the area of effect:

- ◆ +1 on combat rolls

- ♦ +1 on damage inflicted in combat
- ♦ +1 on morale rolls.

Reversible: Curse - The reverse of this spell causes enemies within the area of effect to suffer: -1 on attack rolls; -1 on any damage they inflict in combat; and -1 on morale rolls. Victims are allowed a WIS-modified saving throw to avoid the effect.

Bless Weapon

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: 10 min.	Range: 30'	
Save: none	Target: 1 weapon	

This spell enchants a single weapon such that:

- ♦ It can strike creatures only hit by magical weapons
- ♦ Causes an additional 1d6 points of damage

Burning Hands

Casting: 1 action	School: Red	Components: V,S
Duration: 1 round	Range: 0'	
Save: half	Target: 15' cone	

When cast this spell spits forth a cone-shaped gout of flame from the caster's finger tips causing 1d4 point of damage per caster level (maximum 5d4) to all creatures within the area affected. Flammable items within the area are also set ablaze.

Charm Monster

Casting: 1 action	School: Blue	Components: V,S
Duration: 1 hour / level	Range: 120'	
Save: neg.	Target: 1 creature	

This spell functions exactly as the spell *Charm Person* except it can affect any creature save for undead or mindless ones.

Charm Person

Casting: 1 action	School: Blue	Components: V,S
Duration: 1 hour / level	Range: 90'	
Save: neg.	Target: one humanoid creature	

This spell causes a humanoid creature failing their saving throw to regard the caster as a trusted friend and ally to be defended and obeyed. The creature does not become an automaton, but will regard requests and suggestions from the caster in the most charitable light. The creature will ignore suicidal orders or ones against its alignment and/or inherent nature. If the caster attacks the creature the spell is

instantly broken. Once the spell ends the creature is aware they were charmed. The creature is allowed additional saving throws to negate the effects of the spell based on their intelligence score:

- ◆ 3-8 - one save per month
- ◆ 9-12 - one save per week
- ◆ 13-18 - one save per day
- ◆ 19+ one save per hour

Clairvoyance

Casting: 1 minute	School: White	Components: V,S
Duration: 1 round / level	Range: 480'	
Save: none	Target: special	

This spell conjures an intangible, invisible sensor through which the caster can see and hear as if they were standing in its location. The sensor appears anywhere within the spell's range the caster desires and can be moved at 30' per round thereafter. The caster may switch their senses between their body and the sensor by using an action but may not use both at the same time. Clairvoyance is stymied by a thin sheet of metal or stone more than 1' thick.

Cloudkill

Casting: 1 action	School: Black, Green	Components: V,S,M
Duration: 4 rounds + 1 round / level	Range: 60'	
Save: neg.	Target: 30' diameter	

This spell summons a ghastly fog of murderous vapors. The cloud fills a 30' diameter and can move 10' per round as the caster directs. It clings to ground level and will sink to the lowest points of the terrain. High winds will disperse *Cloudkill*, but it will never flow back at the caster. Creatures within the cloud:

- ◆ Have vision limited to 3'
- ◆ Must make a Constitution-modified saving throw each round or die. Creatures with fewer than 4 hit dice or levels make this save with *disadvantage*.

Cloudkill is both poisonous and highly corrosive, and affects creatures that do not breathe. It will corrode and possibly destroy items it comes in contact with (GM's discretion). The material components are a bit of lye and mustard seed.

Commune

Casting: 1 hour	School: Black, White	Components: V,S,M
Duration: 1 min.	Range: 0'	
Save: none	Target: caster	

This spell enables the caster to seek guidance from their divinity in the form of

yes-or-no questions. They may ask one question per level and the answer will be unfaillingly correct. *Commune* may only be cast once per month.

Comprehend Languages (Incomprehensible Languages)

Casting: 1 action	School: Black, White	Components: V,S
Duration: 20 min.	Range: 0'	
Save: neg.	Target: 1 creature or written document	

This spell enables a caster to touch a single creature or text and then understand their language or that writing for the duration. The caster cannot speak or write these languages. The spell cannot translate magical or coded writings. This spell is reversible (*Incomprehensible Languages*) and can be cast on a single creature or written document causing the creature's speech to be unintelligible or the text to be illegible. Creatures are allowed a saving throw to resist the effect. *Comprehend/Incomprehensible Languages* spells can be cast to cancel one another.

Confusion

Casting: 1 action	School: Black, Blue	Components: V,S,M
Duration: 1 min. / level	Range: 120'	
Save: neg.	Target: 1d6 creatures / 3 levels within 40ft radius	

This enchantment befuddles creatures within range making them unable to decide on a course of action. It affects a number of creatures equal to 1d6 per 3 levels of the caster (e.g. 2d6 at 6th level, 3d6 at 9th level, etc.). Creatures with less than 3 hit dice are not allowed a saving throw. Creatures with 3 hit dice or more are allowed a WIS-modified save to resist the spell and another save every minute to shrug off its effect. Each round a creature is under a *Confusion* spell roll a d12 to see its action:

- ◆ 1-6 - Stand confused and muttering
- ◆ 7-8 - Attack the nearest creature
- ◆ 9-10 - Attack the caster and his party
- ◆ 11-12 - Wander off for duration of spell (do not roll for this creature again)

The material component is a drop of mercury.

Continual Light (Continual Darkness)

Casting: 1 action	School: Black, Red, White	Components: V,S
Duration: permanent	Range: 90'	
Save: neg.	Target: special	

This is a reversible spell that can create either a sphere of light or area of darkness. It lasts until a dispel magic or *Continual Light* or *Darkness* spell is used to negate it. Each version has three uses:

- ◆ A glowing sphere of effulgence equal to torch light or an area of pitch-black darkness. Either extends for a 30 foot radius, and if cast upon an object it can be carried about.
- ◆ Blinding a creature with light or darkness. Creature is allowed a saving throw to resist
- ◆ Negating another light or darkness spell.

CounterSpell

Casting: Instant	School: All	Components: V,S
Duration: permanent	Range: 120'	
Save: none.	Target: 1 spell being cast within range	

This spell may be cast as an instant Combat Reaction even if the caster has already acted in this round. *Counterspell* allows an opponent's spell to be negated as it is being cast. To succeed, the caster must win a Contest Challenge roll of their magical talent (Wizardry or Thaumaturgy) at +3 vs their opponent's magical talent. If they win, the opponent's spell fizzles without effect. *Counterspell* has no effect on spells that have already been cast.

Create Food & Water

Casting: 10 minutes	School: White	Components: V,S
Duration: permanent	Range: 30'	
Save: none	Target: special	

This spell materializes wholesome food and water in quantities sufficient to feed three men for a day per level of caster.

Creeping Doom

Casting: 1 action	School: Green	Components: V,S
Duration: 4 rounds / level	Range: 60'	
Save: special	Target: 20' square	

Creeping Doom summons a carpet-like horde of magical, venomous insects that fill a 20' square area. The doom can be directed to move 10' per round. It does not fly but can ascend walls and stream through small openings with ease. Creatures contacting the doom are instantly swarmed over and:

- ◆ Suffer 5d12 damage instantly
- ◆ Suffer 5d12 damage each additional round they are in contact with the doom.
- ◆ May take no action except attempt to escape the doom
- ◆ May escape the hoard on DEX-modified saving throw made with *disadvantage*

The GM may allow creatures to escape the doom by diving into flames, water, or

other method

Cure Critical Wounds (Cause Critical Wounds)

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: permanent	Range: 0'	
Save: none	Target: 1 creature	

This spell functions exactly as *Cure Light Wounds (Cause Light Wounds)* but heals (or inflicts) 3d8+3 hit points.

Cure Disease (Cause Disease)

Casting: 10 minutes	School: Black, White	Components: V,S
Duration: special	Range: 0'	
Save: neg.	Target: 1 creature	

This spell cures the target of any one disease (including magical ones).

Reversible: Cause Disease - The spell's reverse requires the caster to touch the target and the target is allowed a CON-modified saving throw to resist. If they fail they are afflicted with a terrible wasting disease that saps their strength and causes:

- ♦ *Disadvantage* on all rolls involving physical acts (combat, swimming, riding, etc.).
- ♦ Unable to be magically healed of hit point loss.
- ♦ Death within 3d6 days.

Cure Light Wounds (Cause Light Wounds)

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: permanent	Range: 0'	
Save: none	Target: 1 creature	

This spell heals 1d8+1 hit points of damage suffered by a living creature. It cannot raise their hit points above the creature's normal maximum. Note: casting *Cure Light Wounds* on undead creatures will inflict 1d8+1 damage upon them.

Reverse: Cause Light Wounds - This spell inflicts 1d8+1 damage on a living creature. The caster must successfully touch the creatures with a Combat Talent roll.

Cure Serious Wounds (Cause Serious Wounds)

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: permanent	Range: 0'	
Save: none	Target: 1 creature	

This spell functions exactly as *Cure Light Wounds (Cause Light Wounds)* but heals (or inflicts) 2d8+2 hit points.

Darksight

Casting: 1 action

Duration: 1 hour + 10 min. / Lvl.

Save: none

School: Black, White

Range: 0'

Target: 1 creature

Components: V,S

This spell bestows on one creature the ability to see up to 60 feet in complete darkness. The vision bestowed is grainy and cannot discern fine details (like writing).

Demi-Shadow Monsters

Casting: 1 action

Duration: 1 hour / level

Save: special

School: Black, Blue

Range: 120'

Target: 20' cube

Components: V,S

This spell is identical to the spell *Shadow Monsters* except the monsters created:

- ◆ Have 40% of their normal hit points
- ◆ Inflict only 40% of their normal damage
- ◆ Have an Armor Class of 2
- ◆ Have 40% of the real creature's strength

Detect Invisibility

Casting: 1 action

Duration: 1 hour

Save: none

School: Blue, White

Range: 10' / level

Target: caster

Components: V,S,M

This caster can clearly see all invisible objects and creatures within the spell's range. The material component is a bit of talc or soot.

Detect Lie (Undetectable Lie)

Casting: 1 action

Duration: 1 round / level

Save: none

School: Black, White

Range: 60'

Target: caster

Components: V,S,M

The spell empowers the caster to detect any falsehood spoken to them as being untrue. The material component is a bit of gold dust for *Detect Lie* and a bit of brass dust for *Undetectable Lie*.

Reverse: Undetectable Lie - The reverse of this spell blocks the effect of *Detect Lie* and makes any bald-faced untruths spoken by the caster seem reasonable.

Detect Magic

Casting: 1 action

Duration: 20 min.

Save: none

School: All

Range: 0'

Target: 60' radius

Components: V,S

When cast this spell causes all magical, charmed, or enchanted objects within the area of effect to glow.

Detect Traps

Casting: 1 action	School: n/a	Components: V,S
Duration: 20 min.	Range: 0'	
Save: none	Target: 30' radius	

This spell reveals to the caster all traps within the area of effect. It divines even concealed or magical traps. Note that knowledge of how to avoid or disarm the traps is not granted.

Dimension Door

Casting: 1 action	School: Red	Components: V,S,M
Duration: instant	Range: 480'	
Save: neg.	Target: Caster and 1 other creature	

This spell causes a magical glowing "door" to open and close about the caster instantly transporting them to any spot within the spell's range. *Dimension Door* is unfailingly accurate and the destination may be a place the caster can see, one they're familiar with, or specified with directions and distance (i.e. "20 feet down"). The caster may bring along one other creature weighing no more than 500lb. Unwilling creatures are allowed a saving throw to avoid the effect. If a solid object occupies the destination the spell fails and the caster and any creature traveling with them suffer 4d6 points of damage.

Disintegrate

Casting: 1 action	School: Red	Components: V,S,M
Duration: permanent	Range: 120'	
Save: neg	Target: special	

This spell unleashes a deadly red ray that instantly and completely obliterates a single target. The target can be a single creature or up to 10 cubic feet of a single object. It will affect even magical forces such as *Shadow Monsters* or a *Wall of Force*. The target is allowed a Dexterity-modified saving throw to avoid the effect.

Dispelling Magic

Casting: 1 action	School: All	Components: V,S
Duration: instant	Range: 120'	
Save: none	Target: 1 spell or 20' cube	

This spell instantaneously ends either all spells within its area of effect or a single spell of the caster's choice. It affects enchantments on creatures and magically summoned creatures (they're dismissed to whence they came), but not magic items. The caster may dispel:

- ◆ Their own spells automatically
- ◆ Third level or below spells automatically
- ◆ 4th level or higher spells with an Wizardry or Thaumaturgy talent roll against a DC of 5 + the level of the spell to be dispelled.

Earthquake

Casting: 1 action
Duration: 1 round
Save: special

School: Green, Red
Range: 240'
Target: 5' diameter per level

Components: V,S,M

Earthquake causes a brief, but violent seismic event to strike an area equal to 5' diameter per level of caster. The tremor is highly localized and will not propagate outside the spell's area of effect. Depending on the terrain where it is cast it will cause:

- ◆ Cliffs to crumble
- ◆ Caverns to collapse
- ◆ Trees to be uprooted
- ◆ Marshes or small bodies of water to drain off to form rough, muddy ground
- ◆ Buildings to be thrown down in rubble
- ◆ The ground to crack open with large fissures

Creatures caught in the spell's area must make a Wisdom-modified saving throw. Failure indicates they have died in falling debris or a crushing fissure. Success indicates they suffer 7d6 damage and require 1d20 minutes to extricate themselves from debris and/or a fissure.

Entangle

Casting: 1 action
Duration: 10 min.
Save: half

School: Green
Range: 90'
Target: 50' diameter

Components: V,S,M

This spell causes vegetation in an area to grow and thicken so as to entwine and hold fast creatures for the spell's duration. Creatures making their saving throw may move with *slowed movement* (see Movement section, q.v.). The spell will not function in areas devoid of all vegetation. The material component is a bit of any fast-growing plant.

ESP

Casting: 1 action
Duration: 2d4 rounds + 1 round / level
Save: none

School: White
Target: Special

Components: V,S,M
Range: 60'

This spell enables the caster to read the surface thoughts of other creatures after

concentration on them for a full round. The material component is a bit of copper wire.

- ◆ Undead and mindless creatures are not affected
- ◆ The caster will understand the thoughts regardless of the target's language
- ◆ If targeting a group (say whatever creatures are behind a door) the caster will get a sense of how many there are but must spend a round focusing on a specific creature to read their thoughts.
- ◆ The spell is blocked by 2 feet of stone, two inches of metal, or a thin foil of gold or lead.

Fauna Form

Casting: 1 action
Duration: 1 hour
Save: none

School: Green Components: V,S
Range: 0'
Target: caster

The spell transforms the caster and the gear they're wearing into any natural, non-magical animal no smaller than a mouse and no larger than a hippopotamus. They may only transform once with this spell but may end the metamorphosis and revert to their natural form at any time. If they are rendered unconscious or reduced to 0 hit points they instantly revert to their true form and the spell ends. In *Fauna Form* they

- ◆ Gain the strength, armor class, locomotion, natural attacks, and senses of the creature
- ◆ May not use items transformed with them
- ◆ May not cast spells.
- ◆ Retain their normal hit points

Feather Fall

Casting: Instant
Duration: 1 min.
Save: neg.

School: Green Components: V,M
Range: 90'
Target: 3 creatures +1 creature per 2 levels of caster

This spell may be cast as an instant Combat Reaction even if the caster has already acted in this round. This spell causes naturally-falling creatures to become light as a feather and drift downwards at a leisurely rate of 60 feet per round (10 feet a second). The spell ends for a creature when they land and they suffer no damage if landing while under the spell's influence. The spell affects a number of creatures equal to 3 plus half the caster's level (i.e. 4 at 2nd level, 5 at 4th level, 6 at 6th level, etc.). The material component is a bit of down.

Feeblemind

Casting: 1 action

School: Black Components: V,S

Duration: Permanent Range: 60'
Save: neg Target: 1 creature

This curse reduces the victim's intellect and personality to that of a moronic child. Their Intelligence, Wisdom and Charisma scores drop to 3 and they cannot:

- ◆ Cast spells
- ◆ Use magical items
- ◆ Read
- ◆ Speak any except their primary language and that in only the most rudimentary manner.
- ◆ Perform any challenging mental tasks (mathematics, drawing, etc.)

Feeblemind can be removed with a *Cure Disease*, *Remove Curse*, *Heal*, *Restoration*, or *Limited Wish* spell.

Feign Death

Casting: 1 action School: Black Components: V,S
Duration: 1 hour + 1 hour / level Range: 0'
Save: none. Target: 1 creature

This spell induces in a willing target a form of catalepsy indistinguishable from death. The affected creature:

- ◆ Is aware of their surrounds and can hear and smell normally
- ◆ May not see
- ◆ May not feel anything - even damage inflicted upon them!
- ◆ Is immune to asphyxiation, level draining, paralysis, aging, death effects, or hold effects
- ◆ Is immune to poison and disease as long as they remain under the spell but will suffer normally from either in their system once the spell ends.

The duration of this spell can be programmed when it is cast to automatically end early.

Find the Path (Lose the Path)

Casting: 1 action School: n/a Components: V,S,M
Duration: 10 min. / level Range: 0'
Save: none Target: 1 creature

Find the Path enables the target to know the shortest, most direct route to any destination they seek.

Reversible: Lose the Path - The reverse of this spell afflicts the target with a

complete loss of their sense of direction and an inability to proceed towards any destination.

Fire Charm

Casting: 1 action	School: Red	Components: V,S,M
Duration: 1 min. / level	Range: 120'	
Save: none	Target: 30' diameter around 1 fire	

This spell causes a fire source to become intensely hypnotic. Any creature viewing the fire must make a WIS-modified saving throw or become utterly transfixed upon the flames. Transfixed creatures:

- ♦ Will not move or take any action other than gaze into the flames
- ♦ Are susceptible to one 12-word or less suggestion from the caster. This suggestion works just like the spell *Suggestion* and the creature is allowed a WIS-modified saving throw at -3 to avoid the suggestion.

The *Fire Charm* is broken for any creature if it is attacked or its view of the fire is blocked. The material component is a small cloth of gossamer-thin silk.

Fire Seeds

Casting: 1 action	School: Green, Red	Components: V,S,M
Duration: Special	Range: 0'	
Save: none	Target: Special	

Fire Seeds transforms berries, acorns, pine cones, or other small seeds into incendiary missiles that explode upon impact or with a verbal command from the caster. The caster can create either 4 large fire seeds or 8 small ones. *Fire Seeds* look no different than their unenchanted counterparts and remain potent for 10 minutes per level of caster.

- ♦ **Large Fire Seeds:** can be thrown up to 40 ft; inflict 2d8 points of damage; alight combustibles within 10' of target
- ♦ **Small Fire Seeds:** can be thrown up to 20ft; inflict 1d8 points of damage; ignite combustibles within 5 feet of target.

Fire Trap

Casting: 1 minute	School: Red	Components: V,S,M
Duration: special	Range: 0'	
Save: none	Target: 1 object	

Fire Trap allows the caster to lace any closable object (e.g. door, book, coffin, et. al.) with a potent trap that explodes into a 5' radius ball of fire. The *Fire Trap*:

- ♦ Does NOT harm the item that was trapped.
- ♦ Inflicts 1d4+1 points of damage per level of caster. Creatures in the blast

can make a DEX-modified saving throw to suffer ½ damage.

- ♦ Is not triggered by the caster. They may open the object without fear.
- ♦ Is difficult to disarm (DC 25) and failure triggers the trap.

The material component is a bit of saltpeter or sulphur.

Fireball

Casting: 1 action	School: Red	Components: V,S,M
Duration: instant	Range: 240'	
Save: half	Target: 20ft radius	

This spell conjures a flaming sphere that streaks from the caster's outstretched hand to violently detonate upon impact with a low roar. All creatures within the spell's blast radius suffer 1d6 points of damage per level of the caster or ½ that with a successful saving throw. The heat of a *Fireball* is great enough to alight combustibles and melt softer metals, but it has little concussive effect and will generally conform to the space in which it discharges. The material component is a pea-sized ball of bat guano and sulfur.

Fly

Casting: 1 action	School: Red	Components: V,S
Duration: 10 min. / level + 10-60 min.	Range: 0'	
Save: none	Target: 1 creature	

This spell bestows magical flight upon the subject allowing them to levitate, hover, and soar at rates up to 120' per round.

Forget

Casting: 1 action	School: Black	Components: V,S
Duration: permanent	Range: 120'	
Save: neg.	Target: Up to 6 creatures within 40'x40' area	

This spell causes up to 6 creatures in the area of effect to forget everything that has happened in the last 5 minutes per three levels of caster (5 minutes at 3rd level, 10 minutes at 6th, etc.). The caster may make targets forget less than the maximum time if he or she so wishes. A successful WIS-modified saving throw to resists the effect but it is harder if the caster is affecting fewer creatures:

- ♦ 1-2 creatures = targets save at -2
- ♦ 3-4 creatures = targets save at -1
- ♦ 5-6 creatures = targets saves normally

Memories can only be restored by *Heal*, *Restoration*, or *Limited Wish* spells.

Gate

Casting: 10 minutes

School: Black, White

Components: V,S

Duration: concentration or 1 round / level

Range: 30'

Save: none

Target: Special

With this spell the caster opens a two-way, trans-dimensional portal to another plane of existence of the caster's choosing. The gate appears as a glowing rift 5-20' in diameter through which the other plane is hazily visible. Creatures passing into the portal are transported to the other plane where an identical gate exists leading back.

Once the portal is established the caster may summon a specific creature from that plane to come through. Demons, elementals, or even gods may be summoned as long as the caster knows their true name. When the summoning is made:

- ◆ There is a 100% chance that *something* will respond and come through the portal.
- ◆ Exceedingly powerful beings (gods, arch-devils, etc.) will likely send a powerful representative in lieu of personally appearing.
- ◆ The response of the being that appears is entirely up to the GM and heavily dependent on the situation.

Gate is a very powerful spell that offers grand role-playing opportunities with incredibly high stakes. Players and GMs alike are advised to use it carefully...

Hallucinatory Terrain

Casting: 1 minute

School: Blue

Components: V,S

Duration: special

Range: 0'

Save: none

Target: 240' radius

This spell creates an apparition illusion that transforms the appearance of terrain features. Thus a barren desert could be made to look like a lush oasis or a thick copse of trees disguised as an empty glen. The illusion includes audio, visual, and olfactory elements but is completely intangible. The caster can choose one of two durations for the spell:

- ◆ 24 hours, or
- ◆ Permanent until touched by an intelligent creature.

Haste

Casting: 1 action

School: Red

Components: V,S,M

Duration: 3 rounds + 1 round / level

Range: 240'

Save: none

Target: 1 creature / level within 20' radius

Within this spell's area of effect one creature per level of caster is sped to double

their normal speed. Affected creatures:

- ◆ Armor Class and Combat Talent gain +2
- ◆ x2 movement
- ◆ Double their number of Combat attacks but NOT able to cast two spells per round.
- ◆ *Advantage* on Dexterity-based rolls.
- ◆ *Advantage* on initiative rolls.

When the spell ends the creatures affected will be overcome with fatigue and suffer as if under a *Slow* spell for time equal to how long they were hasted. A *Haste* spell negates a *Slow* spell and vice versa. The material component is a shaving of licorice root.

Heal (Harm)

Casting: 1 action	School: n/a	Components: V,S,M
Duration: permanent	Range: 0'	
Save: none	Target: 1 creature	

The caster may touch one living creature and this potent spell will restore them by:

- ◆ Healing all hit points lost
- ◆ Curing any diseases
- ◆ Curing blindness
- ◆ Removing effects like Forget or Feeblemind spells.

If *Heal* is used on an undead creature it will drain them of all but 1d4 hit points.

Reversible: Harm - The reverse of the spell, *Harm*, drains the victim of all but 1d4 hit points and inflicts a *Cause Disease* spell upon them.

Hold Monster

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: 1d6 rounds + 1 round / level	Range: 120'	
Save: neg.	Target: 1 creature or group within 20' radius	

This spell functions exactly as the spell *Hold Person* except it can affect any type of creature.

Hold Person

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: 1d6 rounds + 1 round / level	Range: 120'	
Save: neg.	Target: 1 creature or group within 20' radius	

This spell afflicts targets with a rigid paralysis that prevents all movement. The

spell only affects humanoid creatures and a successful saving throw negates the effect. The spell can target either groups or an individual.

- ◆ For groups the spell affects 1d4 randomly selected members
- ◆ For an individual they save vs *Hold Person* at -2

The material component is a small, straight metal rod.

Holy Word (Unholy Word)

Casting: 1 action	School: n/a	Components: V
Duration: special	Range: 0'	
Save: special	Target: 60' radius	

The utterance of a *Holy* or *Unholy Word* has tremendous effect on all creatures within 60' of the caster:

- ◆ Extra-planar creatures are forced to immediately flee to their native plane of existence.
- ◆ 3 or fewer hit dice - Killed outright
- ◆ 4-7 hit dice - Paralyzed for 10-40 minutes
- ◆ 8-11 hit dice - Stunned for 2d4 rounds
- ◆ 12+ hit dice - For 1d4 rounds they will be deafened, attack with disadvantage, and move at 75% speed.

Hurricane

Casting: 1 action	School: Green	Components: V,S
Duration: 1 round / level	Range: 480'	
Save: special	Target: 360' high, 360' wide, 160' deep	

This spell conjures a massive area of gale-force winds. Within the area:

- ◆ All flying creatures are dashed to the ground suffering normal falling damage and may not take flight again until the spell ends.
- ◆ Use of ranged weapons is impossible.
- ◆ Spell casting requiring gestures is impossible.
- ◆ Creatures on the ground may not move forward and must make a STR-modified saving throw to remain standing. Failure indicates they fall and tumble back 30' per round.
- ◆ Fires are put out, loose items are blown back, and less-sturdy structures such as tents are flattened. Sails and rigging on ships are destroyed.
- ◆ In deserts or other dusty areas a *Hurricane* spell renders visibility near zero for the duration and 3d6 rounds thereafter.

Hypnotic Pattern

Casting: 1 action	School: Black, Blue	Components: S
-------------------	---------------------	---------------

Duration: concentration Range: 120'
Save: neg. Target: 30' square

This spell weaves a shifting pattern of colored lights into the air. Creatures within the area of effect viewing the pattern, and failing a WIS-modified saving throw become entranced and will take no action save to stare deeply into the mesmerizing lights. The spell:

- ◆ Affects number of hit dice equal to 2d4 plus the caster's level starting with the lowest HD creatures first
- ◆ Persists as long as the caster continues to weave the pattern into the air.
- ◆ Ends for any creature that is attacked or violently shaken.
- ◆ Does not affect sightless creatures.

The material components are a bit of phosphorescent material in a clear rod or a stick of burning incense.

Insect Plague

Casting: 1 action School: Green Components: V,S,M
Duration: 10 min. / level Range: 240'
Save: special Target: 36' radius, '6 high cloud

This spell summons a writhing mass of crawling, hopping, and flying insects that swarm about the caster's enemies. Creatures within the thick hoard:

- ◆ Suffer 1d4 hp of damage per round (no saving throw)
- ◆ Can only see 30' distance
- ◆ Must make a WIS-modified saving throw to remain in the swarm. Failure indicates they flee at top speed.

The material component is a bit of smeared fat.

Invisibility

Casting: 1 action School: n/a Components: V,S,M
Duration: Special Range: 0'
Save: none Target: 1 creature or object

This spell renders one creature or one object no bigger than a man invisible. If cast upon a creature it renders them and all their gear invisible and persists until they dismiss it or attack another creature. If cast upon an object it is permanent until dispelled. The material component is an eyelash.

Invisibility, 10' radius

Casting: 1 action School: Blue Components: V,S,M
Duration: special Range: 0'
Save: none Target: 10' radius

This spell renders all creatures with its area of effect invisible just as the 2nd-level spell, *Invisibility*. Creatures can leave the area after the spell is cast and will remain invisible. One affected creature losing their invisibility does not negate the invisibility of others.

Legend Lore

Casting: special	School: White	Components: V,S,M
Duration: permanent	Range: 0'	
Save: none	Target: special	

By means of this spell a caster can gain knowledge about a legendary place, person or thing. The spell's revelations will always be cryptic in nature (riddles, anagrams, ciphers, signs, etc.). The casting time depends on the caster's physical closeness and/or personal knowledge of the target.

- ◆ The caster is close physically to target: 10-40 minutes
- ◆ The caster knows details about target: 1-10 days
- ◆ The caster knows only rumors about target: 2-12 weeks

During the casting the magician may take no actions besides eating and rest. The material components are a special incense that must be burned for the duration costing 10gp per day.

Levitate

Casting: 1 action	School: Red	Components: V,S,M
Duration: 10 min. / lvl	Range: 60'	
Save: neg.	Target: 1 creature no larger than a horse	

This ensorcellment allows the caster to move the target creature vertically up or down in the air at a rate of 20' per round. The spell does not empower horizontal movement but the affected creature could push off objects to do so. The target must not be larger than a horse. Unwilling recipients are afforded a saving throw to resist the effect.

Light (Darkness)

Casting: 1 action	School: Black, Red, White	Components: V,S
Duration: 1 hour + 10 min. / level		Range: 90'
Save: neg.	Target: special	

This is a reversible spell that can create either a sphere of light or area of darkness. Each version has three uses:

- ◆ A glowing sphere of effulgence equal to torch light or an area of pitch-black darkness. Either extends for a 15' radius, and if cast upon an object it can be carried about.
- ◆ Blinding a creature with light or darkness. Creature is allowed a saving

throw to resist

- ◆ Negating another light or darkness spell.

Lightning Bolt

Casting: 1 action

School: Red

Components: V,S,M

Duration: instant

Range: 120'

Save: half

Target: special

This spell hurls a powerful thunderbolt which causes 1d6 of damage per level of caster to all creatures in its path or ½ that amount if they make a saving throw. The bolt is powerful enough to sunder doors, shatter 1 foot of stone, alight combustibles, and melt low-melting-point metals. The bolt can be either:

- ◆ A single bolt of 5 feet wide and 20 feet long per level of caster
- ◆ A forked bolt of 10 feet wide and 10 feet long per level of caster

Note that the thunderbolt can originate from anywhere within the spell's range and need not come directly from the caster. The material component is a bit of fur and a glass rod.

Limited Wish

Casting: 1 action

School: All

Components: V

Duration: special

Range: special

Save: special

Target: special

By means of this powerful magik the caster may cause a single, one-sentence utterance to become reality and create such effects as:

- ◆ Duplicate any 6th level or lower spell of a color the caster has a talent in
- ◆ Duplicate any 4th level or lower spell of any color
- ◆ Undo the deleterious effects of spells such as *Forget*, *Polymorph Other*, *Suspend Life*, etc.
- ◆ Create another effect of similar power with those listed above.

Limited Wishes cannot provoke massive changes in reality and GMs must adjudicate their use with great care so as to not imbalance the game. A *Limited Wish* always follows the exact wording of the caster and this can prove disastrous for those who phrase them carelessly...

Locate Object

Casting: 1 minute

School: White

Components: V,S

Duration: 5 min. / level

Range: 60' + 10' / level

Save: none

Target: special

This spell allows the caster to know the direction, but not distance, of a specific object known to the caster, or a general class of objects (stairs, swords,

shrubberies, etc.). It cannot locate creatures. The material component is a bit of crystal or lodestone.

Magic Missile

Casting: 1 action	School: Red	Components: V,S
Duration: instant	Range: 240'	
Save: none	Target: one target per missile	

This magic conjures glowing bolts that fly from the caster's fingertip to unerringly strike their target causing 1d6+1 damage per missile. The missiles may be directed at multiple or a single target. For every five levels of the caster the spell generates two additional missiles (three missiles at 5-9th level, 5 missiles at 10-15, etc.).

Major Creation

Casting: 10 minutes	School: Blue, White	Components: V,S,M
Duration: 1 hour / level	Range: 0'	
Save: none	Target: special	

This spell is identical to *Minor Creation* except mineral-based objects can be created and vegetable-based objects created last for twice the duration (2 hours per level of caster).

Mass Suggestion

Casting: 1 action	School: Blue	Components: V,M
Duration: 1 hour + 1 hour / level	Range: 120'	
Save: neg.	Target: 1 creature / level	

This spell functions the same as the spell *Suggestion* except it may affect one creature per level of caster. All creatures affected must be subjected to the same suggestion.

Minor Creation

Casting: 10 minutes	School: Blue, White	Components: V,S,M
Duration: 1 hour / level	Range: 0'	
Save: none	Target: special	

This spell allows the caster to create a single object of up to 1 cubic foot in size per level of caster. The object must be non living, vegetable based (foodstuff, cloth, rope, leather, etc.), and cannot be used as the material component for another spell. The material component is a bit, however small, of the material to be created.

Mirage Arcana

Casting: 1 turn	School: Blue	Components: V,S
Duration: 12 days	Range: 480'	

Save: special

Target: 1 square mile

Mirage Arcana creates a massive shadow illusion which reshapes the terrain to anything the caster desires. (much as a *Hallucinatory Terrain* spell). As this spell is a shadow illusion the changes are partially real and the following guidelines should be observed:

- ◆ Objects added to the terrain (i.e. a bridge over a chasm) will actually exist and can be interacted with.
- ◆ Objects removed from the terrain (i.e. a copse of trees made to seem an empty field) are not actually removed but creatures failing to disbelieve will act as if they're absent.

Mirror Image

Casting: 1 action

School: Blue

Components: V,S

Duration: 1 hour

Range: 0'

Save: none

Target: 20' radius

This spell creates 1d4+1 illusory apparitions that mirror the caster's speech and actions, and shift about in a manner making it impossible for opponents to discern which is the real caster. Apparitions remain within 20' of the caster and each vanish if struck (but others will remain). All of them vanish when the spell ends.

Negate Invisibility

Casting: 1 action

School: Blue

Components: V,S

Duration: 1 hour

Range: 0'

Save: none

Target: 60' cone

This spell sends out a cone of mystical energy that permanently dispels *Invisibility* spells and renders naturally invisible creatures (spirits, ghost, etc.) visible for the spell's duration.

Neutralize Poison (Poison)

Casting: 1 action

School: Black, White

Components: V,S

Duration: permanent

Range: 0'

Save: special

Target: 1 creature or object

Neutralize Poison instantly detoxifies any venom in a creature or substance touched. It can even neutralize the poison inside a venomous creature (till such a time as it is able to recreate more). Unwilling creatures are allowed a CON-modified saving throw to resist.

Reverse: Poison - The reverse of the spell, *Poison*, requires the caster to touch the victim in combat. The victim is then allowed a CON-modified saving throw to resist. If they fail they die.

Part Water

Casting: 1 action School: Green Components: V,S,M
Duration: 1 hour + 10 min. / level Range: 120'
Save: none Target: 1 body of water

Part Water causes liquid no more than 100 feet deep to part and form a path that is 20 feet wide and up to 500 feet long. The caster may end the effect at any time.

Pass Without Trace

Casting: 1 action School: Green Components: V,S
Duration: 30 min. / lvl Range: 0'
Save: none Target: 3 creatures +1 per two levels of caster

By means of this spell a creature can traverse any terrain without leaving trail, scent, or trace of their passage. Even the freshest snow will leave nary a single imprint. The spell affects up to three creatures plus one creature for every two levels of the caster (four creatures at 2nd, five creatures at 4th, etc.).

Passwall

Casting: 1 action School: Green Components: V,S,M
Duration: 10 years / level Range: 30'
Save: none Target: special

The spell opens a 5' diameter, 10' deep passage through rock or wood. The passage closes without a trace when the spell ends ejecting anything within towards the nearest open space. The material component is a bit of sesame seed.

Phantasmal Force

Casting: 1 action School: Blue Components: V,S,M
Duration: concentration Range: 120'
Save: special Target: 20' Cube

This spell conjures a powerful phantasm illusion of anything the caster imagines as long as it fits within a 20 foot cube. The illusion will fool all senses, can move anywhere within the spell's range, and persists as long as the caster maintains concentration.

- ◆ **Illusory Attacks:** Creatures directly attacked (fireball, blinding light, web entanglement, avalanche, etc.) get an immediate saving throw to disbelieve. Failure indicates they react as if the attack were real and can take illusory "damage" up to 1d6 per level of caster per round. If this "damage" reduces their hit points below zero they pass out for 3d6 minutes. Upon waking or the spell's end, all illusory damage vanishes.
- ◆ **Illusory Monsters:** *Phantasmal Force* monsters can attack and inflict "damage" that works just like that of a direct illusory attack. The

monsters attack with the casters Combat Talent skill. Targets do not get a saving throw unless they have reason to doubt the monsters' authenticity. This means the caster must be careful to have them exist and behave as they would in real life. A dragon suddenly appearing in a tavern or an orc that is immune to arrows will not be convincing illusory opponents.

Phantom Image

Casting: 1 action	School: Blue	Components: V,S,M
Duration: 10 min.	Range: 60'	
Save: Special	Target: 5-yard cube	

This spell creates a visual-only, apparitional illusion with no auditory, olfactory, or other sensory elements. The illusion can be of anything the caster wishes as long as it fits within the spell's 15 foot cube, and can be moved anywhere within the spell's range. It can generate light equal to a torch, and complete darkness. The illusion can be manipulated by the caster during the spell or it can be pre-programmed to do a specific set of simple actions. The material component for this spell is a bit of fleece.

Plane Shift

Casting: 1 action	School: Black, White	Components: V,S,M
Duration: permanent	Range: 0'	
Save: special	Target: Up to seven creatures	

This spell instantly shifts up to seven creatures to a different plane of existence. All creatures must be in physical contact with each other (e.g. holding hands). The caster may also use the spell on an unwilling target. They must successfully touch the target in combat and the target is allowed a WIS or INT modified saving throw to avoid the effect. The material component is a special tuning fork calibrated to the frequency of the plane the targets are to be sent to.

Polymorph Other

Casting: 1 action	School: Black, Blue	Components: V,S,M
Duration: permanent	Range: 120'	
Save: neg.	Target: 1 creature	

This spell transforms one creature into another creature no smaller than a mouse nor larger than an elephant. The target is allowed a WIS-modified saving throw to negate the effect. The new creature cannot be:

- ◆ One with more than 1.5 times the caster's level in hit dice
- ◆ Non-corporeal (a ghost, a mist-creature, etc.)
- ◆ An exact duplicate of another creature (a dog can be turned into a man but not into a specific man).

The polymorphed creature has:

- ◆ The attributes (including mental ones), hit points, and abilities of the new form
- ◆ Physical limitations of the new form (a sorceress turned into a frog can't cast spells)
- ◆ Their gear melded into the new form and thus unusable
- ◆ Their original personality

The spell lasts until dispelled or the creature is reduced to 0 hit points. If the transformed creature's original form had more hit points than the polymorphed one it reverts back alive with its remaining hit points intact. If its original form had few hit points, it reverts back dead. The material component is a caterpillar cocoon.

Polymorph Self

Casting: 1 action

Duration: 1 hour + 10 min. / level

Save: none

School: Blue, Green

Range: 0'

Target: caster

Components: V

For the duration of this spell the caster can transform themselves into any other creature as small as a mouse or as large as an elephant. Each change takes 1 full round of action. If the caster is knocked unconscious or reduced to zero hit points the spell instantly ends and they revert to their true form. If they are alive when the spell ends they recover 1d12 lost hit points.

The new form cannot be:

- ◆ One that has more hit dice than the caster has level
- ◆ Non-corporeal (a ghost, a mist-creature, etc.)
- ◆ An exact duplicate of a specific creature (an old wizard may turn himself into a fair maiden but not a specific fair maiden).

In the new form the caster:

- ◆ Retains all mental attributes and faculties.
- ◆ Retains their hit points.
- ◆ Gains the physical attributes, armor class, locomotion, and any non-magical physical abilities of the new form (e.g. if transformed into a fish they can breath under water, but if transformed into a dragon they can't breath fire).
- ◆ May not, depending on the form, cast spells
- ◆ May not use any personal gear as it is transformed with them

Projected Image

Casting: 1 action

Duration: 1 hour

School: Blue

Range: 240'

Components: V,S

Save: none

Target: special

This spell creates an intangible apparition illusion of the caster anywhere within the spell's range. This illusory duplicate is indistinguishable from the caster; includes visual, audible, and olfactory elements; and can be made to move and talk as the caster wishes. Additionally, the spell creates a special link whereby:

- ◆ The caster can see and hear everything as if they were in the image's location
- ◆ The caster's spells can be made to originate from the image

Protection from Normal Missiles

Casting: 1 action

School: White Components: V,S

Duration: 2 rounds / level

Range: 0'

Save: none

Target: caster

This spell girds the caster with complete immunity to normal, non-magical missiles no larger than a javelin. Such projectiles lose all velocity mere inches from the caster and drop harmlessly to the ground.

Purify Food & Water (Putrefy Food & Water)

Casting: 1 action

School: Black, White Components: V,S,M

Duration: permanent

Range: 30'

Save: none

Target: special

This spell renders poison, spoiled, or otherwise fouled food suitable to be consumed. It may affect up to:

- ◆ 6 quarts of drink
- ◆ One trail ration
- ◆ A quantity of food for 12 man-sized beings

Reverse: Putrefy Food & Water - This spell contaminates and makes foul food and water in the same portions as its counterpart.

Pyrotechnics

Casting: 1 action

School: Red Components: V,S

Duration: Special

Range: 60'

Save: none

Target: 100 or 10 times fire source

This spell transforms any fire into either a choking cloud of smoke, or an aerial display of fiery, blinding fireworks. In both cases, the fire is extinguished at the end of the spell.

The choking cloud

- ◆ Fills an area 100 times the size of the fire source

- ◆ Obscures all vision beyond 2 feet
- ◆ Last 1 minute per level of caster

The fireworks

- ◆ Fill an area 10 times the size of the fire source
- ◆ Blind all creatures within 120' who have a direct view of them for the spell's duration
- ◆ Last one round per level of caster

Quest (~~Remove Quest~~)

Casting: 1 action	School: Black, White	Components: V,S
Duration: special	Range: 60'	
Save: none	Target: 1 creature	

This magic compels a creature to perform a service for the caster and return with proof of its completion. A *Quest* can be dangerous but it cannot be intentionally self-destructive to the target. Targets are allowed a WIS-modified saving throw to resist the effect. Targets delaying, disregarding, or perverting the clear intent of a *Quest* spell suffer any number of effects at the GM's discretion such as:

- ◆ Harassment or attack by supernatural creatures
- ◆ *Disadvantage* or Talent rolls
- ◆ A sickness that reduces one of their attributes by one point per day (e.g. hideous boils reducing Charisma, terrible nightmares reducing Constitution, etc.)

Reverse: *Remove Quest* - The reverse of the spell, *Remove Quest*, can nullify the effects of a *Quest* spell on a target.

Raise Dead (~~Slay Living~~)

Casting: 1 action	School: Black, White	Components: V,S
Duration: permanent	Range: 30'	
Save: special	Target: 1 creature	

With this miraculous spell the caster can restore life to a deceased creature no larger than twice a man's size. The target:

- ◆ Cannot have been dead for more than one day per level of the caster
- ◆ Must have an intact body (*Raise Dead* does not restore lost body parts)
- ◆ Must make a CON-modified saving throw to survive the ordeal with failure indicating they immediately die again.

The creature restored will be weak and unable to travel, cast spells, or engage in any strenuous activity for one day for every day they were dead. If *Raise Dead* is cast upon an undead creature they must make a WIS-modified saving throw or be

destroyed.

Reverse: *Slay Living* - The spell's reverse, *Slay Living*, strikes a living creature instantly dead if they fail a CON-modified saving throw.

Ray of Enfeeblement

Casting: 1 action School: Black Components: V,S
Duration: 1 hour / level Range: 60'
Save: neg. Target: 1 creature

This spell sends forth a sickly gray ray that inflicts a great weakness on single creatures failing a CON or DEX-modified saving throw. Such creatures:

- ◆ Make all strength-based rolls with *disadvantage*
- ◆ Inflict ½ damage with all melee weapons.

Reincarnation

Casting: 1 action School: Black, White Components: V,S,M
Duration: permanent Range: 0'
Save: none Target: 1 creature

This spell summons the life force of a recently deceased creature back as a new form. The caster must touch the corpse of the deceased and they must not have died more than one day per level of caster. Within 1d6 turns the new incarnation will appear.

The new incarnation will have a 75% chance of recalling any specific fact from their previous life and will retain much of their personality. The new form will tend to rhyme with the original creature's disposition and have the same gender. Thus, a boorish, overbearing man might be reincarnated as a swine, toad, or bull, whilst a gentle maiden might be reborn as a lamb, doe, or dainty poodle. To determine the general type of reincarnation that takes place roll d100:

00-60 - Very similar to the original creature (a human to another humanoid, a horse to another pack animal, etc.)

61-95 - Different but non-magical creature (a human to a badger, a horse to a man)

96-00 - Wildly different magical creature (a human to a griffin, and dog to a dragon)

Once the general type has been determined, the GM may randomly determine the specific result by a method of their own choosing.

Regenerate (Rot)

Casting: 1 turn School: Green, White Components: V,S

Duration: permanent Range: 0'
Save: none Target: 1 creature

The recipient of this potent spell must be a living creature. If so, the spell:

- ◆ Regrows all lost organs or appendages
- ◆ Mends all broken bones
- ◆ Repairs any mangled limbs.

Broken bones and mangled limbs are repaired instantly. Severed body parts are made whole in 1 round if they are available for reattachment and 20-80 minutes if they need to be wholly regrown.

Reverse: Rot - The reverse of this spell causes a touched limb to instantly wither, become useless, and fall off as a festering mass in 2d4 rounds. *Rot* requires a successful hit in Combat.

Remove Curse (Curse)

Casting: 10 minutes School: Black, White Components: V,S
Duration: permanent Range: 0'
Save: none/Neg. Target: 1 creature, place, or object

This spell allows the caster to dispel a magical curse placed upon a creature, place, or object. It will not permanently disenchant cursed magical items but it will allow a character to be rid of them.

Reverse: Curse - *Curse* can inflict a wide range of woeful effects upon targets. Targets are allowed a WIS-modified saving throw to resist. Example curses include:

- ◆ **Curse of Deafness** - As *Weak Ears* disadvantage
- ◆ **Curse of Blindness** - As *Weak Eyes* disadvantage
- ◆ **Curse of Ill Luck** -2 on all saving and reaction rolls, *disadvantage* on all gambling rolls.
- ◆ **Curse of Boils** - unsightly boil reducing CHA by 5
- ◆ **Curse of Tremors** - constant shakes reduce DEX by 4
- ◆ **Curse of Wasting** - Character's STR reduced by 4
- ◆ **Curse of Infirmary** - lingering illness reduces CON by 4
- ◆ **Curse of Flies** - Swarms of flies gather wherever character goes. CHA reduced by 2; reactions at -2; many places will refuse character entry (taverns, palaces, etc.)

Alternative curses should be of similar power to those listed above.

Remove Fear (Cause Fear)

Casting: 1 action School: Black, White Components: V,S,M

Duration: permanent or 1 min. / level
Save: none/neg.

Range: 0'

Target: 1 creature

This spell instills bravery in one creature as follows:

- ◆ Permanently removes all magical fear effects a creature is currently suffering
- ◆ Grants them advantage on saving throws vs fear for the spell's duration
- ◆ Grants them +3 on Morale rolls for the spell's duration.

Reverse: Cause Fear - This spell causes the victim to flee from the caster at maximum speed for the spell's duration. The target is allowed a saving throw to resist.

Repulsion

Casting: 1 action

School: Red, White

Components: V,S,M

Duration: 1 round / lvl

Range: 0'

Save: none

Target: Special

The spell creates an unseen field that causes any creature entering it to be moved backwards at a speed of 30' per round or the speed at which the creature entered the field - whichever is greater. The field may either be:

- ◆ An immobile 10'x10' area directly in front of the caster
- ◆ A globe surrounding the caster at 5' that moves with them.

Note that creatures entering the field will continue to be moved backwards for the duration of the spell even if they are out of its area of effect. *Repulsion* only affects creatures and has no effect on missiles. The material component is a pair of small lodestones.

Resist Cold

Casting: 1 action

School: Green, White

Components: V,S,M

Duration: 10 min. / lvl

Range: 0'

Save: none

Target: 1 creature

This spell inures one creature and their possessions to extreme cold. Even nude they can comfortably withstand zero degrees Fahrenheit. They make saving throws against cold-based attacks with *advantage* and any damage taken from such attacks is reduced by 1 point per die.

Resist Fire

Casting: 1 action

School: Red, White

Components: V,S,M

Duration: 10 min. / lvl

Range: 0'

Save: none

Target: 1 creature

This spell protects one creature and their possessions from extreme heat. They may handle hot pokers, stand in large bonfires, or transverse beds of hot coals all with indifference. Against fire-based attacks they make saving throws with *advantage* and any damage taken from such attacks are reduced by 1 point per die.

Resurrection (Annihilation)

Casting: 10 minutes	School: n/a	Components: V,S,M
Duration: permanent	Range: 0'	
Save: none	Target: 1 creature	

This spell functions as a *Raise Dead* spell with the following exceptions:

- ◆ The subject is immediately restored to full health and vigor.
- ◆ Any lost or damage body parts are restored
- ◆ The subject can be dead for 10 years per level of caster
- ◆ Only the scantest of remains of the subject are needed to resurrect them.

Resurrection is exceedingly taxing on the caster and will leave them weak and bedridden for 1 day per level of the subject resurrected (no travel, combat, or spell casting, etc.).

Reverse: Annihilation - The reverse of this spell, Annihilation, causes the target to instantly die and turn to dust. It requires a successful hit in combat

Rust

Casting: 1 action	School: Green, Red	Components: V,S,M
Duration: permanent	Range: 120'	
Save: neg	Target: special	

A *Rust* spell causes all metal on a single creature, or single object no larger than 10 cubic feet, to instantly disintegrate into fine rust. It has no effect on non-metallic materials. The GM may rule that certain extraordinary metals (mithral, adamant, impervium, duralloy, etc.) are immune to the spell's effect.

Scrying

Casting: 1 minute	School: White	Components: V,S,M
Duration: special	Range: 0'	
Save: none	Target: special	

This spell functions exactly like the spell *Clairvoyance* except that it allows a caster to see and hear a creature over any distance and even into other planes of existence. The results are viewed on still water, a crystal, a veil of mist, etc. and may be made visible for others to see and hear. **The target may make a WIS-modified saving throw to prevent the scrying and if successful the spell fails and**

may not be attempted on that creature again for 24 hours.

TODO: scrying table

Shadowes

Casting: 1 action	School: Black, Blue	Components: V,S
Duration: 1 round / lvl	Range: 120'	
Save: special	Target: 20' cube	

This spell is identical to the spell *Shadow Monsters* except the monsters created:

- ◆ Have 60% of their normal hit points
- ◆ Inflict only 60% of their normal damage
- ◆ Have an Armor Class of 4
- ◆ Have 60% of the real creature's strength

Shadow Monsters

Casting: 1 action	School: Black, Blue	Components: V,S
Duration: 1 round / lvl	Range: 120'	
Save: special	Target: 20' cube	

This spell creates a shadow illusion of a monster or group of monsters. The monsters can be anything the caster imagines but all must be of the same kind and cannot exceed one hit die per level of caster (thus, a 10-level caster could create one 10HD monster or ten 1HD monsters). Monsters must be created within a 20ft cube but then can move anywhere within the spell's range.

Creatures attacked by the shadow monsters are allowed a saving throw to disbelieve. If they fail, the monsters, including any special attacks they may have, are 100% real to that creature.

If the creature successfully disbelieves, or against undead and unintelligent creatures, the shadow monsters:

- ◆ Have no special attacks
- ◆ Have 20% of their normal hit points
- ◆ Inflict only 20% of their normal damage
- ◆ Have an Armor Class of 0
- ◆ Have 20% of the real creature's strength

In either case all shadow monsters take double damage from silver weapons. The monsters can also perform basic non-combat tasks (opening doors, carrying a torch, etc.) but perform these at 20% of their real-world counterpart's strength.

Shield

Casting: 1 action
Duration: 30 min.
Save: none

School: White Components: V,S
Range: 0'
Target: caster

This spell invokes an invisible barrier around the caster that provides +5 to their armor class and negates *Magic Missiles* entirely.

Silence 15' Radius

Casting: 1 action
Duration: 2 rounds / lvl
Save: special

School: n/a Components: V,S
Range: 120'
Target: 15' radius

This spell completely dampens all sounds originating within a 15' radius but has no effect on sounds originating from without. Thus, a character within it cannot make noise themselves by talking, walking, or dropping a bag of hammers, but they can hear noises made beyond the spell's effect. The spell:

- ◆ Blocks spells with verbal components from being cast within its affected area
- ◆ May be cast upon an area or a creature. A creature is allowed an INT or DEX-modified saving throw. If they are successful, the spell takes effect directly adjacent to them and they may move out of its area.

Simulacrum

Casting: 8 hours
Duration: permanent
Save: none

School: Black, Blue Components: V,S,M
Range: 0'
Target: 1 creature

Simulacrum creates a permanent shadow illusion duplicate of any other creature. The duplicate is created over a period of 8 hours and must incorporate some small bit of the original creature. It is most often formed from snow and ice but some versions of the spell utilize a large alchemical vat. The duplicate loyally serves the caster and obeys their verbal commands. The duplicate appears identical to the original and has their speech and personality but:

- ◆ Has only 50% of their hit points
- ◆ Has only 50% of their abilities or levels with talents.
- ◆ Has only a 30% chance of recalling any specific memory from the original
- ◆ Cannot increase in levels
- ◆ Cannot heal
- ◆ Cannot regain spells or special abilities used (e.g. a duplicated dragon could breathe fire thrice but never again)

A duplicate can be repaired and regain its special abilities by having *Simulacrum*

recast upon it which takes only 1 hour. A simulacrum brought to 0 hit points instantly reverts to its base chemicals and dissolves.

Note that if a *Reincarnate* spell is cast upon a *Simulacrum*:

- ◆ It will gain a genuine life force
- ◆ It will be able to heal and regain special abilities normally
- ◆ Have its chance of recalling the original's memories increased to 75%
- ◆ It has a 25% chance of becoming independent minded with a new personality and no longer under the caster's control. The caster will have no way of determining if this has occurred.

Sleep

Casting: 1 action	School: Black	Components: V,S,M
Duration: 10 min. / lvl	Range: 90'	
Save: none	Target: special	

This spell causes a magical slumber to overcome the creature(s) affected. The spell cannot affect undead or any creature that does not normally sleep. It can target either:

- ◆ One creature with 4+1 or less hit dice or
- ◆ 2d8 creatures with 4 HD or less

If targeting a group of mixed hit dice, the weakest are affected first. Creatures affected by sleep can be killed instantly with edged weapons or awoken with one round of slapping, shaking, etc. Material components are a bit of sand, or wool, or rose pedals.

Slow Spell

Casting: 1 action	School: Black	Components: V,S,M
Duration: 3 rounds + 1 round / level	Range: 240'	
Save: neg.	Target: 1 creature / level within 20' radius	

Within this spell's area of effect one creature per level of caster is slowed to half their normal speed. Affected creatures suffer:

- ◆ Armor Class and Combat Talent suffer -2
- ◆ *Slowed movement* (see Movement section, q.v.)
- ◆ May move OR attack in combat but not both, and can never make more than one attack per round.
- ◆ *Disadvantage* on rolls requiring speed.
- ◆ *Disadvantage* on initiative rolls.

A *Slow* spell is countered by a *Haste* spell and vice versa. The material component is a bit of treacle or the shell of a snail.

Speak with Animals

Casting: 1 action School: Green Components: V,S
Duration: 10 min. Range: 60'
Save: none Target: caster

The spell allows a caster to converse with normal, non-magical animals within range. Furthermore, these animals will consider the caster friendly for the spell's duration, will not attack the caster, and may help them if properly persuaded.

Speak with Plants

Casting: 1 action School: Green Components: V,S
Duration: 10 min. Range: 0'
Save: none Target: caster

This spell enables the caster to converse with plants within the spell's range.

- ♦ **Normal plants** can only communicate in the most rudimentary form but will help the caster if they're able (providing information on creatures who've passed by them, parting to allow easy passage, etc.)
- ♦ **Unintelligent, Monstrous plants** will regard the caster as friendly for the spell's duration, and will not attack. They may help the caster if properly persuaded.
- ♦ **Sentient plants** may be communicated with but the spell has no effect on their disposition towards the caster.

Spell Fork

Casting: Instant School: Red Components: V,S
Duration: special Range: 240'
Save: special Target: 1 ranged spell

This spell may be cast as an instant Combat Reaction even if the caster has already acted in this round. This spell creates a duplicate of any one ranged spell that is 5th level or lower as it is being cast but may NOT duplicate one of the caster's own spells. The duplicate spell:

- ♦ Is identical to the original in effect and uses the original caster's stats for damage, duration, etc.
- ♦ Is under the control of the *Spell Fork* caster for determining target or any other options.

Spider Climb

Casting: 1 action School: Green Components: V,S,M
Duration: 1 hour Range: 0'
Save: none Target: 1 creature

Spider Climb enables the creature affected to transverse vertical surfaces just like a

spider. This locomotion is done at normal walking speed, does not require the use of their hands, and allows them to even hang upside down on ceilings. Creatures under the effect of *Spider Climb* are immune to entanglement by the *Web* spell and may travel along its strands at walking speed. The material component is the leg of a spider wrapped in bitumen.

Sticks to Snakes (Snakes to Sticks)

Casting: 1 action School: Green Components: V,S
Duration: 2 rounds / level Range: 30'
Save: none Target: 30' diameter

Sticks to Snakes transforms 1 stick into a snake for every level of the caster. The snakes will follow the caster's mental commands. The sticks:

- ◆ Must be at least as large as an arrow
- ◆ Cannot be magical in nature (e.g. wands, magic spears, etc.)
- ◆ Have a chance of becoming a venomous snake equal to 5% per level of caster

Reverse: *Snakes to Sticks* - The reverse will turn 1 snake into a plain stick for the duration of the spell. Each serpent is allowed a WIS-modified saving throw to avoid the effect.

Stinking Cloud

Casting: 1 action School: Green, Red Components: V,S,M
Duration: 1 round / lvl Range: 30'
Save: special Target: 20' diameter cloud

This spell creates a billowing cloud of foul, noxious vapors. Creatures within must make a CON-modified saving throw or be rendered helpless with nausea for 1d4+1 rounds. Those successfully saving are helpless only as long as they remain in the cloud and for 1 round after emerging. The material components are a bit of rotten egg or skunk cabbage.

Suggestion

Casting: 1 action School: Blue Components: V,M
Duration: 1 hour + 1 hour / level Range: 120'
Save: neg. Target: 1 creature

This hypnotic charm causes a creature to comply with a suggestion from the caster. Suicidal or obviously self destructive suggestions will be ignored unless they are very carefully worded. Creatures making a successful saving throw are unaffected but the GM can make the saving throw more difficult for particularly reasonable or convincing suggestions. *Suggestion* does not impart any special language ability and it cannot affect undead or mindless creatures. The material

component it a bit of honey or a snake's tongue.

Suspend Life

Casting: 1 action School: Black Components: V,S
Duration: 10 years / lvl Range: 0'
Save: neg. Target: 1 creature

This spell functions exactly as *Feign Death* save that it may be cast on unwilling targets and during the spell the target is entirely unconscious and unaware of their surroundings. An unwilling target must be touched with a successful combat roll and is allowed a CON-modified saving throw to resist. The target's body and any possessions on it will not decay, diminish, or fade in any way. The caster may set the spell to end at a predetermined time earlier than its duration or to end when a specific set of actions occur to the target (a brass bell is rung in their presence, they're kissed by a prince, etc.).

Symbol

Casting: 1 action School: Black, White Components: V,S,M
Duration: 10 min. / lvl Range: 0'
Save: none Target: special

This spell enables the caster to scribe one of three glowing sigils that hang in the air and have a powerful effect upon any creature viewing them and failing a WIS-modified saving throw. The symbols and their effects are:

- ◆ **Pain** - Creatures are wracked with pain and make all attack and/or DEX-modified rolls with disadvantage. This effect lasts for 2d10 turns.
- ◆ **Persuasion** - Creatures become charmed as a *Charmed Person* spell and adopt the general inclinations of the caster. This effect lasts for 2d10 turns.
- ◆ **Hopelessness** - Creatures become despondent and surrender for 3d4 turns.

Telekinesis

Casting: 1 action School: Red Components: V,S
Duration: 2 rounds / lvl Range: 120'
Save: none Target: special

Telekinesis allows the caster to magically move objects up to 200 lb. per level .
This spell:

- ◆ Can only affect one object at a time.
- ◆ Can be move objects up to 60' per round
- ◆ Allows unwilling creatures to make a WIS-modified saving throw to escape the effect.
- ◆ Allows the caster to telekinetically fight with weapons using their

normal combat talent.

- ♦ Can perform any task the caster could with their own hands save those requiring very fine, delicate work (picking locks, sewing, etc.).

Teleport

Casting: 1 action

School: Red

Components: V

Duration: instant

Range: 0'

Save: neg

Target: caster and 1 other creature per 4 levels

This spell instantly transports the caster and whatever they're carrying to another location. The location must be familiar to the caster and must be on the same plane of existence. The caster may bring with them 1 additional creature for every 4 levels they have (2 at 8th, 3 at 12th. etc.). Unwilling creatures are allowed a saving throw to resist. *Teleport's* accuracy depends on the caster's familiarity with the destination. Teleporting to vaguely known locations is a perilous endeavor indeed!

Caster Knowledge of Target	On Target	Nearby	Lost	Disaster
Exacting	0-97	98-99	00	-
Casual	0-80	81-85	86-89	91-00
Magically Viewed	0-65	66-75	75-85	86-00
Scant	0-50	51-65	66-75	76-00

- ♦ **On Target** = caster appears exactly where they desired.
- ♦ **Nearby** = caster appears near to target. GM randomly determines location.
- ♦ **Lost** = Caster appears wildly off target (completely different town, middle of unknown forest, etc.)
- ♦ **Disaster** = Roll a 6d to see where caster appears:
1-4 - too high in the air (d100 feet)
5-6 - inside solid space. Make an INT-modified saving throw to be shunted to the nearest vacant area. Failure indicates death.

Tongues (Gibberish)

Casting: 1 action

School: Black, White

Components: V,S

Duration: 10 min.

Range: 0'

Save: none

Target: 60' radius

This spell enables the caster to speak and understand all languages spoken within the spell's area of effect.

Reverse: Gibberish - The reverse of this spell, *Gibberish*, either canceled a *Tongues* spell or renders all languages within the area of effect unintelligible.

True Seeing

Casting: 1 action	School: White	Components: V,S,M
Duration: 10 min. / lvl	Range: 0'	
Save: none	Target: caster	

This spell reveals the true nature of all things the caster views. Thus, illusions become transparent, hidden doors apparent, invisible and out-of-phase objects visible, and polymorphed/shape-changed creatures discernible for what they really are. Furthermore, the caster's vision is unobstructed by darkness, vapors, or other similar impediments. The material component is a special ointment that is rubbed in the eyes.

Vampiric Grasp

Casting: 1 action	School: Black	Components: V,S
Duration: instant	Range: 0'	
Save: none	Target: 1 creature	

This spell allows the caster to leech off hit points from another creature and transfer them to themselves. The caster must touch the target creature and the spell will not affect undead or non-living creatures.

- ◆ Caster must touch target with Combat roll
- ◆ Struck targets suffer damage equal to 1d4 hit points plus 1 additional hit point per two levels of caster (1d4+1 at 2nd level, 1d4+2 at 4th level, etc.). This damage will heal normally.
- ◆ Caster gains hit points equal to damage inflicted
- ◆ Hit points that caster gains that exceed their natural total vanish in 1 hour.

Vampiric Transfusion

Casting: 1 minute	School: Black	Components: V,S
Duration: permanent	Range: 0'	
Save: neg	Target: 2 living creatures	

This spell allows the caster to perform the following transference between two living creatures he or she is in contact with:

- ◆ Transfer 2d8+2 hit points, or
- ◆ Transfer a disease

Each unwilling creature is allowed a CON or WIS-modified saving throw and if either succeeds the spell fails.

- ◆ Hit points lost via *Vampiric Transfusion* are treated as damage and will

heal normally.

- ◆ Hit points transferred cannot exceed the current HP of the creature they're coming from.
- ◆ Hit points a creature gains from this spell that exceed their natural total vanish in 1 hour.

Veil

Casting: 1 action	School: Blue	Components: V,S
Duration: 1 min. / level	Range: 120'	
Save: none	Target: 20'x20' per level	

Veil creates a phantasm illusion which changes the appearance of everything, and all creatures, within the spell's area of effect to whatever the caster desires.

Creatures' changed appearance:

- ◆ Remains even if they leave the spell's area of effect.
- ◆ Ends if they're killed or rendered unconscious.

Veil is similar to a combination of *Hallucinatory Terrain* and *Visage* spells, but as it is a phantasm creatures will act as if all changes are completely real unless they successfully disbelieve the illusion. *Veil* can disguise creatures as specific other creatures (a specific king, a specific maiden, etc.) functioning like the Disguise Talent at a level equal to the caster's spell-casting level.

Visage

Casting: 1 action	School: Blue	Components: V,S
Duration: 1 hour	Range: 90'	
Save: neg.	Target: 1 creature	

This spell enables the caster to alter the appearance of one humanoid creature, including their equipment and clothing. The new form must be generally man-shaped and bipedal, and no more than 1' shorter or taller, but otherwise can take on any appearance. The changes are wholly illusory and will not stand up to physical inspection (e.g. a hat made with this spell will allow rain to pass right through it). Unwilling recipients of the spell are allowed a saving throw to negate the effect. *Visage* can disguise creatures as specific other creatures (a specific king, a specific maiden, etc.) functioning like the Disguise Talent at a level equal to the caster's spell-casting level.

Vision

Casting: 1 hour	School: White	Components: V,S,M
Duration: 1 min.	Range: 0'	
Save: none	Target: caster	

By means of this spell the caster is able to invoke a revelatory vision about any

place, person, or thing of their choosing. For the spell to function the caster must sacrifice an item of at least 300gp value. To determine the result of the vision the caster rolls 2d6:

2-5 - The vision strikes monomania into the caster forcing them to take up a *Quest* (as per the spell) of the GM's choosing. This *Quest* will likely be related to the subject of the vision.

6 - 11 - The vision is vague and grants cryptic, incomplete knowledge of the subject.

10-12 - The vision is clear and grants detailed knowledge of the subject.

Wall of Fire

Casting: 1 action

School: Red

Components: V,S

Duration: concentration or 1 round / level

Range: 120'

Save: none

Target: special

This spell calls forth an opaque, blazing wall of magical fire. The wall lasts as long as the caster maintains concentration on it or 1 round per level if they cease concentration. The wall may either be:

- ◆ A stationary wall of up to 20 feet square per level, or
- ◆ A ring of fire that surrounds and moves with the caster with a 5ft radius per level and a height of 20 feet.

The wall inflicts:

- ◆ 4d4 +1 per level of caster to creatures passing through it
- ◆ 2d4 to creatures within 10' of the wall's outside
- ◆ 1d4 to creatures within 20' of the wall's outside
- ◆ Double damage on undead or shadow creatures

If the wall is created where a creature exists it is allowed a saving throw to remain on the side of the wall it wishes. If it fails, the caster decides which side it remains on.

Wall Of Force

Casting: 1 action

School: Red, White

Components: V,S,M

Duration: 10 min. + 1 min. / level

Range: 30'

Save: none

Target: special

This spell conjures an immobile, invisible wall of nearly indestructible force. The wall can be of any rough shape up to 20 square feet per level of caster in size. It can be created floating in mid-air but must be created within a vacant space. It is immune to spells and all physical attacks, and extends to the ethereal plane, but

can be destroyed by a *Dispel Magic* or *Disintegrate* spell. If the wall is created where a creature exists it is allowed a saving throw to remain on the side of the wall it wishes. If it fails, the caster decides which side it remains on. The material component is a bit of diamond dust.

Wall of Ice

Casting: 1 action	School: Green	Components: V,S,M
Duration: 10 min. / lvl	Range: 120'	
Save: none	Target: special	

This spell conjures a translucent, immobile pane of thick, durable ice. The wall can be of any rough shape up to 1200 square feet in size but must be created upon a vacant, solid surface. If the wall is created where a creature exists it is allowed a saving throw to remain on the side of the wall it wishes. If it fails the caster decides which side it remains on. The material component is a bit of quartz.

Wall of Thorns

Casting: 1 action	School: Green	Components: V,S,M
Duration: 10 min. / lvl	Range: 120'	
Save: none	Target: special	

This spell conjures a tough, pliant hedge bristling with needle-sharp thorns as long as a man's finger. The wall must be created upon a vacant, solid surface and can either be:

- ◆ 60' long, 10' high, and 5' thick or
- ◆ A circle that is 20' in diameter, 20' high, and 5' thick

The wall's dense brush blocks vision and inflicts 1d8 points of damage per two levels of caster on any creature impacting it (DEX-modified saving throw for half damage). Creatures attempting to move through the wall must make a Strength attribute check (DC 15) each round. Failure indicates they've become entangled and unable to move for that round. Success indicates they advance up to 2'. If the wall is created where a creature exists it is allowed a saving throw to remain on the side of the wall it wishes. If it fails, the caster decides which side it remains on.

Water Breathing

Casting: 1 action	School: Green	Components: S,M
Duration: 1 hour / lvl	Range: 60'	
Save: none	Target: 2 creatures per level of caster	

This spell bestows the ability to breath water upon two creatures per level of caster. Creatures must be within the spell's area of effect to be enchanted but can venture anywhere once it takes effect. The spell may also be used to bestow air breathing on aquatic creatures. The material component is a small hollow reed.

Web

Casting: 1 action
Duration: 1 hour
Save: neg.

School: Green Components: V,S,M
Range: 60'
Target: 20' cube

This spell conjures a mass of fibrous, sticky webbing. Creatures in the area of effect, or attempting to move through it, must make a DEX-modified saving throw or be entangled. Entangled creatures cannot move but may make a strength attribute check (DC 20) each minute to escape. The web is highly flammable and if set alight will burn away in two rounds inflicting 2d4 on creatures trapped within it. The material component is a bit of spider web.

Wizard Eye

Casting: 1 minute
Duration: 1 hour
Save: none

School: White Components: V,S,M
Range: 240'
Target: special

This spell creates a floating, invisible eye the caster can see through. The *Wizard Eye* can see with normal sight and *Darksight* (as the spell). The caster can direct the eye to move in any direction at 120' per round and can pass through holes as small as 1" wide. The material component is a bit of bat fur.

Wizard Lock / Wizard Knock

Casting: 1 action
Duration: Permanent
Save: none

School: Black, White Components: V,S
Range: 0'
Target: 1 door, chest, gate, etc.

This reversible spell either closes and seals or opens and unseals a single door, gate, chest, etc. Locked items can be opened without breaking the spell by the caster or any other character who has the Wizardry talent at three levels higher than the caster. (Thus, a character with 7th level in Wizardry could open a door locked by a 4th level caster). *Wizard Lock* and *Wizard Knock* can be used to cancel each other out.

Word of Recall

Casting: 1 action
Duration: instant
Save: none

School: Black, White Components: V
Range: 0'
Target: special

When the *Word Of Recall* is uttered the caster is instantly transported back to their sanctuary. The sanctuary must be a well-known place but can be of any distance away. *Word Of Recall* is unfailing accurate and the caster may bring with them an additional 25 lb. per level or items or creatures.

Appendices

Characters Archetype Presets

In this section you'll find a bevy of templates useful for both players creating characters and GMs needing NPCs for a game. The archetypes are guidelines, not strictures and all players should feel free to experiment with variations upon them.

♠ Fighter

The standard fighter is a straight-ahead, no-frills combatant. Their ranks are filled with knights, soldiers, gladiators, and the like.

Class: Fighter

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Combat Specialization	Core/Common x1
3	Durability	Core/Common x1
5	Medical	Core/Common x1
7	Attribute Increase (STR, DEX, or CON)	Core/Common x1
9	Stronghold	Core/Common x1

♠ Barbarian (Mountains)

Barbarians are hearty fighters that live in fringe society away from major civilizations. They're generally uncouth and uneducated, but more self sufficient and inured to hardship than their civilized counterparts.

Class: Fighter

Alignment: any

Disadvantages: Uneducated

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Durability	Core/Common x1
Disad 1	Survival & Tracking	Core/Common x1
3	Alertness	Core/Common x1
5	Climbing	Adjacent x1/2
7	Stealth	Adjacent x1/2
9	Stronghold	Core/Common x1

♠ Barbarian (plains)

A variant on the barbarian that is particularly skilled in horsemanship and the life of a nomadic raider.

Class: Fighter

Alignment: any

Disadvantages: Uneducated

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Durability	Core/Common x1
Disad 1	Survival & Tracking	Core/Common x1
3	Riding	Core/Common x1
5	Medical	Core/Common x1
7	Combat Specialization (bow)	Core/Common x1
9	Stronghold	Core/Common x1

♠ Berserker

A variant of the barbarian known for their fearsome and unhinged tenacity in combat.

Class: Fighter

Alignment: any but skews towards Chaotic

Disadvantages: Uneducated

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Berserk	Core/Common x1
Disad 1	Durability	Core/Common x1
3	Attribute Increase (STR, CON, or DEX)	Core/Common x1
5	Medical	Core/Common x1
7	Alertness	Core/Common x1
9	Stronghold	Core/Common x1

Ranger

Rangers are flexible scouts, spies, and combatants. They normally work alone or in pairs at the most. They are particularly effective in outdoor settings. If they take Combat Specialization it will invariably be geared to a type of enemy they've been charged with defending against. Any Wizardry they take will usually be the green school.

Class: Fighter

Alignment: Lawful, Neutral, or Chaotic Good

Disadvantage: Vow of Modesty

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Combat Specialization	Core/Common x1
Disad 1	Survival & Tracking	Core/Common x1
3	Stealth	Adjacent x1/2
5	Alertness	Core/Common x1
7	Wizardry 1 (Green magic)	Opposing x1/4
9	Missile Deflection	Core/Common x1

Paladin

Paladins are holy defenders of their religion's faith. Their combination of martial training and divinely-granted magiks make them among the most formidable of opponents. Such power comes with a heavy price in the form of strict demands on conduct and absolute allegiance to the tenants of the faith.

Class: Fighter

Alignment: Lawful Good

Disadvantages: Vow of Chivalry, Vow of Modesty

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Durability	Core/Common x1
Disad 1	Holy Aura	Adjacent x1/2
Disad2	Thaumaturgy	Adjacent x1/2
3	Bravery	Core/Common x1
5	Combat Specialization	Core/Common x1
7	Turn Undead	Adjacent x1/2
9	Stronghold	Core/Common x1

Swashbuckler

These fast-moving fighters live by both flair and the sword. They're adept combatants with numerous well-rounded physical abilities making them wily opponents. Swashbucklers tend to travel unencumbered and wear only the lightest of armor. Many pirates fit this archetype.

Class: Fighter

Alignment: Chaotic Good, Neutral, or Evil

Disadvantage: none

Level	Talents	Talent Type
1	Combat	Core/Common x1
	Multi-Attack	Core/Common x1
	Stealth	Adjacent x1/2
3	Acrobatics	Adjacent x1/2
5	Climbing	Adjacent x1/2
7	Combat Specialization	Core/Common x1
9	Missile Deflection	Core/Common x1

Cleric

The most common type of priest in a fantasy world is a solid combatant and particularly effective against undead monsters.

Class: Priest

Alignment: any

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Thaumaturgy	Core/Common x1
	Turn Undead	Core/Common x1
3	Attribute Increase (Wisdom, Con)	Core/Common x1
5	Scholarly Knowledge	Core/Common x1
7	Attribute Increase (Wisdom, Con)	Core/Common x1
9	Stronghold	Core/Common x1

Cultist

Cultists are members of malign religions that operate in the shadows. They're known for secrecy, fanaticism, and long-term plots to bring their creed's beliefs into dominance. Inexplicably, many such religions seem to center around snake-gods, spider-gods, frogs-gods, or other such horrid creature-deities. Powerful cultists are often in tune with the nature of these creatures and able to transform themselves into monstrous versions of them.

Class: Priest

Alignment: Lawful, Neutral, or Chaotic Evil

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Thaumaturgy	Core/Common x1
	Sermonize	Core/Common x1
3	Divine Attunement	Core/Common x1
5	Divine Shapeshift	Core/Common x1
7	Wizardry 1 (black magic)	Adjacent x1/2
9	Stronghold	Core/Common x1

Mystic

Mystics are scholarly characters wholly preoccupied with the pursuit and acquisition of knowledge. They're a poor choice for player characters but are often consulted by adventures for exotic and arcane bits of lore.

Class: Priest

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Thaumaturgy	Core/Common x1
	Scholarly Knowledge	Core/Common x1
3	Psychic Sensitivity	Core/Common x1
5	Arcane Knowledge	Adjacent x1/2
7	Arcane Sensitivity	Adjacent x1/2
9	Stronghold	Core/Common x1

Monk

The monk represents the learned but practical clergy. They're most often at home in cloisters and monasteries but a few do take to adventuring.

Class: Priest

Alignment: Lawful Good, Neutral, or Evil

Disadvantages: none

Level	Talents	Talent Type
	Combat	Adjacent x1/2
1	Thaumaturgy	Core/Common x1
	Medical	Core/Common x1
3	Scholarly Knowledge	Core/Common x1
5	Turn Undead	Core/Common x1
7	Bestow Blessing	Core/Common x1
9	Stronghold	Core/Common x1

Templar

Templars are the quasi-military branch of religions. As such, they have better-honed martial skills and often take up arms directly against a religion's enemies.

Class: Priest

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
	Combat	Adjacent x1/2
1	Thaumaturgy	Core/Common x1
	Durability	Adjacent x1/2
3	Multi-Attack	Adjacent x1/2
5	Medical	Core/Common x1
7	Turn Undead	Core/Common x1
9	Stronghold	Core/Common x1

Magic-User

The most common magic-user is wholly devoted to mastery of the arcane arts and will suffer no distractions from this goal. Thus, in wizardry they are supreme, but they lack the well-roundedness of other archetypes. At higher levels they are often the most powerful and influential characters in the realm.

Class: Magic-User

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
	Combat	Opposing x1/4
1	Wizardry 1	Core/Common x1
	Wizardry 2	Core/Common x1
3	Wizardry 3	Core/Common x1
5	Arcane Knowledge	Core/Common x1
7	Spell Refashionment	Core/Common x1
9	Stronghold	Core/Common x1

Hermit/Witch

Solitary and mysterious, the hermit or witch lives a self-sufficient life far from most worldly concerns. When they do take to adventuring they excel in outdoor environments.

Class: Magic-User

Alignment: Neutral Good, True Neutral, Neutral Evil

Disadvantages: Disfigured

Level	Talents	Talent Type
	Combat	Opposing x1/4
1	Wizardry 1 (green magic)	Core/Common x1
	Survival & Tracking	Core/Common x1
Disad 1	Arcane Knowledge	Core/Common x1
3	Divine Attunement (woodlands)	Adjacent x1/2
5	Wizardry 2	Core/Common x1
7	Medical	Core/Common x1
9	Wizardry 3	Core/Common x1

Druid

These sorcerer-priests do not serve a specific deity but instead are devout worshippers of nature. They strive to protect and balance all natural growing things: woodlands; wildlife; crops; and even intelligent creatures like humans. Beyond these concerns they do not involve themselves in the wider affairs of the world and take a neutral stance on most issues. They have special reverence for the sun and moon, ash and oak trees, and mistletoe which is used as the holy symbol to cast their spells. Druids avoid wearing any metallic armor or being encumbered with large amounts of metal as it purportedly affects their magic.

Class: Magic-User

Alignment: True Neutral

Disadvantages: Vow of Nature

Level	Talents	Talent Type
1	Combat	Opposing x1/4
	Wizardry 1 (green magic)	Core/Common x1
	Thaumaturgy	Adjacent x1/2
Disad1	Survival & Tracking	Core/Common x1
3	Divine Attunement (woodlands)	Adjacent x1/2
5	Divine Shapeshift (woodland animals)	Adjacent x1/2
7	Wizardry 2 (Red magic)	Core/Common x1
9	Stronghold	Core/Common x1

Martial Mage

The martial mage is a magician who stands shoulder-to-shoulder with warriors on the battlefield. They're a rare breed and most often found in the service of a demanding king or emperor.

Class: Magic-User

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Opposing x1/4
	Wizardry 1	Core/Common x1
	Durability	Opposing x1/4
3	Battle Casting	Core/Common x1
5	Medical	Core/Common x1
7	Wizardry 2	Core/Common x1
9	Stronghold	Core/Common x1

Enchantress

The enchantress is a beguiling magician particularly adept at manipulation, persuasion, and even seduction. They're most often women but there are notable male enchanters as well.

Class: Magic-User
Alignment: Chaotic Good, Neutral, or Evil
Disadvantages: none

Level	Talents	Talent Type
	Combat	Opposing x1/4
1	Wizardry 1 (blue magic)	Core/Common x1
	Beguilement	Adjacent x1/2
3	Wizardry 2	Core/Common x1
5	Inspiration	Adjacent x1/2
7	Arcane Knowledge	Core/Common x1
9	Stronghold	Core/Common x1

Illusionist

The illusionist specializes in the magic of misdirection and deceit. They complement their supernatural abilities with more earthly skills such as stealth or sleight of hand.

Class: Magic-User
Alignment: any
Disadvantages: none

Level	Talents	Talent Type
	Combat	Opposing x1/4
1	Wizardry 1 (blue magic)	Core/Common x1
	Stealth Casting	Core/Common x1
3	Stealth	Adjacent x1/2
5	Arcane Knowledge	Core/Common x1
7	Wizardry 2	Core/Common x1
9	Stronghold	Core/Common x1

Necromancer

Necromancers are mystic explorers of life, death, un-life, and fringe medical knowledge. They are not inherently evil, but such pursuits are often forbidden by law or require moral compromise to master.

Class: Magic-User

Alignment: True Neutral, Neutral Evil

Disadvantages: none

Level	Talents	Talent Type
	Combat	Opposing x1/4
1	Wizardry 1 (Black magic)	Core/Common x1
	Medical	Core/Common x1
3	Thaumaturgy	Adjacent x1/2
5	Wizardry 2	Core/Common x1
7	Arcane Knowledge	Core/Common x1
9	Stronghold	Core/Common x1

Sage

The sage is the magic-user counterpart to the priest's mystic archetype. As with the mystic they're poor adventures, but are often consulted by those undertaking such excursions.

Class: Magic-User

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
	Combat	Opposing x1/4
1	Wizardry 1	Core/Common x1
	Arcane Knowledge	Core/Common x1
3	Scholarly Knowledge	Adjacent x1/2
5	Arcane Sensitivity	Core/Common x1
7	Psychic Sensitivity	Adjacent x1/2
9	Stronghold	Core/Common x1

Sorcerer

The sorcerer is less erudite than the standard magic-user on magic theory and instead relies on instinctive magical talent. They tend to be perceptive characters who're preternaturally in tune with everything around them.

Class: Magic-User

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Opposing x1/4
	Wizardry 1	Core/Common x1
	Arcane Sensitivity	Core/Common x1
3	Psychic Sensitivity	Adjacent x1/2
5	Wizardry 2	Core/Common x1
7	Alertness	Core/Common x1
9	Stronghold	Core/Common x1

Knave

The knave is the archetypical "thief" character. They're adept at robbing treasuries, lifting purses, burglarizing homes, and general criminal behavior.

Class: Knave

Alignment: any

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Stealth	Core/Common x1
	Burglary	Core/Common x1
	Backstabbing	Core/Common x1
3	Sleight of hand	Core/Common x1
5	Fraud	Core/Common x1
7	Lore & Read Magic	Core/Common x1
9	Stronghold	Core/Common x1

Assassin

These lethal characters specialize in spying, subterfuge, and the elimination of enemies. They most commonly belong to an underground guild of assassins that dole out murder for wealthy clients.

Class: Knave
Alignment: Lawful, Neutral, or Chaotic Evil
Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Stealth	Core/Common x1
	Assassination	Core/Common x1
	Disguise	Core/Common x1
3	Backstabbing	Core/Common x1
5	Burglary	Core/Common x1
7	Fraud	Core/Common x1
9	Stronghold	Core/Common x1

Acrobat

Drawn from circuses and entertainment troops, the acrobat makes a formidable thief or adventurer. They are particularly good as second-story men or in capers involving hard to access areas such as cliff-side monasteries or high castle towers.

Class: Knave
Alignment: any
Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Stealth	Core/Common x1
	Acrobatics	Core/Common x1
	Burglary	Core/Common x1
3	Climbing	Core/Common x1
5	Escapology	Core/Common x1
7	Lore & Read Magic	Core/Common x1
9	Stronghold	Core/Common x1

Bard/Jester/Lark

These wandering minstrels, actors, and storytellers make excellent jack-of-all-trades adventures.

Class: Knave

Alignment: Chaotic Good, Neutral, or Evil

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Stealth	Core/Common x1

3	Burglary	Core/Common x1
5	Lore & Read Magic	Core/Common x1
7	Wizardry 1	Adjacent x1/2
9	Medical	Core/Common x1

Beggar

Beggars often have some real infirmity that they play up for sympathy and to allow others to underestimate them. Others are merely skilled at appearing wretched for effect. Either way, they can make effective characters who's opponents fail to take seriously until it's till too late...

Class: Knave

Alignment: any

Disadvantages: One of Disfigured, Lame, Missing arm or hand, Weak ears, or Weak eyes.

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Stealth	Core/Common x1
	Sleight of hand	Core/Common x1
	Backstabbing	Core/Common x1
disad1	Attribute Increase	Core/Common x1
3	Burglary	Core/Common x1
5	Disguise	Core/Common x1
7	Fraud	Core/Common x1
9	Attribute Increase	Core/Common x1

Mountebank

These vagabond grifters rarely settle in one place for long and make a living by separating marks from their coinage with all manner of scams. Mountebanks suffer numerous run-ins with the law and angry victims, and thus often are as good at getting out of predicaments as they are at getting into them.

Class: Knave

Alignment: Chaotic Good, Neutral, or Evil

Disadvantages: none

Level	Talents	Talent Type
1	Combat	Adjacent x1/2
	Stealth	Core/Common x1
	Sleight of hand	Core/Common x1

Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms

may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

Use of Product Identity: You agree not to Use any Product Identity, including as an indication as

to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10 Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

1 Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.
